Note: The Due Diligence Certificate dated May 15, 2025, was submitted to SEBI.

SECTION II. INFORMATION ABOUT THE SCHEME

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation under the scheme shall be as follows:

Instruments	Indicative allocation (% of total assets)	
	Minimum	Maximum
Money Market Instruments	70%	100%
Debt Instruments	0%	30%

Note – In terms of paragraph 12.6 of the Master Circular, ICICI Prudential Liquid Fund shall make investments in / purchase debt and money market securities with maturity of up to 91 days only.

The Margin may be placed in the form of such securities / instruments / deposits as may be permitted/eligible to be placed as margin from the assets of the Scheme. The securities / instruments / deposits so placed as margin shall be classified under the applicable category of assets for the purposes of asset allocation.

The Cumulative Gross Exposure across Debt and Money Market, Derivatives and such other securities/assets as may be permitted by SEBI should not exceed 100% of the net assets of the scheme.

Exposure to various instruments will be as per the indicative table given below (Below percentages shall be subject to applicable SEBI circulars):

Sr No.	Type of Instrument	% of exposure	Circular References
1.	Securitized Debt	Up to 50% of net assets	Paragraph 12.11 of the Master Circular
2.	Stock lending	NA	NA
3.	Overseas securities	NA	NA
4.	Derivatives	Upto 100 % of the net assets	Paragraph 12.25 of the Master Circular
4(a)	Equity Derivatives for hedging purpose	-	
4(b)	Equity Derivatives for non-hedging purpose	-	
4(c)	Debt Derivatives for hedging/non hedging purpose	Upto 100 % of the net assets	
5	Units of REITS & INVITS	NIL	Not Applicable
6	AT1 and Tier II Bonds	NIL	Not Applicable
7	Structured Obligations and Credit Enhancements	NIL	Not Applicable

Rebalancing due to Short Term Defensive Consideration:

- Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive

considerations as per Para 1.14.1.2.b of the Master Circular and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches:

- Further, as per Para 2.9 of the Master Circular, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in Para 2.9 of the Master Circular.

The securities mentioned in the asset allocation pattern could be listed, unlisted, privately placed, secured or unsecured, rated or unrated and of any maturity. The securities may be acquired through secondary market purchases, Public Offering, other public offers, Private Placement, right offers (including renunciation) and negotiated deals.

In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with relevant paragraph of the Master Circular pertaining to Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

For calculation of asset allocation limits of the scheme in terms of Part IV of Chapter 2 on 'Categorization and Rationalization of Mutual Fund Schemes' of the Master Circular, investment in units of CDMDF shall be excluded from base of net assets.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. AMFI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government

Securities

Apart from the above investment restrictions, the Scheme may follow certain internal norms vis-à-vis limiting exposure to scrips, sectors etc., within the above mentioned restrictions, and these are subject to review from time to time.

Negative list: The Scheme will not invest/ have exposure in the following:

Sr. No	Particulars
1.	Short selling
2.	Stock Lending
3.	Overseas securities
4.	AT1 and Tier II Bonds
5.	Units of REITS and INVITS
6.	Structured Obligations and Credit Enhancements

B. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

- 1) Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 2) Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 3) Fixed Income Securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee
- 4) Corporate debt (of both public and private sector undertakings)
- 5) Securities of banks (both public and private sector) including term deposit with the banks as permitted by SEBI/RBI from time to time and development financial institutions
- 6) Money market instruments as permitted by SEBI/RBI;
- 7) Certificate of Deposits (CDs)
- 8) Commercial Paper (CPs)
- 9) Securitised Debt
- 10) The non-convertible part of convertible securities
- 11) Debt instruments with special features including Tier I and Tier II bonds
- 12) Any other domestic fixed income securities as permitted by SEBI / RBI from time to time (including debt securities issued by REITs and INVITs).
- 13) Derivative instruments like Interest Rate Swaps, Forward Rate Agreements and such other derivative instruments permitted by SEBI/RBI from time to time.
- 14) Repo transactions in Corporate debt securities

The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per the guidelines and regulations applicable to such transactions.

The inter Scheme transfer of investments shall be in accordance with the provisions contained in paragraph 12.30 of the Master Circular pertaining to Inter-Scheme transfer of investments.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme aims to identify securities which offer optimal level of yields/returns, considering risk-reward ratio. An appropriate mix of debt market securities and money market securities will be used to achieve this. The scheme will invest in Debt and money market securities with maturity of up to 91 days only. Money Market securities include cash and cash equivalents. Further, the Scheme shall follow an active investment strategy.

With the aim of controlling risks, rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the Risk Management team of the AMC. The credit evaluation includes a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer, the short as well as longer-term financial health of the issuer.

The AMC may consider the ratings of such Rating Agencies as approved by SEBI to carry out the functioning of rating agencies. In addition, the investment team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

Further, the Scheme may invest in other schemes managed by the AMC or in the Schemes of any other Mutual Funds, provided it is in conformity with the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.

The Scheme may use derivative instruments like Interest Rate Swaps, Interest Rate Futures, Forward Rate Agreements or other derivative instruments for the purpose of hedging, portfolio balancing and other purposes, as permitted under the Regulations. Hedging using Interest Rate Futures could be perfect or imperfect, subject to applicable regulations. Usage of derivatives may expose the Scheme to certain risks inherent to such derivatives.

For complete details on 'Derivative Strategies' kindly refer to SAI.

It may also invest in securitized debt.

For the present, the Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so with the prior approval of the Board of the AMC/Trustee.

The Scheme may undertake repo transactions in corporate debt securities in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed.

The inter Scheme transfer of investments and Investment limits for investing in HFCs shall be in accordance with guidelines as stated in paragraph 12.30 and 12.9 of the master circular for inter Scheme transfer and Prudential limits in sector exposure for Housing Finance Companies, respectively.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark of the scheme is CRISIL Liquid Debt A-I Index.

The composition of the benchmark is such that, it is most suited for comparing performance of the Scheme.

The benchmark of the Scheme has been changed from CRISIL Liquid Debt B-I Index To CRISIL Liquid Debt A-I Index with effect from March 12, 2024.

The Trustees reserves the right to change the benchmark in future, if a benchmark better suited to the investment objective of the Scheme is available.

G. HOW HAS THE SCHEME PERFORMED?

Returns of the Scheme for Growth Option and its benchmark as March 31, 2025:

Period	ICICI Prudential Liquid Fund - Regular	CRISIL Liquid Debt A-I Index (Benchmark)	ICICI Prudential Liquid Fund - Direct	CRISIL Liquid Debt A-I Index (Benchmark)
Last 1 Year	7.31	7.24	7.41	7.24
Last 3 Year	6.68	6.75	6.78	6.75
Last 5 Year	5.39	5.51	5.49	5.51
Since Inception	7.14	6.81	6.88	6.77
Inception Date	17-11-2005		01-01-2013	

The date of inception of the Scheme is November 17, 2005, however the direct plan under the scheme was being offered since January 1, 2013. Thus the returns of direct plan is computed for period starting Jan 1, 2013.

