ECONOMIC OVERVIEW

Global Economic Growth

Growth trajectory in developed economies

Growth projections for 2026

Source: Crisil Intelligence, financial news websites, International Monetary Fund (IMF), Organisation for Economic Cooperation and Development (OECD)

- US economy expanded 1.5% on-year in Q2CY26, slowing from 2.1% growth in Q1CY26.
- Eurozone GDP expanded 1.2% in Q2CY26, compared with a revised growth rate of 0.6% in Q1CY26, indicating stronger economic momentum across the region.
- UK economy expanded 1.2% on-year in Q2CY26, compared with 0.9% growth in Q1CY26.
- Japan's economic growth slowed to 1.4% on-year in Q2CY26, down from a revised 1.8% in Q1CY26, signalling a moderation in economic activity

Policy rates of global central banks

- US Fed raised the federal funds rate by 25 basis points to 3.75-4.00% in September 2026.
- ECB raised its key interest rates by 25 bps at its September 2026 meeting, taking the main refinancing rate to 2.65%, the deposit facility rate to 2.50% and the marginal lending rate to 2.90%
- BoE kept its benchmark interest rate unchanged at 3.75%.
- BoJ raised its key short-term rate by 25 bps to 1.25% at September meeting
- PBOC maintained its key lending rates at record lows for the 16th consecutive month in September 2026, in line with market expectations. The one-year loan prime rate (LPR) was kept at 3.0%, while the five-year LPR remained at 3.5%

Global Bond Yields

- The yield on the 10-year US Treasury note ended at 5.17% on September 25 compared with 4.75% on August 31, 2026c.
- The yield initially rose as investors reassessed the outlook for US monetary policy, amid persistent price pressures and resilient economic activity. Rising crude oil prices added to inflation risks, while stronger economic indicators reduced expectations of an aggressive easing cycle.
- Firm growth and sticky inflation increased expectations that the US Federal Open Market Committee (FOMC) could keep interest rates elevated for longer, putting upward pressure on Treasury yields.
- Additional upward pressure on long-term yields came from higher US borrowing requirements with the country's debt hitting \$40 trillion, and concerns over the fiscal outlook. Rising government debt and persistent fiscal deficits increased the supply of Treasury securities, while investors demanded a higher term premium to hold longer-dated bonds.
- The increase in yields was partly moderated during periods of softer oil prices and stronger demand for haven assets. The Treasury's efforts to support demand and market liquidity through increased purchases of longer-dated securities also helped limit the upward pressure on yields.
- However, the impact was temporary as investors continued to focus on inflation risks, borrowing requirements and the broader interest rate outlook.
- Toward the end of the month, treasury yields remained volatile as investors assessed the outlook for inflation and monetary policy. The interest rate hike by the US FOMC and subsequent comments by policymakers reinforced concerns that inflation could remain persistent, particularly amid higher energy prices, while the possibility of more rate increases kept upward pressure on longer-term yields. The Federal Reserve raised its benchmark interest rate by a quarter percentage point (25 basis points) to a target range of 3.75% to 4.00% on September 16, 2026.

ECONOMIC OVERVIEW

India's GDP growth

On-quarter GDP growth trend

GDP growth projections for 2026

Source: Ministry of Statistics and Programme Implementation (MoSPI), IMF, OECD

- India's GDP grew 7.8% on-year in Q1FY27, compared with an upwardly revised 8.6% in Q4FY26
- In terms of gross value added, the economy grew 8.2% in Q1FY27, compared with 8.7% in Q1FY26
- In GVA terms, the agriculture sector grew 3.6% vs 4.4%, manufacturing 9.2% vs 8.3%, construction 5.2% vs 7.7%, electricity and other public utility services 8.9% vs 1.8%, and mining -2.4% vs 12.4%
- Crisil expects GDP growth to slow to 6.6% on-year in FY27 compared with 7.7% FY26, driven by higher input cost pressures, the forecast of a below-normal monsoon and softer global growth. Relative resilience in consumption demand and continued government capital expenditure should support growth
- A sharp rise in energy and other input costs (including transportation) is expected to be further passed on to consumers, raising core inflation. Below-normal rainfall amid El Niño is expected to put pressure on food inflation

