Equity Outlook & Triggers

Global Update: U.S. equity markets finished August 2026 with solid overall monthly gains, led by the Nasdaq Composite rising approximately 3.9% and the S&P 500 advancing about 2.6%, driven by resilient economic activity, robust corporate earnings growth, and strong technology sector momentum. The index delivered a strong performance despite late-month turbulence driven by rising Treasury yields and geopolitical tensions.

In the UK, the FTSE 100 dipped 0.4% during the month primarily because heavyweight mining and commodity stocks retreated alongside a slide in banking and energy sectors, which overshadowed minor, global AI-driven technology gains.

The STOXX 600 achieved its fifth consecutive monthly gain, driven by resilient corporate earnings beat and global technology rallies. The pan-European benchmark Stoxx600 index closed 0.3% higher in Aug 2026.

China's equity market barometer index, Shanghai Composite, gained 4.0% in Aug 2026 after encouraging signs of stabilization in industrial manufacturing data and tech-led boom.

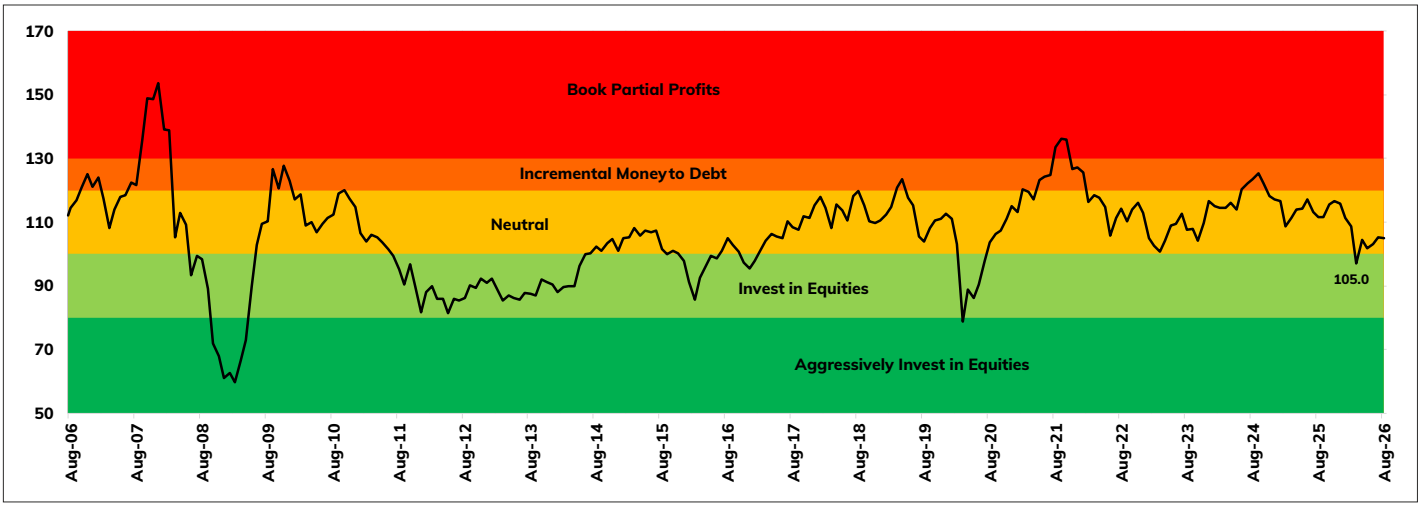

Japan's Nikkei 225 rallied 2.3% in Aug 2026 due to easing Middle East geopolitical tensions, receding oil price inflation concerns, and robust short-covering in key domestic banking and digital infrastructure sectors.

India Update: Indian equities declined in Aug 2026 due to rising crude oil prices and concerns over persistent global inflation. The Sensex fell 1.5% whereas the Nifty50 fell 1.2% in Aug 2026. FPIs net inflow was Rs.29,631 crore in Aug 2026 compared to net purchase of Rs.20,220 crore in July 2026. (Source: NSDL)

Sector-wise, BSE Capital Goods (+2.9%), BSE Metals (+2.4%) and BSE Healthcare (+1.5%) gained the most, whereas, BSE FMCG (-4.1%), BSE Power (-3.3%) and BSE Oil & Gas (-2.1%) were laggards. (Source: BSE)

Our view going forward:

- Indian markets remained volatile in August 2026, given – a) sharp swings in crude oil prices b) renewed West Asia tensions c) Rupee staying at the weaker end.
- Performance during the month, was largely driven by rotation into India due to the Global AI de-risking phase.
- On the macro front, the Rupee has depreciated ~10% in last one year, making it an undervalued currency.
- India's growth momentum remains strong- Q1 FY27 GDP grew 7.8% YoY, supported by higher growth in the services and manufacturing sectors.
- Other macro indicators too remain robust –demand environment is good, in the current fiscal and Govt. capex continues to support economic activity.
- These factors bode well for long term prospects of the economy and markets
- However, in the near term we believe markets will be volatile as the uncertainty around the conclusion of US-Iran war remains high. Also, other triggers which may impact markets in near term include a heavy domestic IPO market and elevated global valuations driven by AI rally
- Equity valuations continue to remain in neutral zone currently. We continue recommending investing in equities in a staggered manner through SIP/STP in investment Strategy that have the flexibility to maneuver across sectors / market cap.
- Since market volatility may persist in the near term, we also continue to recommend investing in Hybrid / Asset Allocation investment Strategy.

