About the Scheme

ICICI Prudential Short Term Fund is an open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 Year and 3 Years. A relatively high interest rate risk and moderate credit risk.

Aims to generate income through investments in a range of debt and money market instruments while maintaining the optimum balance of yield, safety and liquidity. In addition, the scheme seeks to derive benefit from any potential mark-to-market returns by tactical, calibrated and opportunistic approach to Government securities.

Current Positioning

- Instrument profile:** The Scheme predominantly invests in short- to medium-term debt instruments issued by the corporates, financial entities and banks. It may also take view-based exposure to government securities. As on Aug 31, 2026, the Scheme is maintaining 17.20% in Sovereign Securities, 58.93% in AAA & Equivalent securities, 20.46% in AA & Equivalent securities and 3.41% in TREPs and Net Current Assets.
- Credit risk management:** It proposes to predominantly invest in debt instruments of good credit quality, i.e. predominantly in instruments with long-term rating between AAA and AA. The Scheme also aims to capture credit spread opportunities to generate returns.
- Security selection:** It seeks to invest in corporate securities that are at reasonable spreads over G-Sec and offer reasonable yield at commensurate risks with an aim to generate accrual returns. The Scheme shall have tactical, calibrated and opportunistic approach to government securities with varying maturities based on the underlying interest rate view.
- Duration management:** The Scheme will actively manage duration with an aim to generate potential capital appreciation. The Scheme aims to maintain its macaulay duration in the range of 1 to 3 years. As on Aug 31, 2026, the Scheme is maintaining a modified duration of 2.59 years and macaulay duration of 2.72 years. The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Why ICICI Prudential Short Term Fund ?

- The Scheme endeavours to generate risk adjusted returns by maintaining a fair balance between duration and yield.
- The Scheme aims to benefit from capital appreciation through active management of G-Sec and active duration management. The Scheme also aims to maintain reasonable yield by investing in high rated corporate bonds. The Scheme is suitable for investors who aim to invest for 6 months and above and wish to benefit from accrual income as well as opportunistic gains through potential capital appreciation from any favourable rates movements.

Market Outlook

Bond yields inched up in Aug 2026 amid concerns over domestic inflation stemming from higher crude oil prices and tapering FPI inflows in bonds. On the positive side, the economy posted a resilient 7.8% YoY growth for Q1:FY2026-27.

We believe the rise in yields has increased attractiveness of long-bond yields. Hence, we recommend gradually adding duration to portfolios.

On monetary policy, we maintain our earlier stance that the RBI could likely look-through inflation concerns given that current rise in oil, food prices is supply-side driven. As the economy recovers and growth expands, we expect the RBI to normalize interest rates to a neutral level.

For fixed income portfolios, we favor corporate bonds in the 1- to 3-year duration range. On the sovereign side, we maintain a positive outlook on long-dated State Government Securities. Consequently, we recommend investment in short-term products, corporate bonds, floating interest instruments, and banking and PSU debt in the current environment.

Product Label

This Scheme is suitable for investors who are seeking*

- Short term income generation and capital appreciation solution
- A debt fund that aims to generate income by investing in a range of debt and money market instruments of various maturities.
- * Investors should consult their financial advisor if in doubt about whether the product is suitable for them.

Please note that the Risk-o-meter(s) specified above will be evaluated and updated on a monthly basis. The above riskmeters are as on Aug 31, 2026. Please refer to <https://www.icicpruamc.com/media-center> for more details

*IDCW – Income Distribution cum Capital Withdrawal Option. Payment of IDCW is subject to availability of distributable surplus and Trustee approval. Pursuant to payment of IDCW, the NAV of the scheme falls to the extent of IDCW payout. When units are sold and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. In case the unit holder has opted for IDCW payout option, the minimum amount for IDCW payout shall be 100 (net of dividend distribution tax and other statutory levy, if any), else the IDCW would be mandatorily reinvested.

IDCW Payout -Payout of Income Distribution cum capital withdrawal option; IDCW Reinvestment -Reinvestment of Income Distribution cum capital withdrawal option

##The Benchmark of the Scheme has been changed from NIFTY Short Duration Debt Index B-II to NIFTY Short Duration Debt Index A-II with effect from Mar 12, 2024.

Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)		B-III	

YTM Disclaimer:

Portfolio Information	
Scheme Name:	ICICI Prudential Short Term Fund
Description	An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 Year and 3 Years. A relatively high interest rate risk and moderate credit risk.
Annualised Portfolio YTM*:	7.89%
Macaulay Duration	2.72 years
Residual Maturity	4.32 years
As on Date	31-Aug-26

As per AMFI Best Practices Guidelines Circular No. AMFI/35P/MEM-COR/72/2022-23 dated December 31, 2022 on Standard format for disclosure of portfolio YTM for debt schemes. Yield of the instrument is disclosed on annualized basis as provided by Valuation agencies. *in case of semi-annual YTM it will be annualized.

The Yield to Maturity (YTM) mentioned is based on scheme portfolio dated Aug 31, 2026. YTM is the rate of return on a bond if held until maturity. This should not be considered as an indication of the returns that may be generated by the scheme. The securities bought by the scheme may or may not be held till their respective maturities. Annualized Yield to Maturity converts instrument coupon into annualized format wherein the coupons are paid on a semi-annualized basis.

The Scheme has undergone certain categorization changes in accordance with the Master Circular for Mutual Funds, with effect from Aug 26, 2026. For complete details refer to the addendum on the AMC's website