MARKET REVIEW

India Equity Market Performance

Index performance

Institutional flows

*MF data is as on September 21, 2026

Source: National Stock Exchange, Bombay Stock Exchange, Securities and Exchange Board of India, National Securities Depository (as on September 28, 2026)

- Indian equity markets ended the month in negative territory, weighed down by persistent global uncertainties, fluctuating crude oil prices amid ongoing tensions in West Asia, and a steady rise in global bond yields
- Concerns over a prolonged higher-interest-rate environment, following strong US macroeconomic data, along with sustained foreign institutional investor (FII) outflows, dampened investor sentiment. Additionally, proposed regulatory changes in the insurance sector, coupled with profit booking after earlier gains, further capped the market's upside during the month. The BSE Sensex and Nifty 50 declined 5.44% and 5.40%, respectively
- Global factors remained a key overhang. Volatile crude oil prices continued to fuel inflationary concerns, while rising US Treasury yields and a stronger dollar weighed on emerging markets, including India. Geopolitical developments in West Asia also continued to drive risk-off sentiment through most of the month
- FIIs remained net sellers during the month, as elevated US bond yields, a stronger dollar and global risk aversion prompted capital outflows from emerging markets. Foreign institutional investors (FIIs) sold equities worth Rs 206.95 billion in September (till 28th September), compared with buying of Rs 296.31 billion in August.
- However, domestic factors provided intermittent support to the markets. Periodic corrections in crude oil prices towards the latter part of the month helped ease inflation concerns. Furthermore, multiple global rating agencies maintained a positive outlook on India's growth trajectory, reinforcing confidence in the domestic economy.
- Additionally, resilient domestic economic fundamentals and selective buying in defensive and rate-sensitive sectors helped cushion the downside. Domestic institutional investors (DIIs) remained supportive of the market, with equity purchases rising to Rs 526.17 billion in September from Rs 582.68 billion in August, providing continued liquidity support to Indian equities.
- Stability in institutional flows from domestic investors and stock-specific opportunities supported market sentiment during volatile phases.
- Sectoral performance was largely negative during the month, with broad-based declines across sectors. Among the worst performers, BSE Information Technology (9.09%), BSE Auto (7.96%) and BSE Consumer Durables (6.30%) led the losses. IT stocks were impacted by concerns over global growth and rising bond yields, auto stocks faced pressure from higher input costs and demand moderation concerns, while consumer durables saw profit booking amid cautious investor sentiment.
- Overall, September was characterised by a dominance of external headwinds over domestic positives. Going ahead, market direction will be guided by crude oil price trends, developments in the West Asia conflict, global interest rate trajectory and foreign fund flows, along with key domestic macroeconomic indicators.

Equity Market Outlook

Global Update: US equity market volatility was driven by a sharp rise in Treasury yields, an unexpected Federal Reserve interest rate hike, and Artificial Intelligence (AI) sector rallies. The S&P 500 index, which has exposure to economically sensitive sectors, declined 0.2% during the month, whereas, the tech-heavy Nasdaq100 rallied 3.1% in the same period.

In the UK, the FTSE 100 Index declined due to retreating energy and oil prices, rising global bond yields, and lingering geopolitical tensions. The index fell 1.7% in the month up till Sep 29, 2026.

Likewise, the pan-European STOXX 600 was down 2.0% during the month due to surging sovereign bond yields, high energy costs and restrictive monetary policy decisions.

China's equity market barometer index, Shanghai Composite, declined 3.9% due to fading optimism from the Trump-Xi summit, tech sector selloffs over potential U.S. restrictions, and rising global risk aversion ahead of China's National Day holiday.

Japan's Nikkei 225 fell 0.5% primarily due to higher oil prices, soaring domestic bond yields, and valuation pressures on overextended AI and tech stocks.