Data as on August 31, 2026 has been considered. Equity Valuation Index (EVI) is a proprietary model of ICICI Prudential AMC Ltd. (the AMC) used for assessing overall equity market valuations. The AMC may also use this model for other facilities/features offered by the AMC. Equity Valuation index is calculated by assigning equal weights to Price-to-Earnings (PE), Price-to-Book (PB), G-Sec*PE and Market Cap to GDP ratio any other factor which the AMC may add/delete from time to time. G-Sec – Government Securities. GDP – Gross Domestic Product.

Market Outlook

iSIF
By ICICI PRUDENTIAL MUTUAL FUND

Debt Outlook & Triggers

Bond yields inched up in Aug 2026 amid concerns over domestic inflation stemming from higher crude oil prices and tapering FPI inflows in bonds. On the positive side, the economy posted a resilient 7.8% YoY growth for Q1:FY2026-27.

We believe the rise in yields has increased attractiveness of long-bond yields. Hence, we recommend gradually adding duration to portfolios.

On monetary policy, we maintain our earlier stance that the RBI could likely look-through inflation concerns given that current rise in oil, food prices is supply-side driven. As the economy recovers and growth expands, we expect the RBI to normalize interest rates to a neutral level.

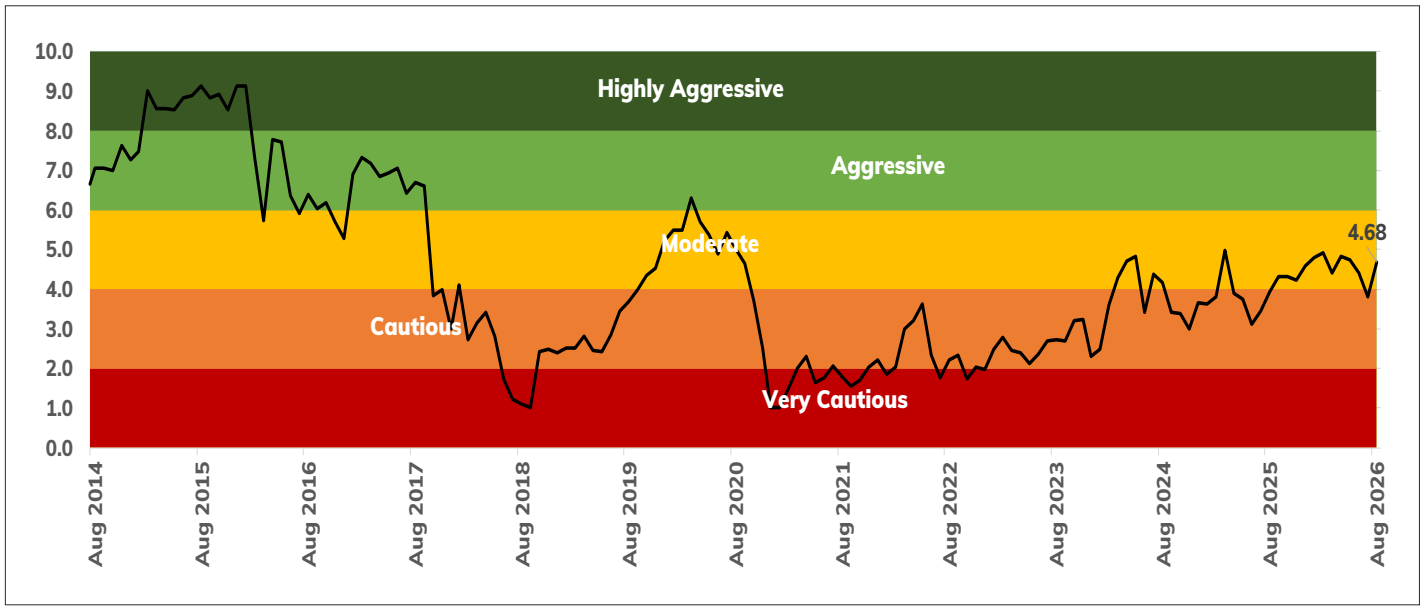

For fixed income portfolios, we favor corporate bonds in the 1- to 3-year duration range. On the sovereign side, we maintain a positive outlook on long-dated State Government Securities. Consequently, we recommend investment in short-term products, corporate bonds, floating interest instruments, and banking and PSU debt in the current environment.

Market Activity

The 10-year Indian benchmark bond yield rose to 6.91% on Aug 31, 2026, up 8 bps compared to 6.83% as on July 31, 2026.

Liquidity conditions were generally in surplus during the month. The 91-day T-bill yield fell 5 bps on-month to 5.29% whereas the 182-day T-bill rose 4 bps to 5.63%. (Source: CCIL)

bps – basis points; T-bill – Treasury Bill; RBI – The Reserve Bank of India; MPC – Monetary policy committee; SDL – State Development Loans. GST – Goods and services tax.

Data as on August 31, 2026. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement and any other factor which the AMC may add / delete from time to time for calculation. Debt Valuations Index is a proprietary model of ICICI Prudential AMC Ltd (the AMC) used for assessing overall debt valuations. The AMC may also use this model for other facilities / features offered by the AMC.
