Market Outlook

Bond yields inched up in Aug 2026 amid concerns over domestic inflation stemming from higher crude oil prices and tapering FPI inflows in bonds. On the positive side, the economy posted a resilient 7.8% YoY growth for Q1:FY2026-27.

We believe the rise in yields has increased attractiveness of long-bond yields. Hence, we recommend gradually adding duration to portfolios.

On monetary policy, we maintain our earlier stance that the RBI could likely look-through inflation concerns given that current rise in oil, food prices is supply-side driven. As the economy recovers and growth expands, we expect the RBI to normalize interest rates to a neutral level.

For fixed income portfolios, we favor corporate bonds in the 1- to 3-year duration range. On the sovereign side, we maintain a positive outlook on long-dated State Government Securities. Consequently, we recommend investment in short-term products, corporate bonds, floating interest instruments, and banking and PSU debt in the current environment.