India Update: Indian equities declined in Sep 2026 due to heavy selling by FPIs amid US Fed rate hikes, higher crude oil prices and rising global risk aversion. The Sensex fell 5.8% whereas the Nifty50 fell 5.7% up till Sep 29, 2026. FPIs withdrew net Rs25,662 crore in Sep 2026 compared to net purchase of Rs.29,631 crore in Aug 2026. (Source: NSDL; Data till Sep 29, 2026)

Sector-wise, BSE Healthcare (-0.6%), BSE Utilities (-1.2%) and BSE Telecommunication (-3.2%) were the least impacted, whereas, BSE IT (-10.3%), BSE Auto (-9.0%) and BSE Consumer Durables (-8.2%) declined the most. (Source: BSE)

Our view going forward:

- Markets remained volatile recently, driven by elevated crude prices, firm global bond yields and persistent geopolitical tensions, even as the Rupee stayed at the weaker end.
- Performance has been shaped by rotation into India amid global de-risking, though near-term equity moves were muted with Nifty down about 1% and sector dispersion high (realty/pharma/metals outperforming; IT/autos/private banks soft).
- Flows remain supportive, with sustained FPI and DII buying, even as global equities turned mixed across Korea/Taiwan/US versus Germany and parts of SE Asia.
- Macro momentum stays constructive — domestic demand remains healthy, credit growth robust and government capex continues to aid activity, even as PMI indicators show slight softening.
- These factors reinforce India's long-term economic resilience, though near-term volatility is likely to persist given global uncertainty, heavy domestic IPO supply and elevated valuations in developed markets due to the AI-led rally.
- Equity valuations remain neutral, supporting a staggered investment approach (SIP/STP) in diversified strategies that can adjust across sectors and market caps.
- With volatility expected to stay high, Hybrid and Asset Allocation schemes remain suitable for balancing risk and return

Steps to read the above table

- 1.Yr Monthly Rolling returns of Nifty 50 TRI is extracted for the above period
 2. The returns are then classified into different intervals depending on the bands of EVI (eg, EVI < 80)
 3. Returns in the interval are selected on basis of investment period falling in the range of EVI (for Dark Green zone, returns are selected of investment made when EVI was < 80)
- Median Returns are used as the median is a better measure of the central tendency of the group as it is not skewed by exceptionally high or low characteristic values

Liquidity in the banking system

Data as on September 28

Source: RBI

- The yield on the 10-year benchmark 6.94% GS 2036 paper rose to 7.18% on September 28 from 6.95% on August 31, amid rising domestic inflation concerns, elevated crude oil prices, higher global bond yields and narrowing surplus liquidity conditions
- The 10-year G-sec yield remained relatively range-bound in the first half of September, supported by surplus banking-system liquidity and expectations of stable monetary conditions. However, the yield faced intermittent upward pressure as the Reserve Bank of India's (RBI) liquidity-absorption measures reduced the banking-system surplus and crude oil prices remained elevated, limiting the scope for further gains in the bond market
- The yield subsequently rose sharply as higher global borrowing costs—reflected in rising major global bond yields, particularly US Treasury yields—put pressure on domestic yields. Elevated crude oil prices, driven by rising geopolitical concerns, also heightened concerns over the domestic inflation outlook. The benchmark yield reached a four-month high, while expectations of a possible RBI rate hike at the upcoming October policy meeting weighed on sentiment
- Meanwhile, the government's borrowing plan for the second half of fiscal 2027 also remained a key consideration for the bond market. The government plans to raise Rs 7.86 lakh crore through 23 weekly auctions between October and March. Importantly, for the 10-year segment, 26.3% of the second-half borrowing is allocated to 10-year securities, making the supply outlook an important factor for the benchmark yield. At the same time, the total market borrowing for fiscal 2027 has been revised to ~Rs 15.99 lakh crore, below the budget estimate of Rs 17.20 lakh crore
- Going ahead, investors will focus on the RBI's monetary policy decision in October, the trajectory of domestic inflation and crude oil prices, global bond yields and the pace of government bond supply under the second-half borrowing programme

MARKET OUTLOOK

Fixed Income Outlook

Fixed Income Outlook

Bond yields experienced a sustained upward trajectory in Sep 2026, primarily driven by global macro headwinds, notably a severe selloff in US Treasuries, alongside an escalation in Brent crude oil prices amid ongoing geopolitical tensions in West Asia.