Past performance may or may not be sustained in the future and the same may not necessarily provide the basis for comparison with other investment. The returns are calculated on the basis of Compounded Annualized Growth returns (CAGR). For computation of since inception returns the allotment NAV has been taken as Rs. 100. The benchmark of the Scheme has been changed from CRISIL Liquid Debt B-I Index To CRISIL Liquid Debt A-I Index with effect from March 12, 2024.

^ Inception date shown is the date from which units under the Scheme are available throughout.

Absolute returns of the Scheme (Growth Option) for the last five financial years:

Past performance may or may not be sustained in future. Absolute returns are provided for the above mentioned financial years. For computation of returns the allotment NAV has been taken as Rs. 100. NAV is considered for computation of returns without considering load.

vi. INVESTMENT OF THE AMC IN THE SCHEME

From time to time and subject to the SEBI (Mutual Funds) Regulations, 1996, the sponsors, the mutual funds and investment Companies managed by them, their associate companies, subsidiaries of the sponsors and the AMC may invest in either directly or indirectly in the Scheme. The funds managed by these associates and/ or the AMC may acquire a substantial portion of the Scheme. Accordingly, redemption of units held by such funds, associates and sponsors may have an adverse impact on the units of the Scheme because the timing of such redemption may impact the ability of other unit holders to redeem their units. The details of such investments of the AMC can be accessed at the following link:

[Statutory Disclosure \(icicipruamc.com\)](http://icicipruamc.com)

PART III. OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time and as stipulated in the Valuation Policy and Procedures of the Fund, provided in SAI.

The NAV of the Scheme shall be rounded off up to four decimals.

NAV of units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No. of Units outstanding under Scheme}}$$

The NAV of the Scheme will be calculated as of the close of every Business Day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration on computation of NAV:

If the net assets of the Scheme are Rs.10,45,34345.34 and units outstanding are 10,000,000, then the NAV per unit will be computed as follows:

10,45,34,345.34 / 10,000,000 = Rs. 10.4534 p.u. (rounded off to four decimals)

For further details, such as policies with respect to computation of NAV, rounding off, valuation of investment in foreign securities, procedure in case of delay in disclosure of NAV etc, please refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSE - Not Applicable

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 2% of the daily net assets of the scheme will be charged to the scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund. In case of any change in the expense ratio, the AMC would update the current expense ratios on the website at least three working days prior to the effective date of the change. The requirement for disclosing such change would be subject to paragraph 10.1.8 of the Master Circular. Investor can refer [Total Expense Ratio of Mutual Fund Schemes \(icicipruamc.com\)](http://icicipruamc.com) for details.

Annual Scheme Recurring Expenses:

Particulars	ICICI Prudential Liquid Fund % per annum of net assets
Investment Management and Advisory Fees	Up to 2.00
Audit fees/fees and expenses of trustees	
Custodian Fees	
Registrar & Transfer Agent Fees including cost of providing account statements / IDCW / redemption cheques/ warrants	
Marketing & Selling Expenses including Agents Commission and statutory advertisement	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and IDCW redemption cheques and warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (at least 2 bps)	
Brokerage & transaction pertaining to distribution of units	
Goods and Services tax on expenses other than investment and advisory fees	
Goods and Services tax on brokerage and transaction cost	
Other Expenses*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c)	Up to 2.00
Additional expenses under regulation 52 (6A) (c)* (more specifically elaborated below)	Up to 0.05

Additional expenses for gross new inflows from specified cities* (more specifically elaborated below)	Up to 0.30
The aforesaid does not include Goods and Services tax on investment management and advisory fees. The same is more specifically elaborated below.	

The returns of the Direct Plan for the Scheme shall be exclusive of distributor commission.

*As permitted under the Regulation 52 of SEBI (MF) Regulations, 1996 and pursuant to paragraph 15.10.1 of the Master Circular SEBI (Mutual Funds) Second Amendment Regulations, 2012 and SEBI (Mutual Funds) (Fourth Amendment) Regulations 2018.

The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the Scheme will bear.

ICICI Prudential Liquid Fund -Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc as compared to ICICI Prudential Liquid Fund and no commission for distribution of Units will be paid/ charged under ICICI Prudential Liquid Fund- Direct Plan.

All fees and expenses charged in a Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in other than Direct Plan.

The Scheme can charge expenses within overall maximum limits prescribed under SEBI (MF) Regulations, without any internal cap allocated to any of the expense heads specified in the above table.

Types of expenses charged shall be as per the SEBI (Mutual Fund) Regulation, 1996.

As per the Regulations, the maximum recurring expenses that can be charged to debt Schemes shall be subject to a percentage limit of daily net assets as in the table below:

First Rs. 500 crore	Next Rs. 250 crore	Next Rs. 1,250 crore	Next Rs. 3,000 crore	Next Rs. 5,000 crore	Next Rs.40,000 crores	Balance
2.00%	1.75%	1.50%	1.35%	1.25%	TER reduction of 0.05% for every increase of Rs. 5,000 crore of daily net assets or part thereof	0.80%

The above excludes additional expenses that can be charged towards: i) 5 bps under the Regulation 52(6A)(c), ii) 30 bps for gross new inflows from specified cities and iii) Goods and Services tax on investment management and advisory fees. The same is more specifically elaborated below.

Pursuant to paragraph 15.10.1 of the Master Circular and SEBI (Mutual Funds) (Fourth Amendment) Regulations 2018 following additional costs or expenses may be charged to the scheme, namely:

(i) The AMC may charge Goods and Services tax on investment and advisory fees to the schemes of the Fund in addition to the maximum limit of total expenses ratio as prescribed in Regulation 52 of the Regulations, whereas Goods and Services tax on other than investment and advisory fees, if any, shall be borne by the schemes within the maximum limit as per regulation 52 of the Regulations.

(ii) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from retail investors from B30 cities as specified by the Securities and Exchange Board of India, from time to time are at least –

- 30 per cent of the gross new inflows from retail investors from B30 cities into the scheme, or;
- 15 per cent of the average assets under management (year to date) of the scheme,

whichever is higher;

Provided that if inflows from retail investors from B30 cities are less than the higher of the above, such expenses on daily net assets of the scheme shall be charged on proportionate basis;

Provided further that expenses charged under this paragraph shall be utilised for distribution expenses incurred for bringing inflows from retail investors from B30 cities;

Provided further that amount incurred as expense on account of inflows from retail investors from B30 cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

The AMC would charge expenses for B30 in accordance with the clarifications received from SEBI/AMFI from time to time.

For the above purposes, 'B30 cities' shall be beyond Top 30 cities as at the end of the previous financial year as communicated by AMFI.

