Better Risk Adjusted Returns – Portfolio Construction

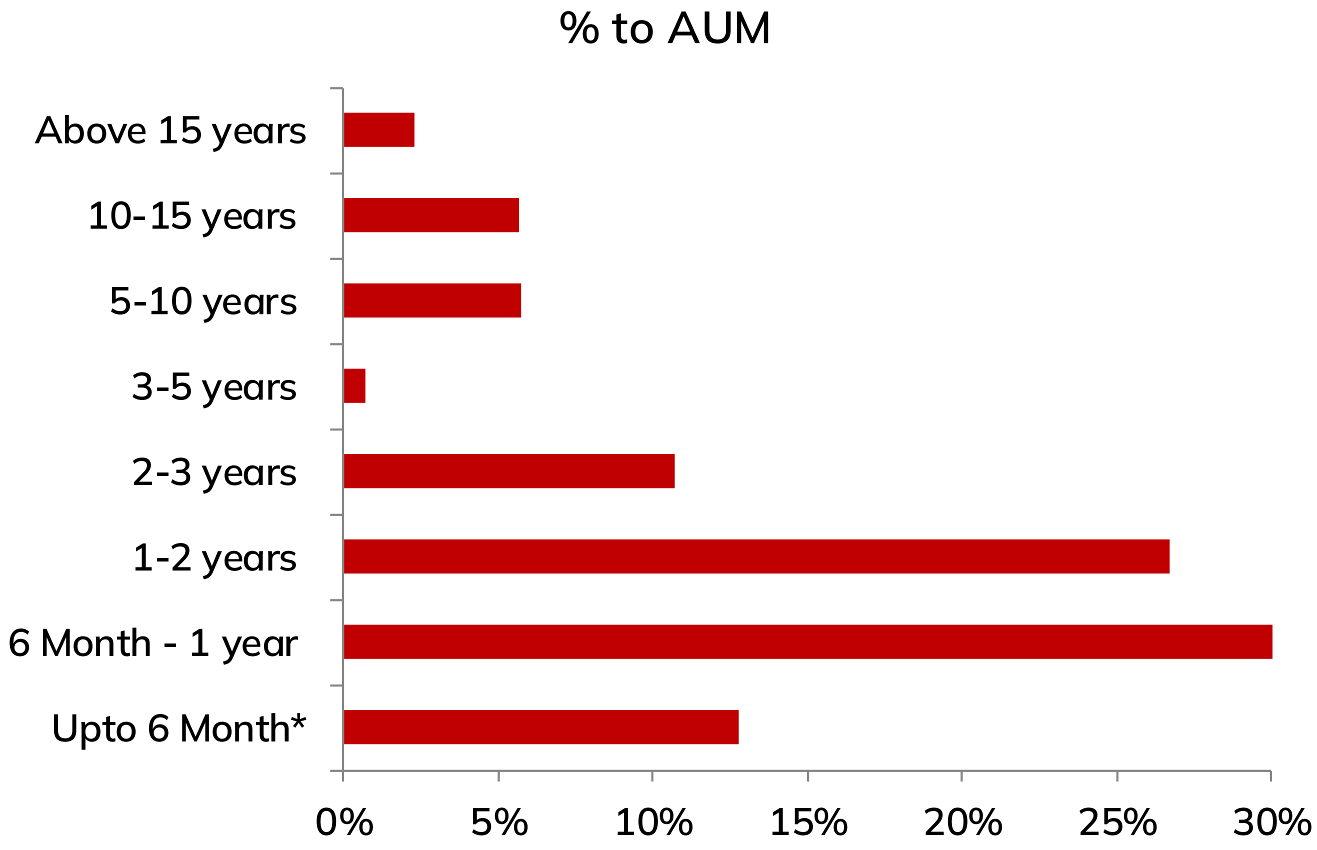
Duration Management – diversified portfolio across various maturity buckets



Laddered Approach (Investment across maturity buckets) :

- Not overexposed to any one segment of yield curve
- Reduces interest rate and reinvestment risks
- Helps in managing liquidity risk
- Investors are able to reinvest a portion regularly

