Global Bond Yields

- 10-year US Treasury yield settled at 3.91% on Aug-24 vs 4.09% on Jul-24.
- Prices were also affected by Minutes of Fed's Jul-24 meeting hinting at Sept-24 rate cut, amid further cooling of job markets and inflation nearing Fed's 2% target
- Lower-than-expected Producer Price Index data, which eased to 2.2% on-year in Jul-24 from upwardly revised 2.7% increase in Jun-24 were also a factor. Core Producer Price Index decreased to 2.4% from 3.0%
- Non-farm payroll data was dismal, which upped economic growth concerns, boosting investors' appetite for safe haven bonds
- US economy added 114,000 jobs in Jul-24, well below a downwardly revised 179,000 in Jun-24, while unemployment rate rose 4.3% from 4.1%

- Strong gross domestic product data eased economic growth concerns
- US economy grew at an annualised rate of 3.0% in the second quarter of 2024, up from 1.4% in Q1CY24. Also, PCE prices rose 2.5% from 3.4% and core PCE prices rose 2.8% vs 3.7% over the period.

Growth trend

Growth projections for 2024

Source: Ministry of Statistics and Programme Implementation (MoSPI), IMF, OECD

- India's GDP growth slowed to 6.7% in Q1FY25 compared with 7.8% growth in Q4FY24.
- In terms of gross value added, the economy grew 6.8% against 6.3%.

Industry	Q1FY25 Growth %	Q4FY25 Growth %
Agriculture, Forestry & Fishing	2.0	0.6
Mining & Quarrying	7.2	4.3
Manufacturing	7.0	8.9
Electricity, Gas, Water Supply & Other Utility Service	10.4	7.7
Construction	10.5	8.7
Trade, Hotels, Transport, Communication & Services related to Broadcasting	5.7	5.1
Financial, Real Estate & Professional Services	7.1	7.6
Public Administration, Defense & Other Services	9.5	7.8

- India's GDP is estimated to grow at 6.8% in FY25
- Growth is expected to soften by moderating fiscal support due to a slimmer fiscal deficit and the lagged impact of rate hikes. Expected moderation in food inflation and the mild budgetary support to demand, might create space for discretionary consumption and support growth.

MARKET REVIEW

India Equity Market Performance

Index performance

Institutional flows

Source: NSE, BSE, SEBI, NSDL *MF data as of Aug 29, 2024

- India's equity markets extended their gains for 3rd month and ended at record highs. BSE Sensex and Nifty 50 rallied 0.76% and 1.14% on-month, respectively. Markets scaled all-time high multiple times, with the Sensex and Nifty breaching the 82,000-mark and 25,200-mark, respectively.
- Strong signals of an imminent rate cut by US Fed in near future, coupled with positive US economic data, propelled the domestic equities to all-time high.
- Policymakers expressed confidence in imminent policy easing. As long as there is no more cooling in job market and inflation nears Fed's 2% target.
- As a result, Indian benchmark indices saw steady climb in last 12 trading sessions of the month, spurred by gains in interest rate-sensitive sectors such as IT, financial services, realty and metals, among others.
- Markets were supported by continued buying by DIIs and FIIs. DIIs bought Rs 482.78 billion worth Indian equities, compared with Rs 249.36 billion in Jul-24. FIIs bought Indian equities worth Rs 73.2 billion, compared with Rs 323.64 billion in Jul-24.
- Further gains were capped because of sell-off in consumer and energy stocks and worries over Middle East tensions.
- Some losses were seen because of profit booking amid concerns over US economy, following weaker-than-expected manufacturing data and rise in jobless claims. US ISM Services PMI rose to 51.4 in Jul-24 from 48.8 in Jun-24 while US economy added 114,000 jobs in Jul-24, well below a downwardly revised 179,000 in Jun-24, while unemployment rate rose to 4.3% from 4.1%
- Some losses were also seen after RBI decided to maintain interest rates, citing inflationary pressure. They decided to keep interest rate unchanged at 6.50%. Rate setting panel cautioned that high food prices could spill over into core inflation, despite progress made in controlling overall inflation.

Equity Market Outlook

Global Update: Equity markets were impacted by weaker-than-expected US employment data, rate hike by the Bank of Japan and geopolitical tensions in the Middle East. As a result, US equities fell sharply at the beginning of the month. However, by month end, the market had rebounded as investors began to price in more aggressive policy easing by the Federal Reserve. The US major indexes S&P 500 rallied 2.3% during the month whereas the Nasdaq 100 rose 1.1%. (Source: Nasdaq, S&P)

UK equities inched up 0.1% while the European Stoxx600 index rose 1.3%. Although the boost to the French service sector from the Olympics meant the Eurozone composite PMI came in higher than expected, the overall economic backdrop remained weak and earnings from the cyclical companies disappointed. (Source: JP Morgan)

In Asia, Chinese stocks declined following weak GDP numbers. China's equity barometer Shanghai Composite fell 3.3% in Aug 2024. Japanese equities significant volatility against a background of hawkish monetary policy from the Bank of Japan, yen appreciation and concerns over the economic outlook in the U.S. The Nikkei 225 index fell 1.2% during the month. (Source: Lazard)

Indian Update: Foreign portfolio investors (FPIs) investments in domestic equities softened to Rs.7,322 crore in Aug 2024, in comparison to the Rs.32,359 crore inflow in July 2024. (Source: NSDL)

Market barometers BSE Sensex and the NSE Nifty50 inched up 0.8% and 1.1% respectively, in Aug 2024, due to impact of global cues. Sector-wise, BSE Healthcare (+6.6%), BSE Teck (+4.6%) and BSE Consumer Durables (+4.4%) gained the most; whereas, BSE Realty (-3.6%), BSE Capital Goods (-3.3%) and BSE Power (-2.5%) were laggards. (Source: BSE)