For above purposes, retail investors would mean individual investors from whom inflows into the Scheme amount upto Rs. 2,00,000/- per transaction.

Note - SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 and AMFI letter dated No. 35P/ MEM-COR/ 85-a/ 2022-23 dated March 02, 2023 has directed AMCs to keep B-30 incentive structure in abeyance with effect from March 01, 2023 till further notice.

(iii) Additional expenses, incurred towards different heads mentioned under sub-regulations (2) and (4) of Regulation 52 of the Regulations, not exceeding 0.05 per cent of daily net assets of the scheme. However, such additional expenses will not be charged if exit load is not levied or not applicable to the Scheme.

At least 2 basis points on daily net assets within the maximum limit of overall expense Ratio shall be annually set apart for investor education and awareness initiatives. The same shall be within limits specified under Regulation 52 of the SEBI (Mutual Funds) Regulation.

Brokerage and transaction cost incurred for the purpose of execution of trade shall be charged to the schemes as provided under Regulation 52 (6A) (a) upto 12 bps and 5 bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction costs, over and above the said 12 bps and 5 bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52.

Expenses shall be charged / borne in accordance with the Regulations prevailing from time to time.

The following is an illustration of the impact of expense ratio on the scheme's returns:

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year	10,000	10,000
Returns before Expenses	1,500	1,500
Expenses other than Distribution Expenses	150	150
Distribution Expenses	50	-
Returns after Expenses at the end of the Year	1300	1350

For calculating expense of ICICI Prudential Liquid Fund - Direct Plan, distribution expense will not be considered.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.icicipruamc.com) or your distributor.

Type of Load	Load chargeable (as % of NAV)																
Exit Load	Exit Load shall be levied on investors within 7 days of their investment in the scheme on graded basis as under: <table border="1"> <tr> <th>Day at which investor exits from the scheme from date of allotment</th><th>Exit Load as a % of redemption proceeds</th></tr> <tr> <td>Day 1</td><td>0.0070%</td></tr> <tr> <td>Day 2</td><td>0.0065%</td></tr> <tr> <td>Day 3</td><td>0.0060%</td></tr> <tr> <td>Day 4</td><td>0.0055%</td></tr> <tr> <td>Day 5</td><td>0.0050%</td></tr> <tr> <td>Day 6</td><td>0.0045%</td></tr> <tr> <td>Day 7 onwards</td><td>0.0000%</td></tr> </table>	Day at which investor exits from the scheme from date of allotment	Exit Load as a % of redemption proceeds	Day 1	0.0070%	Day 2	0.0065%	Day 3	0.0060%	Day 4	0.0055%	Day 5	0.0050%	Day 6	0.0045%	Day 7 onwards	0.0000%
Day at which investor exits from the scheme from date of allotment	Exit Load as a % of redemption proceeds																
Day 1	0.0070%																
Day 2	0.0065%																
Day 3	0.0060%																
Day 4	0.0055%																
Day 5	0.0050%																
Day 6	0.0045%																
Day 7 onwards	0.0000%																

Any redemption/switch arising out of excess holding by an investor beyond 25% of the net assets of the Scheme in the manner envisaged paragraph 6.11 of the Master Circular, such redemption / switch will not be subject to exit load.

The exit load charged, if any, shall be credited back to the respective scheme. Goods and Services tax on exit load shall be paid out of the exit load proceeds and exit load net of Goods and Services tax shall be credited to the Scheme.

Exit Load, if any, prevailing on the date of enrolment of SIP/STP shall be levied in the Scheme.

Units issued on reinvestment of IDCW shall not be subject to exit load.

The investor is requested to check the prevailing load structure of the Scheme before investing.

Subject to the Regulations, the Trustee reserves the right to modify/alter the load structure on the Units subscribed/redeemed on any Business Day. At the time of changing the load structure, the AMC / Mutual Fund may adopt the following procedure:

- i. The addendum detailing the changes will be attached to Scheme Information Documents and key information memorandum. The addendum will be circulated to all the distributors/brokers so that the same can be attached to all Scheme Information Documents and key information memoranda already in stock.
- ii. Arrangements will be made to display the addendum in the Scheme Information Document in the form of a notice in all the investor service centres and distributors/brokers office.
- iii. The introduction of the exit load along with the details will be stamped in the acknowledgement slip issued to the investors on submission of the application form and will also be disclosed in the statement of accounts issued after the introduction of such load.
- iv. A public notice shall be provided on the website of the AMC in respect of such changes.

Any imposition or enhancement in the load shall be applicable on prospective investments only.

SECTION II

I. Introduction

A. Definitions

Definition for the words and expressions used in the SID are available at the following link : [SID related information \(icicipruamc.com\)](http://icicipruamc.com)

The words and expressions shall have the meaning as specified at the above link, unless the context otherwise requires.

B. Risk Factors

I. Standard Risk Factors: Please refer to SAI.

II. Scheme specific risk factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.

Risk associated with investment in fixed income and money market securities

- **Market Risk/Interest Rate Risk:** The Net Asset Value (NAV) of the Scheme, to the extent invested in fixed income and money market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- **Liquidity Risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.
- **Credit Risk:** Investments in fixed income securities and money market instruments are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- **Price Risk:** Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows

received from the securities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

- **Regulatory Risk:** Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.
- **Risks associated with investment in unlisted securities:** Except for any security of an associate or group company, the scheme(s) have the power to invest in securities which are not listed on a stock exchange or receive unlisted securities which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. These securities may lack a liquid secondary market and there can be no assurance that the scheme will realise their investments in unlisted securities at a fair value.
- **Settlement risk:** The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme’s portfolio due to the extraneous factors that may impact liquidity would result, at times, in potential losses to the Scheme.
- **Different types of fixed income securities in which the Scheme(s) would invest as given in the Scheme Information Document carry different levels and types of risk.** Accordingly, the Scheme(s) risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.
- The Scheme(s) at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

Risk associated with investing in units of mutual funds

The Scheme may make investments in units of mutual funds. Investments in schemes of mutual funds are subject to market risks and there is no assurance or guarantee that the objectives of the scheme will be achieved. Further, any investment in mutual fund scheme is also subject to risk factors outlined in the offer document of the mutual fund scheme and an adverse performance of a mutual fund scheme in which the scheme has made investments could adversely impact the scheme’s performance and NAV of the scheme.

Risk associated with investment in Derivatives

1. The Schemes may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
2. The Scheme may use derivatives instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Schemes to certain risks inherent to such derivatives.
3. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
4. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value.
5. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.
6. The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:
 - The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
 - Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place
 - Basis Risk: This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying asset being hedged
 - Exchanges could raise the initial margin, variation margin or other forms of margin on derivative contracts, impose one sided margins or insist that margins be placed in cash. All of these might force positions to be unwound at a loss, and might materially impact returns.
 - The derivative contracts at times are undertaken with various counterparties. These counterparties may not be able to meet the obligations under such derivative contracts. This would lead to credit risk in derivative transactions, Hence, derivative trades are undertaken with approved counterparties or through exchanges. This mitigates credit risk on derivative transactions.

