## What are Specialized Investment Funds (SIFs)

To address the structural gap between Mutual Funds and PMS, the Securities and Exchange Board of India (SEBI) has introduced a new regulatory framework titled Specialized Investment Funds (SIFs) as a part of MF Regulations, positioned as an intermediate investment vehicle that combines the regulatory transparency of mutual funds with portfolio flexibility.

### MUTUAL FUNDS

Offers wide range of products, but restricted in portfolio flexibility including advanced derivative strategies

### THE GAP

#### SIFs

A middle ground >  
Offers portfolio flexibility including advanced derivative strategies at INR 10 lakh and above entry point

### PMS/AIF

Offers portfolio flexibility, but requires a minimum ticket size of INR 50 lakh and above for PMS & INR 1cr and above for AIF

## Comparative Positioning

| Feature                                             | Mutual Funds                          | SIFs                                                    | PMS/AIFs                                                                                          |

## Equity Outlook & Triggers

**Global Update:** The S&P 500 index and Nasdaq-100 experienced mid-month profit-taking following a powerful early-year rally. After peaking on June 2, 2026, growing concerns over monetary tightening and frothy valuations in mega-cap tech stocks triggered sharp corrections, which drove the indexes down 1.1% and 0.2%, respectively.

In the UK, the FTSE 100 experienced a resilient upward trajectory despite early-month softness and mid-month turbulence—driven by UK economic contraction fears and global mining sell-offs—the index was consistently bolstered by strong performances in banking, defence, and cyclical sectors.

The STOXX Europe 600 Index surged in June 2026, fuelled by easing geopolitical tensions following a preliminary US-Iran deal, resilient earnings, and a major boost in AI-related technology stocks. The pan-European benchmark Stoxx600 index closed 2.5% higher in June 2026.

China's equity market experienced a volatile but ultimately stabilizing June 2026. Early-month tech sell-offs and growth concerns pushed indices to two-month lows. However, a strong late-month recovery driven by stellar export data, rebounding AI stocks, and better-than-expected factory activity helped the markets close the month in positive territory.

Japan's Nikkei 225 secured its best quarterly performance on record powered primarily by artificial intelligence and semiconductor-related shares. The index achieved this historic rally despite early-month profit-taking and brief pullbacks triggered by global tech volatility.

**India Update:** Indian equities experienced a volatile yet resilient June 2026, closing the month with modest gains. Early consolidation caused by West Asia tensions and an IT-led selloff was offset by easing crude prices and strong domestic buying.

The BSE Sensex gained 2.3% and the Nifty50 gained 1.4% during the month. FPIs sold Rs.49,340 crore in June 2026 compared to outflow of Rs.32,963 crore in May 2026. (Source: NSDL)

Sector-wise, BSE Infotech (-8.9%), BSE Metals (-8.1%) and BSE Power (-3.4%) were laggards, whereas, BSE Bankex (+6.4%), BSE Realty (+5.9%) and BSE Healthcare (+5.3%) gained the most. (Source: BSE)

Our view going forward:

- The world continues to witness the constant 'to and fro' of US-Iran conflict with fragile truce and ceasefires. Although crude prices have come-off, energy dependent countries are now actively seeking alternative energy sources.
- The Rupee has depreciated ~10% in last one year, making it an undervalued currency. Concerns around Current Account Balance eased a bit as Mar 2026 quarter saw a surplus at 0.7% of GDP.
- India's GDP numbers were resilient for FY25-26 as it accelerated to 7.7% in FY26 (vs 7.1% in FY25) reflecting stronger economic activity.
- Other macro indicators too remain robust – Fiscal Deficit is under control, demand environment is good, in the current fiscal, Govt. has kick started capex on a high note.
- However, in the near term we believe markets will be volatile as the uncertainty around the conclusion of US-Iran war remains high. Also, other triggers which may impact markets in near term include a heavy domestic IPO market and high global valuations driven by AI rally.
- Equity valuations continue to remain in neutral zone currently. We continue recommending investing in equities in a staggered manner through SIP/STP in investment strategies that have the flexibility to maneuver across sectors / market cap.
- Since market volatility may persist in the near term, we also continue to recommend investing in Hybrid / Asset Allocation investment strategies.

U.S. – United States of America; US Fed: Federal Reserve of US; FY: Financial year. FI – Foreign Portfolio Investor. AI – Artificial Intelligence.

Data as on June 30, 2026 has been considered. Equity Valuation Index (EVI) is a proprietary model of ICICI Prudential AMC Ltd. (the AMC) used for assessing overall equity market valuations. The AMC may also use this model for other facilities/features offered by the AMC. Equity Valuation index is calculated by assigning equal weights to Price-to-Earnings (PE), Price-to-Book (PB), G-Sec\*PE and Market Cap to GDP ratio and any other factor which the AMC may add / delete from time to time. G-Sec – Government Securities. GDP – Gross Domestic Product.

