The primary objective of the Scheme is to generate capital appreciation primarily from a portfolio of equity, debt, and gold schemes accessed through the diversified investment styles of underlying schemes. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

Asset Allocation:
Under normal circumstances, the asset allocation under the Scheme will be as follows:

*or similar instruments as may be permitted by RBI/SEBI.

The Scheme can invest in the schemes managed by ICICI Prudential Mutual Fund or any other Mutual Fund(s) as per the above stated asset allocation. The cumulative gross exposure should not exceed 100% of the net assets of the Scheme. At all points of time, the scheme will remain invested at least 95% (minimum gross exposure should not exceed 100% of the net assets of the Scheme).

As subject to the Regulations and other prevailing laws as applicable, the Scheme can invest in any (but not exclusively) of the following categories of the schemes:
1. Units of Equity oriented Schemes;
2. Units of Debt oriented Schemes;
3. Units of Gold ETF/Schemes;

The scheme allocates its assets dynamically between equity oriented/debt oriented/gold schemes, subject to the prevailing regulations from time to time, only for the purpose of liquidity requirements. The Scheme will allocate its assets between equity oriented, debt oriented and gold ETF/schemes depending on the in-house valuation model. The valuation model consists of following broad parameters such as:
- Earning Yield of Equity
- Bond Yield
- Currency
- Crude

Post analyzing the above mentioned parameters, the Fund Manager will determine the relative allocation to equity oriented, debt oriented and gold ETF/schemes.

RISK PROFILE OF THE SCHEME:
Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

SCHEME SPECIFIC RISK FACTORS:
Investors may please note that they will be bearing the recurring expenses of the relevant fund of fund scheme in addition to the expenses of the underlying schemes in which the fund of fund scheme makes investment.

- As the investors are incurring expenditure at both the Fund of Funds level and the schemes into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.
- Again as the Fund of Funds scheme may shift the weightage of investments between schemes into which it invests, the expenses charged being dependent on the structure of the underlying schemes (being different) may lead to a non-uniform charging of expenses over a period of time.
- As the Fund of Funds (FOF) factsheets and disclosures of portfolio will be limited to providing the particulars of the schemes invested at FOF level, investors may not be able to obtain specific details of the investments of the underlying schemes.
- While it would be the endeavour of the Fund Manager of the Fund of Funds schemes(s) to invest in the target schemes in a manner, which will seek to maximize returns, the performance of the underlying funds may vary which may lead to the returns of the Fund of Funds being adversely impacted.
- The scheme specific risk factors of each of the underlying schemes become applicable where a fund of funds invests in any underlying scheme. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying schemes relevant to the Fund of Fund scheme that they invest in. Copies of the Scheme Information Documents pertaining to the various schemes of ICICI Prudential Mutual Fund, which disclose
the relevant risk factors, are available at the Customer Service Centers or may be accessed at www.iciciprulamc.com.

A Fund Manager managing any one of the Fund of Fund schemes may also be the Fund Manager for any underlying schemes.

Risk management strategies:
The underlying schemes having exposure to the fixed income securities and/ or equity and equity related securities will be subject to the relevant risks and in turn the Scheme's/ Plans' performance will be affected accordingly.

a) Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constracts market liquidity or the efficient functioning of markets such as:

   i. Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security.

   ii. Market failures, exchange closures - when markets are affected by
unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