Risk with respect to imperfect hedging using interest rate futures

An Interest Rate Futures is an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today. Interest Rate Futures are Exchange traded. These future contracts are cash settled.

1. Perfect Hedging means hedging the underlying using IRF contract of same underlying.
2. Imperfect hedging means the underlying being hedged and the IRF contract has correlation of closing prices of more than 90%.

In case of imperfect hedging, the portfolio can be a mix of:

- 1) Corporate Bonds and Government securities or
- 2) Only Corporate debt securities or
- 3) Only government securities with different maturities

Risk associated with imperfect hedging includes:

- **Basis Risk:** The risk arises when the price movements in derivative instrument used to hedge the underlying assets does not match the price movements of the underlying assets being hedged. Such difference may potentially amplify the gains or losses, thus adding risk to the position.
- **Price Risk:** The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- **Risk of mismatch between the instruments:** The risk arises if there is a mismatch between the prices movements in derivative instrument used to hedge, compared to the price movement of the underlying assets being hedged. For example, when IRF which has government security as underlying is used, to hedge a portfolio that contains corporate debt securities.
- **Correlation weakening and consequent risk of regulatory breach:** SEBI Regulation mandates minimum correlation criterion of 0.9 (calculated on a 90 day basis) between the portfolio being hedged and the derivative instrument used for hedging. In cases where the correlation falls below 0.9, a rebalancing period of 5 business days has been permitted. Inability to satisfy this requirement to restore the correlation level to the stipulated level, within the stipulated period, due to difficulties in rebalancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value.

Risk associated with investment in Securitized Debt

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, microfinance companies or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers. Generally available asset classes for securitization in India are:

- Commercial vehicles
- Auto and two wheeler pools
- Mortgage pools (residential housing loans)

- Personal loan, credit card and other retail loans
- Corporate loans/receivables
- Microfinance receivables

In pursuance to SEBI communication dated: August 25, 2010, given below are the requisite details relating to investments in Securitized debt.

- Risk profile of securitized debt vis-à-vis risk appetite of the scheme:

The Scheme aims to provide reasonable returns to investors with a long-term investment horizon.. Securitized debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity which would match with the long-term investment horizon of these investors. Investment in these instruments may help the fund in aiming at reasonable returns. These returns come with a certain degree of risks which are covered separately in the Scheme Information Document. Accordingly, the medium risk profile of the securitized debt instruments matches that of the prospective investors of these schemes.

- Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.
 - Risk mitigation strategies for investments with each kind of originator
- For a complete understanding of the policy relating to selection of originators, the AMC has first analysed below risks attached to a securitization transaction.

In terms of specific risks attached to securitization, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher, which helps in making their overall risks comparable to other AAA/AA rated asset classes.

The Scheme may invest in securitized debt assets. These assets would be in the nature of Asset Backed Securities (ABS) and Mortgage Backed Securities (MBS) with underlying pool of assets and receivables like housing loans, auto loans and single corporate loan originators. The Scheme intends to invest in securitized instruments rated AAA/AA by a SEBI recognized credit rating agency.

Before entering into any securitization transaction, the risk is assessed based on the information generated from the following sources:

- (1) Rating provided by the rating agency
- (2) Assessment by the AMC

(1) Assessment by a Rating Agency

In its endeavor to assess the fundamental uncertainties in any securitization transaction, a credit rating agency normally takes into consideration following

factors:

- **Credit Risk**

Credit risk forms a vital element in the analysis of securitization transaction. Adequate credit enhancements to cover defaults, even under stress scenarios, mitigate this risk. This is done by evaluating following risks:

- Asset risk
- Originator risk
- Portfolio risk
- Pool risks

The quality of the pool is a crucial element in assessing credit risk. In the Indian context, generally, pools are 'cherry-picked' using positive selection criteria. To protect the investor from adverse selection of pool contracts, the rating agencies normally take into consideration pool characteristics such as pool seasoning (seasoning represents the number of installments paid by borrower till date: higher seasoning represents better quality), over dues at the time of selection and Loan to Value (LTV). To assess its risk profile vis-à-vis the overall portfolio, the pool is analyzed with regard to geographical location, borrower profile, LTV, and tenure.

- **Counterparty Risk**

There are several counterparties in a securitization transaction, and their performance is crucial. Unlike in the case of credit risks, where the risks emanate from a diversified pool of retail assets, counterparty risks result in either performance or non-performance. The rating agencies generally mitigate such risks through the usage of stringent counterparty selection and replacement criteria to reduce the risk of failure. The risks assessed under this category include:

- Servicer risk
- Commingling risk
- Miscellaneous other counterparty risks

- **Legal Risks**

The rating agency normally conducts a detailed study of the legal documents to ensure that the investors' interest is not compromised and relevant protection and safeguards are built into the transaction.

- **Market Risks**

Market risks represent risks not directly related to the transaction, but other market related factors, stated below, which could have an impact on transaction performance, or the value of the investments to the investors.

- Macro-economic risks
- Prepayment risks
- Interest rate risks

➤ **Other Risks associated with investment in securitized debt and mitigation measures:**

- **Limited Liquidity and Price Risk**

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

Risk Mitigation: Securitized debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity. The liquidity risk and HTM nature is taken into consideration at the time of analyzing the appropriateness of the securitization.

- **Limited Recourse, Delinquency and Credit Risk**

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However, many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

Risk Mitigation: In addition to careful scrutiny of credit profile of borrower/pool, additional security in the form of adequate cash collaterals and other securities may be obtained to ensure that they all qualify for similar rating.

- **Risks due to possible prepayments: Weighted Tenor / Yield**

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances;

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

Risk Mitigation: A certain amount of prepayments is assumed in the calculations at the time of purchase based on historical trends and estimates. Further a stress case estimate is calculated and additional margins are built in.

- **Bankruptcy of the Originator or Seller**

If originator becomes subject to bankruptcy proceedings and the court in the

bankruptcy proceedings concludes that the sale from originator to Trust was not a sale, then an Investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

Risk Mitigation: Normally, specific care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'. It is also in the interest of the originator to demonstrate the transaction as a true sell to get the necessary revenue recognition and tax benefits.

- **Bankruptcy of the Investor's Agent**

If Investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent. Legal opinion is normally obtained to the effect that the Investors Agent's recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

Risk Mitigation: All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent.

- **Risk of Co-mingling**

With respect to the Certificates, the Servicer will deposit all payments received from the Obligor into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

(2) Assessment by the AMC

- **Track record**

The AMC ensures that there is adequate past track record of the Originator before selection of the pool including a detailed look at the number of issuances in past, track record of issuances, experience of issuance team, etc.