## Debt Outlook & Triggers

Fixed income yields experienced a significant downward trend in June 2026, primarily driven by announcement of tax exemption to foreign investors buying G-secs and due to fall in crude oil prices.

Overall, the risk perception in debt market has improved post the US-Iran war truce. Possible bond inclusion news may further support market sentiment. Credit growth pick-up has been strong and policy response has been supportive to growth.

The RBI measures targeting NRI deposits and covering their hedging costs for banks is expected to garner large deposits, and possibly ease CD rates for banks. The measures are also positive for liquidity conditions and may further compress risk premiums on yields in the near term. Hence, the near-term outlook is positive for debt markets.

However, we believe that a major part of the easing in yields may already be over. Hence, we recommend that investors avoid taking aggressive long-term duration calls. Investors should focus on steady carry, capital preservation and risk-adjusted returns.

In fixed income market, we like corporate bonds in the 1- to 3-year duration range. On the sovereign side, we continue to remain positive on long-dated SDLs. Hence, we recommend products in the short term, corporate bond, floating interest and banking & PSU debt category in the current scenario.

### Market Activity

The 10-year Indian benchmark bond yield settled at 6.76% on June 30, 2026, down 24 bps compared to 7.00% as on May 29, 2026.

Liquidity conditions turned from surplus to deficit during the month owing to advance tax related outflows during the month.

The 91-day T-bill yield fell 29 bps on-month to 5.24% whereas the 182-day T-bill fell 28 bps to 5.42%. (Source: CCIL)

bps – basis points; T-bill – Treasury Bill; RBI – The Reserve Bank of India; MPC – Monetary policy committee; SDL – State Development Loans. GST – Goods and services tax.

Data as on June 30, 2026. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement and any other factor which the AMC may add / delete from time to time for calculation. Debt Valuations Index is a proprietary model of ICICI Prudential AMC Ltd (the AMC) used for assessing overall debt valuations. The AMC may also use this model for other facilities / features offered by the AMC.

# iSIF Equity Long-Short Fund

An open ended equity investment strategy investing in listed equity and equity related instruments including limited short exposure in equity through derivative instruments.

## Why invest in iSIF Hybrid Long-Short Fund?

### PHILOSOPHY

Aims to generate risk adjusted returns with lower volatility

### UNIVERSE

Aims to generate returns by combining long-short equity positions, derivatives and fixed income investments

### VALUATIONS

Allocates higher in equities when the equity market valuation is low and lower when the equity market valuation is high.

### TAXATION

Enjoys LTCG rate of 12.5% with holding period more than 12 months  
LTCG – Long Term Capital Gain

The tax implications arising from the changes in the attributes of the investment strategy will be determined based on the prevailing tax laws and regulations. However, it is clarified that the tax rates applicable to the unitholders would be subject to the actual positioning of the portfolio. Investors are advised to seek professional advice from financial, tax and legal advisor before investing.

# iSIF Hybrid Long-Short Fund

# iSIF Active Asset Allocator Long-Short Fund

An interval investment strategy dynamically investing across equity, debt, equity and debt derivatives, InVITs and commodity derivatives, including limited short exposure on permitted instruments through derivatives.

By ICICI PRUDENTIAL MUTUAL FUND

## Investment Objective

The Investment Strategy intends to dynamically invest in equity and equity related securities with an aim to achieve long term capital appreciation and also invest in Debt instruments to generate regular income. The Investment Strategy can also invest in units of InVITs. The Investment Strategy can also adopt equity, debt and commodity derivative strategies.

There is no assurance that the investment objective of the Investment strategy will be achieved.

## Investment Approach

The allocation towards debt and commodities shall be dynamically managed, at times the exposure to commodities can be zero or less than 10% of NAV and maximum exposure to commodities shall be upto 30% of NAV. Exposure to exchange traded commodities of a particular good shall not exceed 10% of NAV.

#Derivatives exposure will be upto 100% & Unhedged short position will be upto 25% of net assets.

\*\*Participation of Mutual Funds in ETCDs, Multi Assets allocation schemes/Investment Strategies shall not exceed 30% of the NAV of the scheme/investment strategy and other Hybrid Schemes excluding Multi Assets allocation schemes/Investment Strategies shall not exceeding 10% of NAV of the scheme/investment strategy.

\*Please note that the investment approach will be as per ISID.

