b) Market Review and Outlook

Global Environment

FY2011 saw the global economy transitioning into a phase of slower but sustained economic growth. While the developed economies displayed initial signs of recovery during the year, most of the developing economies on the other hand regained growth rates closer to those observed during the pre-crisis period. The same could be attributed to strong domestic consumption and the robust banking system of these economies. This, in addition to the benign monetary policy in the developed world, resulted in enhanced capital inflows to these countries. The capital inflows put upward pressure on currencies and money supply situation in developing economies inducing countries like India and China to introduce aggressive monetary tightening regimes to contain capital flows and inflation.

The recovery witnessed by developed economies has not been strong enough to make any major impact on high unemployment and spare capacity. These economies, many of which were at the centre of the financial crisis, continued to be weighed down by banking sector restructuring, high consumer debt and a right-sizing of economic sectors at various points throughout the year. In addition, the Japanese economy had to deal with additional blows of Tsunami and earthquake, which further pushed back possibilities of recovery.

Equity market review

FY2011 could be termed as the year of consolidation for the domestic equity market. Risk appetite was built during the first three quarters amidst optimism about growth in global economies. Early in November, Sensex breached 21,000 for first time since January 2008 (Source: BSE). Since then, the markets witnessed profit-booking in reaction to the various global geo-political issues, stagnation in government decision making, higher interest rates (in response to domestic inflation concerns) and concerns of high commodity prices impacting corporate profitability and consumer spending. BSE Sensex posted 10.94% gains for the FY2011 (Source: BSE). The BSE Midcap gained 1% while the BSE Small cap shed 3.8% during the same period (Source: BSE). Durables led with more than 47% gains. Banking, FMCG and Software were the other star performers of FY2011 rising 25%. Realty was the worst performing sector losing 29%. The net inflow of foreign funds in equity market during FY2011 was Rs. 1,10,120 crore.

Fixed Income market review

In FY 2011, the yield of the benchmark security 7.80 percent GS 2020 moved in the range of 7.50% - 8.38% as compared to 6.17% - 8.17% range for the same period last year. The bonds yield soared on account of volatile global oil prices and higher inflation numbers.

The annual Wholesale Price Index inflation averaged at 9.57% in FY 2011 against 3.86% in the previous year. The figure was highest in April 2010 at 10.88% and lowest in November 2010 at 8.20%.

During the year, the government issued a new short term instrument known as Cash Management Bills to meet the temporary cash flow mismatches of the Government. The central bank also announced in the month of December that it will conduct open market operation (OMO) auctions for purchase of Government securities for an aggregate amount of Rs. 48,000 crore in the next one month to infuse some liquidity into the system. On average banks borrowed Rs. 34,000 crore per day from the RBI Liquidity Adjustment Facility window as compared to Rs. 830 crores parked with the central bank in the previous financial year.

The figures above were reflective of the tight liquidity situation due to consistent rate hikes by the RBI. The rates were increased seven times in the financial year and the repo stood at 6.75% at year end against 5.25% in the beginning of the year.

During FY 2011 India's forex reserves grew by 23.39 USD billion to 305.49 USD billion. The Rupee stayed range bound between 47.57-44.03 to the dollar as compared to 50.53-44.94 in the similar period last financial year. Amongst Asian countries the Rupee felt the maximum impact of China's economic slowdown and European debt crisis during the middle of 2010.

The Finance Minister paved the way for greater foreign fund inflows into the infrastructure sector by raising the ceiling in corporate debt from \$ 5 billion to \$25 billion. The total cap was also raised to \$40 billion. In March 2011, the RBI announced the amendment directions on Interest Rate Futures (IRFs) permitting trading of IRFs on 91-Day Treasury Bills.

Future Outlook:

The global economy is expected to continue experiencing sustained recovery. From the developed economies much of the growth momentum could potentially be driven by the US, with support from Canada and the EU (European Union). The central banks could take the leaf out of monetary policy tightening moves by the European Central Bank (ECB) and gradually move away from their benign monetary policy. There is an expectation of more aggressive action during the last quarter of FY 2011-12. The developed world is expected to move forward in its effort to restructure the banking and construction industries, combined with necessary fiscal and household spending consolidation. Hence we could see the economies close to using up spare capacity and having a better GDP growth.

On the other hand, the emerging markets including the Brazil, Russia, India and China (BRIC) nations are expected to register a mild deceleration of growth trajectory. This is primarily due to possible continuance throughout much of FY2012 of the tight monetary policy to counter the effects of capital inflows, volatile commodity process and the high credit growth which is being used to build fresh capacities. A diminishing recession in the developed world may further reinforce the need for continuance of tight monetary policy. This situation could in turn serve to temper growth expectations, provide impetus to commodity prices and push bond yields higher in the emerging economies. These factors could create a scenario where there is a modest narrowing of performance gap between the developed and emerging economies.

In this kind of transitional environment, India has a distinct possibility of continuing its robust performance on the economic front. The confidence stems from a combination of high internal demand despite the near term likelihood of high inflation and recovery of export growth despite the recent hiccups in the Middle East and Japan, which are amongst the top trading destinations for India (Source: Economic survey 2011). According to the advance estimates provided by the Central Statistics Office (CSO), India's Gross Domestic Product (GDP) is expected to grow at 8.6% in FY2010-11 which can be partly attributed to a favorable monsoon forecasted by the IMD. In addition, there are expectations of further deregulation of oil prices especially diesel and reduction in pace and quantum of interest rate hikes over the next few months. However, downside risk remains in the form of volatile oil prices and widening current account deficit with near term concerns being high interest rates and input costs impacting profitability. Despite the foreseeable challenges, any intermittent corrections should be viewed favorably to add position in equity.

(c) Operations of the Schemes

(a) Average Assets under Management (AAUM):

For the year under review, the AAUM of the Mutual Fund for the quarter ended March 31, 2011 stood at Rs. 735,519.47 million.

As of March 31, 2011, the Fund comprised twelve (12) close-ended Schemes and forty-one (41) open-ended Schemes. The Fund also had one Fund-of-Funds Scheme having five Plans there under. During the year under review the Fund launched one exchange traded scheme; one open index scheme and four close ended debt schemes.

(b) Operations and Consumer Service:

With a view to rendering timely and efficient customer service, the Investment Manager of the Fund, viz., ICICI Prudential Asset Management Company Ltd. ("the AMC") has been making good progress in networking its 35 branches. Service levels at these branches have been maintained at above satisfactory levels to cope with the continuously increasing client base.