- **Willingness to pay**

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank, guarantee etc. is obtained, as a risk mitigation measure.

- **Ability to pay**

This assessment is based on a strategic framework for credit analysis, which entails a detailed financial risk assessment.

Management analysis is used for identifying company specific financial risks. One of the most important factors for assessment is the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer's financial statements is undertaken to review its ability to undergo stress on cash flows and asset quality. Business risk assessment, wherein following factors may be considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition, a detailed review and assessment of rating rationale is done including interactions with the company as well as agency

➤ **Critical Evaluation Parameters (For Pool Loan and Single Loan Securitization Transactions)**

Typically, the AMC would avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if there are concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of re-schedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

Table below illustrates the framework that may be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics/Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools	Personal Loans

Approximate Average maturity (in Months)	36-120 months	12- 60 months	12-60 months	15-48 months	15-80 weeks	5 months -3 years
Collateral margin (including cash ,guarantees, excess interest spread , subordinate tranche)	3-10%	4-12%	4-13%	4-15%	5-15%	5-15%
Average Loan to Value Ratio	75%-95%	80%-98%	75%-95%	70%-95%	Unsecured	Unsecured
Average seasoning of the Pool	3-5 months	3-6 months	3-6 months	3-5 months	2-7 weeks	1-5 months
Maximum single exposure range	4-5%	3-4%	NA (Retail Pool)	NA (Retail Pool)	NA (Very Small Retail loan)	NA (Retail Pool)
Average single exposure range %	0.5%-3%	0.5%-3%	<1% of the Fund size	<1% of the Fund size	<1% of the Fund size	<1% of the Fund size

Notes:

1. Retail pools are the loan pools relating to Car, 2 wheelers, micro finance and personal loans, wherein the average loan size is relatively small and spread over large number of borrowers.
2. Information illustrated in the Tables above, is based on the current scenario relating to Securitized Debt market and is subject to change depending upon the change in the related factors.
3. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments
4. Majority of our securitized debt investments shall be in asset backed pools wherein the AMC may have underlying assets as Medium and Heavy Commercial Vehicles, Light Commercial Vehicles (LCV), Cars, and Construction Equipment etc. Where the AMC invests in Single Loan Securitization, as the credit is on the underlying issuer, the AMC focuses on the credit review of the borrower.

In addition to the framework as per the table above, the AMC also take into account following factors, which are analyzed to ensure diversification of risk and measures identified for less diversified investments:

- Size of the Loan
- Average Original Maturity of the Pool
- Delinquency Distribution
- Geographical Distribution
- Loan to Value Ratio
- Average seasoning of the pool

- **Risk Tranching**

Typically, the AMC may avoid investing in mezzanine debt or equity of Securitized debt in the form of sub ordinate tranche, without specific risk mitigant strategies / additional cash / security collaterals/ guarantees, etc.

- **The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund**

Investments made by the scheme in any asset are done based on the requirements of the scheme and is in accordance with the investment policy. All Investments are made entirely at an arm's length basis with no consideration of any existing / consequent investments by any party related to the transaction (originator, issuer, borrower etc.). Investments made in Securitized debt are made as per the Investment pattern of the Scheme and are done after detailed analysis of the underlying asset. There might be instances of Originator investing in the same scheme but both the transactions are at arm's length and avoid any conflict of interest.

- **In general, the resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt**

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is similar to any other credit. The investments in securitized debt are done after appropriate research. The ratings are monitored for any movement.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

Risk associated with investment in Perpetual Debt Instrument (PDI)

Perpetual Debt instruments are issued by Banks, non-banking financial institutions (NBFCs) and corporates to improve their capital profile. Some of the PDIs issued by Banks which are governed by the Reserve Bank of India (RBI) guidelines for Basel III Capital Regulations are referred to as Additional Tier I (AT1 bonds). RBI regulations also apply to PDIs issued by NBFC. However, there are no regulatory guidelines for issuance of PDIs by corporate bodies. The instruments are treated as perpetual in nature as there is no maturity date. The key risks associated with these instruments are highlighted below:

Risk associated with coupon servicing

- **Banks**

As per the terms of the instruments, Banks may have discretion at all times to cancel distributions/payment of coupons. In the event of non-availability of adequate distributable reserves and surpluses or inadequacy in terms of capital requirements, RBI may not allow banks to make payment of coupons.

- **NBFCs**

While NBFCs may have discretion at all times to cancel payment of coupon, coupon may also be deferred (instead of being cancelled), in case paying the coupon leads to breach of capital ratios.

- **Corporates**
Corporates usually have discretion to defer the payment of coupon. However, the coupon is usually cumulative and any deferred coupon shall accrue interest at the original coupon rate of the PDI.

Risk associated with write-down or conversion into equity

- **Banks**
AT1 Bonds could be written down or converted to common equity, at the discretion of RBI, in the event of non-maintenance of capital adequacy ratios and/or Point of Non Viability Trigger (PONV). Minimum capital adequacy ratio requirements would be as per Basel III regulations. PONV is a point, determined by RBI, when a bank is deemed to have become non-viable unless appropriate measures are taken to revive its operations. Further Tier II bonds issued under Basel III, having a fixed maturity date, are also liable to be written down or converted to common equity under the aforesaid event of PONV. This risk is not applicable in case of NBFCs and Corporates.

Risk associated with instrument not being called by the Issuer

- **Banks**
The issuing banks have an option to call back the instrument after minimum period as per the regulatory requirement from the date of issuance and specified period thereafter, subject to meeting the RBI guidelines. However, if the bank does not exercise the call on first call date, the Scheme may have to hold the instruments for a period beyond the first call exercise date.
- **NBFCs**
The NBFC issuer has an option to call back the instrument after minimum period as per the regulatory requirement from date of issuance and specified period thereafter, subject to meeting the RBI guidelines. However, if the NBFC does not exercise the call option the Scheme may have to hold the instruments for a period beyond the first call exercise date.
- **Corporates**
There is no minimum period for call date. However, if the corporate does not exercise the call option, the Scheme may have to hold the instruments for a period beyond the call exercise date.

Risk associated with investment in Gilt Securities

Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to government securities but is true for all fixed income securities. The default risk however, in respect of Government securities is zero. Therefore, their prices are influenced only by movement in interest rates in the financial system. On the other hand, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced by credit standing of the issuer as well as the general

level of interest rates.

Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

Risk associated with repo transactions in corporate debt securities

- Lending transactions

The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo lending transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.

- Borrowing transactions

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation.

Risk associated with investment in Tri Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.

CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”.

As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

➤ **Risk associated with creation of segregated portfolios**

- **Liquidity risk** – A segregated portfolio is created when a credit event occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.

Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 business days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. There is no assurance that a deep secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them.

- **Valuation risk** – The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

C. Risk Mitigation Strategies

The Scheme by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Scheme has identified following risks of investing in debt securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

<u>Risks associated with Debt investment</u>	
<u>Market Risk/ Interest Rate Risk</u> As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The schemes will undertake the active portfolio management as per the investment objective to reduce the market risk. In a rising interest rates scenario the scheme may increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity may be increased thereby mitigating risk to that extent.
<u>Liquidity or Marketability Risk</u> This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).	The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds.
<u>Credit Risk</u> Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken.
<u>Reinvestment Risk</u> This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which may be a very small portion of the portfolio value.

Derivatives Risk

As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The Scheme may invest in derivative for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations. Interest Rate Swaps will be done with approved counter parties under pre-approved ISDA agreements or through recognized trading platforms. Interest rate swaps and other derivative instruments will be used as per local (RBI and SEBI) regulatory.

Liquidity Risk Management Framework:

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC has put in place the Liquidity Risk Management Framework which monitors the liquidity risk. As per the prescribed guidelines, the liquidity ratios are calculated and liquid assets are maintained on a daily basis at scheme level for all open-ended schemes (except Overnight Fund, Gilt Fund and Gilt Fund with 10-year constant duration). These ratios address the potential liquidity risk scenarios upto 99% confidence interval. The guidelines also outline the action plan in case there is a difference between actual outcome and projected outcome. Further, the AMC monitors asset-liability mismatch requirement which addresses potential liquidity requirement over a 90-day period and relevant asset side liquidity to be maintained as prescribed by the SEBI circular.

Stress testing:

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC carries out stress testing for all open ended debt schemes (except overnight scheme). Stress testing covers impact on the scheme NAV on account of interest rate risk, credit risk and liquidity risk

II. Information about the scheme:**A. Where will the scheme invest?**

Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

- 1) Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 2) Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)

- 3) Fixed Income Securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee
- 4) Corporate debt (of both public and private sector undertakings)
- 5) Securities of banks (both public and private sector) including term deposit with the banks as permitted by SEBI/RBI from time to time and development financial institutions
- 6) Money market instruments as permitted by SEBI/RBI;
- 7) Certificate of Deposits (CDs)
- 8) Commercial Paper (CPs)
- 9) Securitised Debt
- 10) The non-convertible part of convertible securities
- 11) Debt instruments with special features including Tier I and Tier II bonds
- 12) Any other domestic fixed income securities as permitted by SEBI / RBI from time to time (including debt securities issued by REITs and INVITs).
- 13) Derivative instruments like Interest Rate Swaps, Forward Rate Agreements and such other derivative instruments permitted by SEBI/RBI from time to time.
- 14) Repo transactions in Corporate debt securities
- 15) Units of Mutual Fund Schemes
- 16) Investment in units of CDMDF: In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with the relevant paragraph of SEBI Master circular pertaining to Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM in the units of CDMDF (AIF units)

The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per the guidelines and regulations applicable to such transactions.

The inter Scheme transfer of investments and Investment limits for investing in HFCs shall be in accordance with the guidelines as stated in paragraph 12.30 and 12.9 of the master circular for inter Scheme transfer and Prudential limits in sector exposure for Housing Finance Companies, respectively.

POSITION OF DEBT MARKET IN INDIA

There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitised Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes upto sixty years and more (perpetual). Perpetual bonds are issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers.

The yields and liquidity on various securities as on March 31, 2025 are as under:

Issuer	Instrument	Maturity	Yields (%)	Liquidity
GOI	Treasury Bill	91 Days	6.34%	High
GOI	Treasury Bill	364 Days	6.40%	High
GOI	Short Dated	1-3 Years	6.40% - 6.44%	High
GOI	Medium Dated	3-5 Years	6.44% - 6.45%	High
GOI	Long Dated	5-10 Years	6.45% - 6.58%	High
Corporates	Taxable Bonds (AAA)	1-3 Years	7.29% - 7.11%	Medium
Corporates	Taxable Bonds (AAA)	3-5 Years	7.11% - 7.11%	Low to Medium
Corporates	CDs (A1+)	3 months	7.00%	Medium to High
Corporates	CPs (A1+)	3 months	7.25%	Medium to High

B. What are the investment restrictions?

As per the provisions of the Trust Deed read with the SEBI (MF) Regulations, the following investment restrictions apply in respect of the Scheme at the time of making investments.

1. Mutual Funds/AMCs shall ensure that total exposure of debt schemes of mutual funds in a particular sector (excluding investments in Bank CDs, TREPs, G-Secs, TBills, short term deposits of scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme;

Provided that an additional exposure to financial services sector (over and above the limit of 20%) not exceeding 10% of the net assets of the scheme shall be allowed only by way of increase in exposure to Housing Finance Companies (HFCs).

Further, an additional exposure of 5% of the net assets of the scheme has been allowed for investments in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio.

Provided further that the additional exposure to such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB) and the total investment/ exposure in HFCs shall not exceed 20% of the net assets of the scheme.

2. a) A mutual fund scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the Act as per the following matrix.

A mutual fund scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA; or
- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in paragraph 1 of Seventh Schedule of MF Regulation.

b) Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and TREPs:

c) Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board.

3. Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and TREPs:

Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board.

A mutual fund scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

In terms of the Asset Allocation of the Scheme, the Scheme may invest upto 5% of its total assets in Money market instruments including TREPs and Units of debt schemes and Units of Debt ETFs.

4. Mutual fund schemes shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging.

However, mutual fund schemes may invest in unlisted Non-Convertible Debentures (NCDs) not exceeding 10% of the debt portfolio, of the debt portfolio of the scheme subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis.

For the above purposes, listed debt instruments shall include listed and to be listed debt instruments.

5. The Scheme shall not invest more than 5% of its net assets in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. All such investments shall be made with the prior approval of the Board of Trustees and the Board of AMC.

Investments should only be made in such instruments, including bills re-discounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI (Mutual Fund) Regulations, 1996 and various circulars issued thereunder.

6. The investment of mutual fund schemes in the following instruments shall not exceed 10% of the debt portfolio of the schemes and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the schemes
 - a. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and
 - b. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

For the purpose of this provision, 'Group' shall have the same meaning as defined in paragraph 12.9.3.3 of the Master Circular.

Investment limits as mentioned above shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.

Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares. AMCs may ensure that the investment in debt instruments having credit enhancements are sufficiently covered to address the market volatility and reduce the inefficiencies of invoking of the pledge or cover, whenever required, without impacting the interest of the investors. In case of fall in the value of the cover below the specified limit, AMCs should initiate necessary steps to ensure protection of the interest of the investors.

