- The Scheme is suitable for investors who wanted to participate into diverse Sectors of manufacturing.
- Investors looking to benefit from increasing contribution of manufacturing in GDP. The scheme has an indicative investment horizon of 5 years and above

Equity Market Outlook

Global Update: The S&P 500 experienced a powerful rally in April 2026, gaining over 10% for the month—its best performance since April 2020—driven by strong AI-related earnings, easing Middle East tensions, and falling oil prices. European markets experienced a strong, risk-on rally despite geopolitical turmoil, driven by renewed confidence, tech sector gains, and eased tensions between the US and Iran.

India Update: The Indian equity market declined for the fourth consecutive month as the West Asia conflict stoked a major FPI sell off. FPIs sold Rs. 60,847 crores in Apr 2026 compared to outflow of 1.17 lakh crore in Mar 2026. (Source: NSDL)

Market barometers BSE Sensex and NSE Nifty50 gained 6.9% and 7.5%, respectively, on-month in Apr 2026. Sector-wise, BSE Power (+22.2%), BSE Realty (+21.4%) and BSE Capital Goods (+20.2%) gained the most, whereas, BSE Infotech (+1.7%), BSE Healthcare (+6.8%) and BSE Oil & Gas (+8.3%) were laggards. (Source: BSE)

Our view going forward:

- Indian markets inched higher during the month driven primarily by DII buying momentum and gains in banking & financial sector stocks.
- The West-Asia conflict entered its 3rd month and it seems far from over. This continues to impact global supply chain with energy dependent countries seeking alternative sources.
- This has also impacted Indian rupee significantly as it touched 95.2 against the Dollar. Concerns around Current Account Deficit remain high as crude prices touched 108 USD/Barrel during the month.
- Structurally though, macros appear resilient – Fiscal Deficit is under control, demand environment is robust, rupee depreciation provides a boost to service exports which can cushion India's trade balance from supply side shocks.
- As per latest data by IMF, India's 2026 real GDP growth is projected at 6.5% in 2026 which continues to be high compared to major economies despite of on-going conflict.
- Given the uncertainty around conclusion of the conflict, we continue recommending investing in equities in a staggered manner through SIP/STP in schemes that have the flexibility to maneuver across sectors / market cap.
- Since market volatility may persist in the near term, we also continue to recommend investing in Hybrid / Asset Allocation schemes.

U.S. – United States of America; US Fed: Federal Reserve of US; FY: Financial year. FI – Foreign Portfolio Investor. AI – Artificial Intelligence.

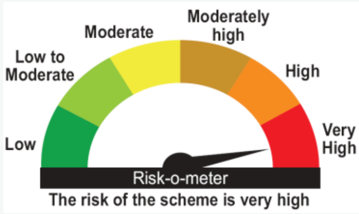
Scheme Riskometer



Please note that the Risk-o-meter(s) specified above will be evaluated and updated on a monthly basis. The above riskometers areas on April 30, 2026. Please refer to https://www.icicipruamc.com/news-and-updates/all-news for more details

*IDCW – Income Distribution cum Capital Withdrawal Option. Payment of IDCW is subject to availability of distributable surplus and Trustee approval. Pursuant to payment of IDCW, the NAV of the scheme falls to the extent of IDCW payout. When units are sold and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. In case the unit holder has opted for IDCW payout option, the minimum amount for IDCW payout shall be 100 (net of dividend distribution tax and other statutory levy, if any), else the IDCW would be mandatorily reinvested.

IDCW Payout -Payout of Income Distribution cum capital withdrawal option;IDCW Reinvestment -Reinvestment of Income Distribution cum capital withdrawal option