Data as on April 30, 2026, * Including other current assets

Better Risk Adjusted Returns – Asset & Liability Focus

Assets (Portfolio Construction)	Liabilities (Investor Concentration & Trend)
Avoidance of Concentration Risk	Maximum investment limit per investor is Rs.50 crore*
Independent Credit evaluation process for securities	Having adequate mix of highly liquid securities to meet any unforeseen redemption request
Independent Investment and risk team to avoid conflicts	Review and monitoring of purchase and redemption in the scheme
Accrual Focus – to ensure returns are more predictable and consistent	Monitoring ageing of investors for any redemption requests
Moderate duration to reduce interest rate sensitivity	Monitoring of partner-wise concentration in the scheme

*With effect from December 19, 2019, Maximum Investment Amount per investor including existing investment amount (based on Permanent Account Number of first holder) at the time of investment across all folios shall not exceed Rs.50 crore. However, the AMC/Mutual Fund may at its discretion accept an amount greater than Rs.50crore, subject to the limits: a) The aggregate AUM of all the investors with more than Rs.50crore does not exceed 12% of the Scheme's AUM, which is declared on the last day of preceding calendar quarter. b) Maximum investment amount per investor across all folios does not exceed 5% of the Scheme's AUM, which is declared on the last day of preceding calendar quarter.

Quantitative Indicators

Scheme Statistics	
Average Maturity	3.04 years
Modified Duration	1.98 years
Macaulay Duration	2.08 years
Yield To Maturity (YTM)	8.40%

Data as of April 30, 2026; The portfolio of the scheme is subject to changes within the provisions of the Scheme Information Document of the Scheme.
Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.The Yield to Maturity (YTM) mentioned is based on scheme portfolio dated as on April 30, 2026. YTM is the rate of return on a bond if held until maturity. This should not be considered as an indication of the returns that maybe generated by the scheme. The securities bought by the scheme may or may not be held till their respective maturities.

Key Takeaways

- Spread assets (Corporate Bonds rated below AAA) currently provide reasonable carry with margin of safety.
- Hence, a significant component of the return from bonds is expected to come via accruals i.e. coupons; whereas returns from capital appreciation may take a back seat.
- We continue to focus on risk adjusted returns, rather than focusing only on YTMs.
- With our credit selection process we have been able to avoid any major credit stress/event on our portfolio.
- We continue to remain cognizant of managing liquidity, concentration, credit and duration in our accrual portfolio to provide better risk adjusted returns.

YTM – Yield to Maturity

Scheme Features

Type of Schemes	An open ended debt scheme predominantly investing in AA and below rated corporate bonds. A relatively high interest rate risk and relatively high credit risk.
Plans/Options	ICICI Prudential Credit Risk Fund & ICICI Prudential Credit Risk Fund – Direct; Options: Growth & IDCW^ and re-investment sub-options (with Quarterly frequency)
Minimum Application Amount	Rs. 100 (plus in multiples of Re. 1)
Minimum Additional Application Amount	Rs. 100 (plus in multiples of Re. 1)
Minimum Redemption Amount	Any Amount
Exit Load	10% of units within 1 Year from allotment – Nil. More than 10% of units, within 1 Year – 1% of applicable NAV; More than 1 Year – Nil
Fund Manager	Manish Banthia and Akhil Kakkar are fund managers of the scheme. Manish Banthia has been managing this scheme since Nov 2016 & has 23 years of experience overall. Akhil Kakkar has been managing this scheme since Jan 2024 and has over 19 years of experience.
Benchmark Index	CRISIL Credit Risk Debt B-II Index**
SIP / STP / SWP	Available

*IDCW – Income Distribution cum Capital Withdrawal Option. Payment of IDCW is subject to availability of distributable surplus and Trustee approval. Pursuant to payment of IDCW, the NAV of the scheme falls to the extent of IDCW payout. When units are sold and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. In case the unit holder has opted for IDCW payout option, the minimum amount for IDCW payout shall be 100 (other statutory levy, if any), else the IDCW would be mandatorily reinvested. IDCW Payout – Payout of Income Distribution cum capital Withdrawal option. IDCW Re-investment – Reinvestment of Income Distribution cum capital Withdrawal option.. **The benchmark of the Scheme has been changed CRISIL Credit Risk Debt C-II Index To CRISIL Credit Risk Debt B-II Index with effect from March 12, 2024.

Risk-o-meters