7. Group exposure –
 - i. The Fund shall ensure that total exposure of the debt scheme in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the Scheme. Such investment limit may be extended to 25% of the net assets of the Scheme with the prior approval of the Board of Trustees.
 - ii. The investments by debt mutual fund schemes in debt and money market instruments of group companies of both the sponsor and the asset management company shall not exceed 10% of the net assets of the scheme. Such investment limit may be extended to 15% of the net assets of the scheme with the prior approval of the Board of Trustees
 - iii. For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.
8. Transfer of investments from one Scheme to another Scheme in the same Mutual Fund is permitted provided:
 - Such transfers are done at the prevailing market price for quoted instruments on spot basis (spot basis shall have the same meaning as specified by a Stock Exchange for spot transactions); and
 - The securities so transferred shall be in conformity with the investment objective of the Scheme to which such transfer has been made.

Further the inter Scheme transfer of investments shall be in accordance with the provisions contained in paragraph

Inter-Scheme transfer of investments, contained in Statement of Additional Information. The AMC shall comply with the guidelines stated in paragraph 12.30 of the Master Circular..

9. The Scheme may invest in other Schemes under the same AMC or any other Mutual Fund without charging any fees, provided the aggregate inter-Scheme investment made by all the Schemes under the same management or in Schemes under management of any other asset management company shall not exceed 5% of the Net Asset Value of the Fund. No investment management fees shall be charged for investing in other Schemes of the Fund or in the Schemes of any other mutual fund.

10. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities:

Provided further that the Mutual Fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by SEBI

Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the RBI in this regard

11. The Fund shall get the securities purchased transferred in the name of the Fund on account of the concerned Scheme, wherever investments are intended to be of a long-term nature.

12. Pending deployment of funds of the Schemes in terms of the investment objective of the Schemes, the Mutual Fund may invest them in short term deposits of scheduled commercial banks as per paragraph 12.16 of the Master Circular. The, following guidelines shall be followed for parking of funds in short term deposits of Scheduled commercial Banks pending deployment:

- a. *"Short Term" for such parking of funds by mutual funds shall be treated as a period not exceeding 91 days.*
- b. Such short term deposits shall be held in the name of the concerned Scheme.

- c. No mutual fund Scheme shall park more than 15% of the net assets in Short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with prior approval of the trustees. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the mutual fund in short term deposits.
- d. No mutual fund Scheme shall park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- e. Trustees/Asset Management Companies (AMCs) shall ensure that no funds of a scheme are parked in short term deposit (STD) of a bank which has invested in that scheme. Trustees/AMCs shall also ensure that the bank in which a scheme has STD does not invest in the said scheme until the scheme has STD with such bank.

The above conditions are not applicable to term deposits placed as margins for trading in cash and derivative market.

- f. Asset Management Company (AMC) shall not be permitted to charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks

13. No mutual fund Scheme shall make any investments in;

- a) any unlisted security of an associate or group company of the sponsor; or
- b) any security issued by way of private placement by an associate or group company of the Sponsor; or
- c) the listed securities of group companies of the Sponsor which is in excess of 25% of its net assets.

14. The scheme shall not invest in Fund of funds scheme.

15. No loans for any purpose can be advanced by the Scheme.

16. The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of repurchase/ redemption of units or payment of interest or IDCW to the unit holders. Such borrowings shall not exceed more than 20% of the net assets of the individual Scheme and the duration of the borrowing shall not exceed a period of 6 months.

17. The Mutual Fund having an aggregate of securities which are worth Rs.10 crores or more, as on the latest balance sheet date, shall subject to such instructions as may be issued from time to time by the Board, settle their transactions entered on or after January 15, 1998 only through dematerialised securities. Further all transactions in government securities shall be in dematerialised form.

18. The Scheme will comply with provisions specified in paragraph 12.25 of the Master Circular related to overall exposure limits applicable for derivative transactions as stated below:

- a) The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
- b) Mutual Funds shall not write options or purchase instruments with embedded written options.
- c) The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
- d) Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
- e) Exposure due to hedging positions may not be included in the above mentioned limits

subject to the following:

- i. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - ii. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point (a).
 - iii. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - iv. The quantity of underlying associated with the derivative position taken for hedging purpose does not exceed the quantity of the existing position against which hedge has been taken.
 - v. Mutual Funds may enter into plain vanilla Interest Rate Swaps (IRS) for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.
 - vi. In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.
- f) Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point (a) above.
- g) Definition of Exposure in case of Derivative Positions - Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option Bought	Option Premium Paid * Lot Size * Number of Contracts

Exposure limit for participating in Interest Rate Futures as per paragraph 12.25.9 of the Master Circular

i. To reduce interest rate risk in a debt portfolio, mutual funds may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$$\frac{(\text{Portfolio Modified Duration} * \text{Market Value of the Portfolio})}{(\text{Futures Modified Duration} * \text{Future Price/ PAR})}$$

- ii. In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.
- iii. Imperfect hedging using IRFs may be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to the following:

a) Exposure to IRFs is created only for hedging the interest rate risk based on the weighted average modified duration of the bond portfolio or part of the portfolio.

b) Mutual Funds are permitted to resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio (excluding the hedged portions, if any) and the IRF is at least 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation criteria, the same may be rebalanced within 5 Business days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure computed in terms of Paragraph 12.24 of the Master Circular. The correlation should be calculated for a period of last 90 days.

Explanation: If the fund manager intends to do imperfect hedging upto 15% of the portfolio using IRFs on weighted average modified duration basis, either of the following conditions need to be complied with:

- i. The correlation for past 90 days between the portfolio and the IRF is at least 0.9 or
- ii. The correlation for past 90 days between the part of the portfolio (excluding the hedged portions, if any) i.e. at least 15% of the net asset of the scheme (including one or more securities) and the IRF is at least 0.9.

c) At no point of time, the net modified duration of part of the portfolio being hedged should be negative.

d) The portion of imperfect hedging in excess of 20% of the net assets of the scheme should be considered as creating exposure and shall be included in the computation of gross exposure in terms paragraph 12.24.1 of the Master Circular.

..

iv. The basic characteristics of the scheme should not be affected by hedging the portfolio or part of the portfolio (including one or more securities) based on the weighted average modified duration.

Explanation: In case of long term bond fund, after hedging the portfolio based on the modified duration of the portfolio, the net modified duration should not be less than the minimum modified duration of the portfolio as required to consider the fund as a long term bond fund.

v. The interest rate hedging of the portfolio should be in the interest of the investors.