Our view going forward:

- The fundamental drivers of India's multi-decade consumption and infrastructure growth, are still firmly in place: favourable demographic dividend, rising per capita income, under-control inflation, digital transformation, strong corporate balance sheets and consolidation of Central fiscal deficit.
- India's macroeconomic situation remains strong and the budget cemented Government's commitment to further its fiscal consolidation path.
- Although India's macros look robust, valuations are not cheap. Valuations of large caps are reasonable compared to the mid and small caps. This warrants an investment approach in hybrid and multi asset allocation schemes which can dynamically manage exposure to various asset classes.
- Our key recommendation for lump-sum are schemes that enjoy flexibility across asset classes, such as Hybrid and Multi Asset allocation schemes.
- We remain watchful of these events that could have an influence on equity markets: global geo-politics and central bank actions, among others.

U.S. – United States of America; US Fed: Federal Reserve of US; FY: Financial year.

Liquidity in the banking system

Source: RBI

- Liquidity in Indian banking system remained in surplus for 2nd month. High government spending pushed it towards a year high during the month. Accordingly, the weighted average overnight money market rates briefly traded below the standing deposit facility rate. Nonetheless, RBI resorted to multiple variable rate reverse repo auctions throughout the month to mop up the excess liquidity. Eventually, Aug-24 ended with interbank weighted average call rate averaging at 6.52%, close to RBI's repo rate of 6.50%.
- Indian government bond yields consistently held below 6.88% mark throughout the month, near lowest levels in two years. Yield eventually settled at 6.86% in month end, as opposed to 6.92% in Jul-24
- For a major part of Aug-24, bond prices were buoyant because of intermittent fall in US Treasury yields amid rising hopes of an impending interest rate cut by US Fed. These hopes were further stoked by comments made by Fed Chair Powell and the minutes of bank's latest policy meeting, both hinting at likelihood of the first rate cut in four years by as early as September. Bond prices were also supported by a sharp decline in US Treasury yields following weak economic data (pertaining to jobs and inflation) and rising concerns about economic growth in US.
- However, further gains in bond prices were halted as investors awaited Fed Chair Powell's remarks at the Jackson Hole Symposium.
- Back home, bond prices came under pressure as the month drew towards a close because of increased supply caused by higher-than-expected sales of bonds by state governments. Intermittent profit booking also constrained bond prices. Furthermore, the RBI's decision to hold steady the policy rate at its latest policy meeting also weighed on the prices.

MARKET OUTLOOK

Fixed Income Outlook

Fixed Income Outlook

The Fixed Income landscape is likely to remain favorable owing to stable macros, stable demand-supply dynamics and surplus liquidity in the system. Further, the withdrawal of hawkish monetary policy by the US Fed and other major central banks leaves limited upside risk to domestic bond yields.

We expect liquidity in the system continue to remain in surplus owing to government spending, foreign portfolio inflows and moderation in credit growth. Yields on the short-end of the duration curve are likely to remain range bound as a result.

We maintain that economic growth will stay buoyant and inflation growth will remain within the RBI's tolerable range. Therefore, we expect the RBI to maintain its status quo on policy rates, unless there is a shift in the growth-inflation dynamics.

Even our outlook on fixed income remains the same as earlier – Accruals continue to remain the predominant source of return for fixed income investments. We prefer the shorter-end of the duration curve. We maintain a neutral stance on longer-duration. Active duration management is crucial at this point of the economic cycle.

Market Activity

The 10-year Indian benchmark bond yield consistently held below the 6.88% mark throughout the month, near the lowest levels in two years. Yields eventually settled at 6.86% on Aug 31, 2024 down 6 bps over July 31, 2024 closing of 6.92%.

Government spending aided fresh liquidity into the system, which were eventually mopped up by the RBI thru the use of VRRRs. Overnight rates averaged close to the RBI's repo rate of 6.50% during the month. The 91-day T-bill yield fell 5 bps to 6.62% while the 182-day T-bill yield also fell 8 bps to 6.71%. (Source: CCIL)

Credit spreads widened at the shorter-end of the yield curve likely due to greater fall in short-dated G-sec yields.

ICICI Prudential Debt Valuation Index for Duration Risk Management

In the current business cycle, growth remains robust and inflation rate is in line with the RBI's acceptable range, therefore, we believe that monetary policy can continue to maintain status-quo.

An improvement in budgeted estimates of fiscal deficit for the current financial year offered a boost to long duration, hence, changing our stance to moderate from cautious earlier.

Data as on August 31, 2024. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement and any other factor which the AMC may add / delete from time to time for calculation. Debt Valuations Index is a proprietary model of ICICI Prudential AMC Ltd (the AMC) used for assessing overall debt valuations. The AMC may also use this model for other facilities / features offered by the AMC. RBI – Reserve Bank of India.

None of the aforesaid recommendations are based on any assumptions. These are purely for reference and the investors are requested to consult their financial advisors before investing. 11

Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 31 August, 2024

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on August 30, 2024.

IDCW is gross IDCW. To arrive at the net IDCW payable for corporate and non-corporate investors applicable IDCW distribution tax, if any, needs to be adjusted respectively. Past performance may or may not be sustained in future. After payment of IDCW the NAV has fallen to the extent of payout and distribution taxes if applicable. For complete IDCW history details please refer to our website www.icicipruamc.com, Download section-NAV and IDCW history section.

Distribution of IDCW is subject to availability of distributable surplus and approval of Trustees.

When units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Nature of Scheme :

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile :

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