From a monetary policy perspective, we project a 25 basis point repo rate hike at the Oct 2026 policy meeting. While market expectations are pricing 4 to 5 rate hikes by the RBI over the subsequent year, our assessment is that the RBI will maintain a balanced, rather than an overtly hawkish, tone, with the objective of steering its policy rate towards a neutral position.

We contend that market yields have already sufficiently priced in anticipated hikes, minimizing the likelihood of a negative market reaction to actual announcements. Moreover, the increased bond yields have enhanced fixed income prospects, recommending adding duration to bond portfolios.

Globally, we find extreme pricing in US Treasuries' long-bonds, rendering them attractive. We expect rotation of money from US equities to US Treasuries due to the elevated yields.

For fixed income portfolios, we favor corporate bonds in the 1- to 3-year duration range for accruals. On the sovereign side, we maintain a positive outlook on long-dated State Government Securities. Consequently, we recommend investment in short-term products, corporate bonds, gilt fund and banking and PSU debt in the current environment.

Market Activity

The 10-year Indian benchmark bond yield rose to 7.16% on Sep 29, 2026, up 25 bps compared to 6.91% as on Aug 31, 2026.

Liquidity conditions were abundant due to the FCNR-B deposit boom. The RBI absorbed some of the surplus by selling G-secs worth Rs.1 lakh crore. The 91-day T-bill yield rose 18 bps on-month to 5.47% whereas the 182-day T-bill rose 21 bps to 5.84%. (Source: CCIL)

bps – basis points; T-bill – Treasury Bill; RBI – The Reserve Bank of India; MPC – Monetary policy committee; SDL – State Development Loans. GST – Goods and services tax.

Gold

- Gold prices ended at Rs 147,980 per 10 gm on September 28, down 5.04% from Rs 155,835 per 10 gm on August 31, as reported by the India Bullion and Jewellers Association
- The month began on a weaker note as a firm US dollar and resilient US economic data reduced demand for gold, while investors remained cautious ahead of key global macroeconomic releases
- The downward pressure intensified mid-month following the US Fed's interest rate hike, which reinforced expectations of a prolonged higher-interest-rate environment. This led to a rise in US Treasury yields, increasing the opportunity cost of holding non-yielding assets such as gold and triggering a shift towards fixed-income instruments
- Towards the latter part of the month, gold prices remained subdued despite intermittent support from geopolitical uncertainties. Overall sentiment stayed weak due to persistent dollar strength, elevated yields and expectations of further policy tightening, resulting in gold prices closing the month on a softer note

Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 30 September 2026

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on September 30, 2026.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. BISPL Companies do not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. BISPL Companies make no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. BISPL Companies are not investment advisors, and the BISPL Companies make no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other vehicle. Inclusion of a security within an index is not a recommendation by the BISPL Companies to buy, sell, or hold such security, nor is it considered to be investment advice. Closing prices for BSE Indices are calculated by BISPL or its agent based on the closing price of the individual constituents of the index as set by their primary exchange. Closing prices are received by BISPL or its agent from one of its third-party vendors and verified by comparing them with prices from an alternative vendor. The vendors receive the closing price from the primary exchanges. Real-time intraday prices are calculated similarly without a second verification.

The Scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover etc. The ability of the portfolio to meet capital protection on maturity to the investors can be impacted in certain circumstances including changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. Accordingly, investors may lose part or all of their investment (including original amount invested) in the Scheme. No guarantee or assurance, express or implied, is given that investors will receive the capital protected value at maturity or any other returns. Investors in the Scheme are not being offered any guaranteed / assured returns.