19. Below stated conditions and norms shall apply to repo in corporate debt securities, which are subject to change as may be prescribed by SEBI and/or RBI from time to time:

a) Any scheme shall not lend/borrow more than 10% of its net assets in repo against corporate debt securities.

b) The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt, derivatives and any other permitted assets shall not exceed 100% of the net assets of the Scheme.

c) The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.

d) The exposure limit/investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate debt securities.

e) Counterparty selection & credit rating:

The AMC follows an issuer selection and approval process for fixed income investments and the same shall be used for selection of counterparties for repo in corporate debt

securities. Repo transactions shall be carried out with only those counterparties who have a credit rating of 'AA and above' (Long term rating) or 'A1+' (Short term rating) provided by any credit rating agency as accredited by SEBI from time to time.

f) Tenor of Repo:

Tenor of repo shall not exceed 6 months. There shall be no restriction/limitation on the tenor of collateral.

g) Applicable haircut:

The AMC would be guided by the parameters for applying haircut as may be specified by RBI and/or SEBI for undertaking repo in corporate debt securities, from time to time.

h) Rating of underlying instruments:

The schemes shall participate in repo transactions only in AA (or equivalent short term rating) and above rated corporate debt securities.

20. As per paragraph 4.6.1, all open ended debt schemes (except Overnight Fund, Liquid Fund, Gilt Fund and Gilt Fund with 10 year constant duration) shall hold at least 10% of their net assets in liquid assets. For this purpose, 'liquid assets' of the Master Circular shall include Cash, Government Securities, T-bills and Repo on Government Securities.

The liquid assets specified above shall not be included for determining the scheme characteristics of the open ended debt schemes as specified in Part IV of the Master Circular.

In case the exposure in such liquid assets / securities falls below the threshold mandated above, the Asset Management Companies (AMCs) shall ensure compliance with the above requirement before making any further investments.

21. The scheme shall not park funds pending deployment in short term deposits of scheduled commercial banks.

22. The scheme shall not invest in debt securities having structured obligations (SO rating) and/ or credit enhancements (CE rating). However, debt securities with government guarantee shall be excluded from such restriction.

23. The Scheme will comply with any other Regulation applicable to the investments of mutual funds from time to time.

24. The Scheme may invest in certain debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption. Additional Tier I bonds and Tier 2 bonds issued under Basel III framework are some instruments which may have above referred special features. The debt instruments having such special features as referred above, which otherwise are Non-Convertible Debentures, may be treated as debt instruments until converted to equity.

i. no Mutual Fund under all its schemes shall own more than 10% of such instruments issued by a single issuer

ii. a Mutual Fund scheme shall not invest:

- a. more than 10% of its NAV of the debt portfolio of the scheme in such instruments; and
- b. more than 5% of its NAV of the debt portfolio of the scheme in such instruments issued by a single issuer.

All investment restrictions shall be applicable at the time of making investment. The Trustee /AMC may alter the above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change or as deemed fit in the general interest of the unit holders, so as to permit the Scheme to make their investments in the full spectrum of permitted investments in order to achieve their investment objective.

Policy for declaration of Income Distribution cum capital withdrawal (IDCW Policy)	<p>(i) Growth Option The Scheme will not declare any IDCW under this option. The income earned by the Scheme will remain reinvested in the Scheme and will be reflected in the Net Asset Value. This option is suitable for investors who are not looking for regular income but who have invested with the intention of capital appreciation.</p> <p>(ii) IDCW Option This option is suitable for investors seeking income through IDCW declared by the Scheme. The Trustee may approve the distribution of IDCW by AMC out of the distributable under this Option. The remaining distributable surplus after considering the IDCW and tax, if any, payable there on will be ploughed back in the Scheme and be reflected in the NAV.</p> <p>(iii) IDCW Payout: As per the SEBI (MF) Regulations, the IDCW warrants shall be dispatched to the unitholders within 7 Business days from the record date. IDCW will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). IDCW will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the Registered address of the sole/first holder as indicated in the original application form. To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investors should provide the name of their bank, branch and account number in the application form. IDCW cheques will be sent to the Unit Holder after incorporating such information. IDCW Payout facility will be available with all frequencies except daily frequency. In case of daily frequency, IDCW will be mandatorily reinvested. In case of daily frequency, IDCW will be mandatorily reinvested. The minimum amount for IDCW payout shall be Rs.100, else IDCW would be mandatorily reinvested.</p>

For distribution of IDCW, the record date shall be as follows:

Frequency	Record Date
Weekly	Monday**

** If date specified is a non-business day, the record date shall be immediately succeeding business day.

(iv) IDCW Reinvestment:

The investors opting for IDCW Option may choose to reinvest the IDCW to be received by them in additional Units of the Scheme. Under this provision, the IDCW due and payable to the Unitholders will be compulsorily and without any further act by the Unitholders reinvested in the Scheme (under the IDCW Option, at the first ex- IDCW NAV). The IDCW so reinvested shall be constructive payment of IDCW to the Unitholders and constructive receipt of the same amount from each Unitholder for reinvestment in Units. On reinvestment of IDCW, the number of Units to the credit of Unitholder will increase to the extent of the IDCW reinvested divided by the NAV applicable on the day of reinvestment.

(v) IDCW Transfer

In addition to the existing Official Point of Acceptance of transactions, Computer Age Management Services Ltd. (CAMS), the Registrar and Transfer Agent of ICICI Prudential Mutual Fund, having its office at New No 10. Old No. 178, Opp. to Hotel Palm Grove, MGR Salai (K.H.Road), Chennai - 600 034 shall be an official point of acceptance for electronic transactions received from the Channel

Partners with whom ICICI Prudential Asset Management Company Limited has entered or may enter into specific arrangements for all financial transactions relating to the units of mutual fund schemes. Additionally, the secure Internet sites operated by CAMS will also be official point of acceptance only for the limited purpose of all channel partners transactions based on agreements entered into between IPMF and such authorized entities. Additionally, the Internet site(s) operated by the AMC and online applications of the AMC [including i-Invest iPru (previously IPRUTouch)] will also be official point of acceptance. The AMC also accepts applications received on designated FAX numbers.

In addition to the existing Official Point of Acceptance of transactions, authorized Points of Service (POS) of MF Utilities India Private Limited (MFUI) shall be an official point of acceptance for all financial and non- financial transactions. The updated list of POS of MFUI is available on www.mfuindia.com. The online transaction portal of MFU is www.mfuonline.com. Further, Investors can also subscribe units of the Scheme during the NFO Period by availing the platforms/facilities made available by the Stock Exchanges.

Open Network for Digital Commerce (ONDC)

The schemes of ICICI Prudential Mutual Fund (the Fund) are now available to be transacted through the Open Network for Digital Commerce (ONDC) ("Network").

To facilitate transactions through this Network, the Fund has/shall enter into agreement with service provider(s) who would provide backend platform on behalf of the Fund. The said platform would be considered as an 'OPAT'.

Accordingly, for the purpose of determining the applicability of NAV, the time at which request for purchase / sale / switch of units is received on the server(s) of the said platform will be considered as time of receipt of transaction with the AMC.

As per existing system architecture of ONDC network, currently regular plans of the schemes of ICICI Prudential Mutual Fund are available for transaction through this route.