## Investment Parameters

Below mentioned are some key parameters that may be used for taking allocation calls:

This is only for illustrative purpose. The Investment Approach will be as per ISID. FI: Foreign Institutional Investors; RSI: Relative Strength Index

## Why invest in iSIF Active Asset Allocator Long-Short Fund?

|  |                                                                                                                                                                                       |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <b>PHILOSOPHY</b><br>Aims for risk adjusted returns through asset allocation and portfolio optimization                                                                               |
|  | <b>FLEXIBILITY</b><br>The investment strategy has the flexibility to shift actively between equity, debt, exchange traded commodity derivatives and InvITs based on market conditions |
|  | <b>VALUATIONS</b><br>The interval investment strategy dynamically allocates between equity, debt and commodities with philosophy of "Buy Low, Sell High"                              |
|  | <b>TAXATION</b><br>Tax efficient for investors<br>STCG: Slab Rate on investments held for up to 12 months;<br>LTCG: 12.5% tax on investments held for more than 12 months             |

## CUSTOMER ONBOARDING PROCESS – ONLINE

### Registration/Login –

A new investor can create their account on the SIF website by validating their Email ID and Mobile Number via separate OTPs. In case the user is an existing MF investor, they can reuse the same login credentials as on the MF website/i-Invest app to login to the SIF website.

### Dashboard-

After logging into the SIF website, the investor can start their folio creation from the dashboard. After their investments are processed, the investor will be able to see investment details like current value, invested value, returns and the investment breakdown across strategies on the dashboard.

### Folio Creation -

Investors are required to create a new folio for SIF investments which they can easily do from the website. New to iPrudential investors have to enter personal, bank, nominee details and submit FATCA declaration to create a folio. An existing to iPrudential investor will be nudged with his existing MF folio details which they can use to pre-fill their details in the SIF folio creation journey, thereby adding convenience to the process.

### Transaction-

From the website, an investor can carry out lumpsum and SIP transactions digitally in the various SIF strategies on offer. They can also redeem basis amount/units from the website.

## CUSTOMER ONBOARDING PROCESS – OFFLINE

### Investment Modes:

An investor can choose between investing in physical mode or online mode.

### Complete KYC:

The investor must first complete the Know Your Customer (KYC) process (incase investor is not KYC compliant) before making an investment.

### Submit Application and Payment (Physical):

After KYC compliance, the investor in physical mode needs to submit an investment application form and a cheque from their registered bank account to the nearest Asset Management Company (AMC) branch.

### Branch Review and Acknowledge:

The AMC branch reviews the application, timestamps it, and provides an acknowledgment to the investor.

### Forward to RTA:

The branch then forwards the application to the Registrar and Transfer Agent (RTA) for further validation.

### RTA Validation and Processing:

The investor must first complete the Know Your Customer (KYC) process before making an investment.

### Receive Statement of Account:

A Statement of Account is sent to the investor's registered email address after processing.

# Schedule 1: One Liner Definitions

By ICICI PRUDENTIAL MUTUAL FUND

**Macaulay Duration :**

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

**Modified Duration :**

Modified Duration is the price sensitivity and the percentage change in price for a unit change in yield.

**Total Expense Ratio :**

Total expense ratio is the percentage of net expenses that are charged by the fund. The net asset value of the fund is calculated after deducting total expense ratio.

**Average Maturity :**

Weighted Average Maturity of the assets.

**Portfolio Yield (Yield To Maturity) :**

Weighted Average valuation yield of the assets.

**Growth and Cumulative option :**

Growth and Cumulative words are used alternatively.

# Schedule 2: How To Read Factsheet

**Fund Manager :**

An employee of the asset management company such as a Investment Strategy or life insurer, who manages investments of the Investment Strategy. He is usually part of a larger team of fund managers and research analysts.

**Application Amount for Fresh Subscription :**

This is the minimum investment amount for a new investor in a Investment Strategy.

**Minimum Additional Amount :**

This is the minimum investment amount for an existing investor in a Investment Strategy.

**Yield to Maturity :**

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

**SIP :**

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

**NAV :**

The NAV or the net asset value is the total asset value per unit of the Investment Strategy after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the Investment Strategy.

**Benchmark :**

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of s, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

**Exit Load :**

Exit load is charged at the time an investor redeems the units of a . The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs.100 and the exit load is 1%, the investor will receive Rs.99

**Macaulay Duration :**

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

**Net Equity :**

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

**AUM :**

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a Investment Strategy or any investment firm.

**Holdings :**

The holdings or the portfolio is a Investment Strategy latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

**Nature of Investment Strategy :**

The investment objective and underlying investments determine the nature of the Investment Strategy. For instance, a Investment Strategy that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a Investment Strategy that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

**Rating Profile :**

Investment Strategys invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the Investment Strategy in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

# Statutory Details & Risk Factors

By ICICI PRUDENTIAL MUTUAL FUND

## Statutory Details & Risk Factors

Please note that the Risk-Band(s) specified above will be evaluated and updated on a monthly basis

**YTM** : Yield to maturity should not be construed as minimum return offered by Investment Strategy. Yield to Maturity for holding Additional Tier 1 Bonds and Tier 2 Bonds issued by Banks is computed based on Yield used for valuation for such Securities. Annualized Yield to Maturity converts instrument coupon into annualized format wherein the coupons are paid on a semi-annualized basis.
