RISK FACTORS:

The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the contribution of an amount of Rs. 22.2 lacs collectively made by them towards setting up the Fund and such other accretions and additions to the corpus set up by the Sponsors.

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below.

Scheme Specific Risk Factors and Risk Management Strategies:

The scheme strategy is to invested in companies which are relatively undervalued compared to its peers. Hence, evaluation of companies from value perspective may exclude companies which may not be considered a value investment, hence the Scheme may forgo some market opportunities available to the Scheme.

Value investing involves the risk that the market will not recognize a security's intrinsic value for a long time, or that a security thought to be undervalued may actually be appropriately priced when purchased. Hence, the return expectation from such investments will not be met.

Investing in Equities

- Investors may note that AMC/Fund Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Schemes to make intended securities purchases due to settlement problems could cause the Schemes to miss certain investment opportunities.
- The value of the Schemes' investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Schemes may fluctuate and can go up or down.
- Investors may note that dividend is due only when declared and there is
 no assurance that a company (even though it may have a track record of
 payment of dividend in the past) may continue paying dividend in future. As
 such, the schemes are vulnerable to instances where investments in securities
 may not earn dividend or where lesser dividend is declared by a company
 in subsequent years in which investments are made by schemes. As the
 profitability of companies are likely to vary and have a material bearing on
 their ability to declare and pay dividend, the performance of the schemes may
 be adversely affected due to such factors.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes in the securities in which it invests.
- Fund manager endeavors to generate returns based on certain past statistical trend. The performance of the schemes may get affected if there is a change in the said trend. There can be no assurance that such historical trends will continue.
- In case of abnormal circumstances it will be difficult to complete the square
 off transaction due to liquidity being poor in stock futures/spot market.
 However fund will aim at taking exposure only into liquid stocks where there
 will be minimal risk to square off the transaction. The Schemes investing in
 foreign securities will be exposed to settlement risk, as different countries
 have different settlement periods.
- The schemes are also vulnerable to movements in the prices of securities invested by the schemes which again could have a material bearing on the overall returns from the schemes. These stocks, at times, may be relatively less liquid as compared to growth stocks.
- Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Schemes or business prospects of the Company in any particular sector.

Risks associated with investment in ADR/GDR/Foreign Securities / Overseas ETFs:

It is AMC's belief that the investment in ADRs/GDRs/overseas securities / Overseas ETFs offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the schemes. Since the Schemes would invest only partially in ADRs/ GDRs/overseas securities / Overseas ETFs, there may not be readily available and widely accepted benchmarks to measure performance of the Schemes. To manage risks associated with foreign currency and interest rate exposure, the Scheme may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of the other restrictions on investment.

Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Scheme in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Scheme may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs, and overseas regulatory costs.

Investors are requested to note that the costs associated with overseas investments like advisory fees (other than those expenses permissible under regulation 52 of SEBI Regulations) would not be borne by the scheme.

Risks associated with Investing in Derivatives:

The Schemes may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The Fund may use derivatives instruments like Stock /Index Futures or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Schemes to certain risks inherent to such derivatives.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

• Lack of opportunity available in the market.

to possible movements in the NAV.

- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place
- **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying asset being hedged
- Exchanges could raise the initial margin, variation margin or other forms
 of margin on derivative contracts, impose one sided margins or insist that

Risk & Description Specific to Debt Risk mitigants / management strategy

investment:

Risks associated with Equity investment:	Risk mitigants / management strategy with Equity investment:
Liquidity risk: The liquidity of the Schemes' investments is inherently restricted by trading volumes in the securities in which it invests.	As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.
Concentration Risk: Concentration risk represents the probability of loss arising from heavily lopsided exposure to a particular group of sectors or securities.	The Schemes will try and mitigate this risk by investing in large number of companies so as to maintain optimum diversification and keep stock-specific concentration risk relatively low.
Derivatives Risk: As and when the Schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds.	The Scheme may invest in derivative for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations. Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. Fund managers will endeavor to use derivatives which are liquid and traded frequently on the exchanges. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID. No OTC contracts will be entered into.
Currency Risk: The Schemes may invest in foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currency, the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.	The schemes subject to applicable regulation and as permitted by their scheme information document, shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations. The Schemes may employ various measures (as permitted by SEBI/RBI) including but not restricted to currency hedging (such as currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), to manage foreign exchange movements arising out of investment in foreign securities. All currency derivatives trade, if any, will be done only through the stock exchange platform.
