INTRODUCTION TO EXCHANGE TRADED FUNDS (ETF)

ETFs are innovative products that provide exposure to its underlying asset. ETFs generally track an index, a basket of securities, commodities or debt securities. As name suggest ETFs are traded on the exchange like a single stock.

Unlike listed close ended funds, which trade at substantial premiums or more frequently at discounts to NAV, ETFs are structured in a manner which allows to create new Units and Redeem outstanding Units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the Investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges.

The structure of ETFs is such that it protects long-term Investors from inflows and outflows of short-term Investor. This is because the Fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.

ETFs are highly flexible and can be used as a tool for gaining instant exposure to the underlying asset, equitising cash or for arbitraging between the cash and futures market.

Features of ETFs

1. ETFs can be easily bought / sold like any other stock on the exchange through terminals spread across the country.
2. ETFs can be bought/ sold anytime during market hours at prices that are expected to be close to actual NAV of the schemes. Thus, investor invests at real-time prices as opposed to end of day prices.
3. No separate form filling for buying / selling of units is required. It is just a phone call to investors' broker or a click on the net.
4. ETFs have ability to put limit orders.
5. Minimum investment for an ETF is one unit.
6. ETFs facilitate protection to long-term investors from the inflows and outflows of short-term investors.
7. ETFs are flexible as it can be used as a tool for gaining instant exposure to the underlying index. ETFs are effective tool for equitising cash.
8. ETFs help in increasing liquidity of underlying cash market.
9. An investor can get a consolidated view of his investments without adding too many different account statements as the Units issued would be in demat form.

I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involve investment risks such as trading volumes, settlement risks, liquidity risks, default risks, including the possible loss of principal.
- As with any securities investment, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.
- Past performance of the Sponsors, and their affiliates/associates AMC/Fund does not indicate the future performance of the Schemes of the Fund.
- The past performance of the mutual funds managed by the Sponsors and their affiliates/associates is not indicative of the future performance of the Scheme. The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the contribution of an amount of Rs 22.2 lakhs collectively made by them towards setting up the Fund and such other accretions and additions to the corpus set up by the Sponsors.
- The present Scheme are not guaranteed or assured return schemes.
- Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- ICICI Prudential Liquid ETF is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- ICICI Prudential Liquid ETF is an Exchange Traded Fund (ETF). There can be no assurance that an active secondary market will develop or be maintained.
- The NAV of the Scheme may be affected by changes in the general level of interest rates and trading volumes.
- The NAV of the Scheme may be affected by settlement periods and transfer procedures.
- In the event of receipt of inordinately large number of redemption requests or of a restructuring of the Scheme's portfolios, there may be delays in the redemption of Units.
- Investors in the Scheme are not being offered any guaranteed returns.
Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme's investments include, but are not limited to, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- Investment decisions made by the AMC may not always be profitable.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down

Scheme Specific Risk Factors:

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.

Market Risk

The Scheme's NAV will react to the debt market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

Market Trading Risks

- **Absence of Prior Active Market:** Although units of the Scheme are to be listed on the Exchanges, there can be no assurance that an active secondary market will develop or be maintained.
- **Lack of Market Liquidity:** Trading in units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units of the Scheme are not advisable. In addition, trading in units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of the Scheme will continue to be met or will remain unchanged.
- **Units of the Scheme may trade at Prices Other than NAV:** Units of the Scheme may trade above or below its NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of units of the Scheme will fluctuate in accordance with changes in their NAVs as well as market supply and demand of units of the Scheme. However, given that units can be created and redeemed only in Creation Unit Size and in multiples thereof directly with the Fund, it is expected that large discounts or premiums to the NAVs of the Scheme will not sustain due to arbitrage possibility available.
- **Regulatory Risk:** Any changes in trading regulations by the Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV. Although, the units are listed on NSE and BSE, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on the exchanges / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- **Settlement Risk:** In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the Scheme's portfolio.
- **Redemption Risk:** Investors should not that even though the Scheme is an open ended scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in the Creation Unit Size. Generally, this lot size is larger as compared to normal funds. However, investors wishing to subscribe/redeem units in other than specific lot size can do so by buying/selling the same on the exchange(s). Investors can also approach the Fund directly for redemption in other than Creation Unit Size on occurrence of various events as listed in this document.
- **Right to Limit Redemptions:** The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day. The same shall be in accordance with SEBI circular dated May 31, 2016 - SEBI/HO/IMD/DF2/CIR/P/2016/57 (Restriction on redemption in Mutual Funds).

- **Portfolio Concentration Risk:** To the extent that the Scheme may concentrate its investments in the Securities of companies of certain sectors, the Scheme will therefore be subject to the risks associated with such concentration. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of equity Securities. Such risks may impact the Scheme to the extent that it invests in particular sectors even in cases where the investment objective is more generic.

➤ **Risks associated with investing in ADR/ GDR/ Foreign securities:**

The Scheme will not invest in ADR/GDR/Foreign securities.

➤ **Risks associated with investing in Derivatives:**

The Scheme will not invest in derivatives.

➤ **Risks associated with investing in Securitized Debt:**

The Scheme will not invest in Securitised Debt.

➤ **Risks associated with Short Selling and Securities Lending:**

The Scheme will not engage in short selling or securities lending activity.

➤ **Risks associated with Investing in money market instruments**

- **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest.
- **Liquidity risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio

➤ **Risks associated with investing in Tri Party Repo through CCIL (TREPS):**

- a. The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.
- b. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall".
- c. As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.
- d. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

- e. However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

- **Risk management strategies**

The Scheme by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Scheme has identified following risks of investing in debt securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risks associated with Debt Investments:	
Risk and Description	Risk mitigants / management strategy
Market Risk/ Interest Rate Risk - The Scheme may invest only in TREPs thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.	The Scheme may invest only in money market instruments having a residual maturity upto 91 days thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.
Liquidity or Marketability Risk - The Scheme will invest only in TREPs. The liquidity risk of TREPs is generally low.	The Scheme may invest only in money market instruments. The liquidity risk for money market instruments is generally low.
Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.

15

D. WHERE WILL THE SCHEME INVEST?

The Scheme will invest predominantly in Tri-Party Repos. The scheme may also invest in liquid schemes of ICICI Prudential Mutual Fund.

7

E. WHAT ARE THE INVESTMENT STRATEGIES?

The corpus of the Scheme will be invested predominantly in Tri-Party Repos. The performance of the Scheme may not be commensurate with the performance of the underlying index on any given day or over any given period. Such variations are commonly referred to as the tracking error. The fund intends to maintain a low tracking error by closely aligning the portfolio in line with the index. The securities comprising the underlying index are periodically reviewed by Index Service Provider.

The Scheme may invest in liquid schemes managed by the AMC provided such investment is in conformity to the investment objectives of the Scheme and Regulations. As per the Regulations, no investment management fees will be charged for such investments.

Implementation of Policies

The Scheme, in general, will hold all of the securities that comprise the Underlying Index in the same proportion as the index. Expectation is that, over time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

Investment Process

The Scheme will track the Underlying Index and is a passively managed scheme. The investment Decisions will be determined as per the Underlying Index. In case of any change in the index due to corporate actions or change in the constituents of the Underlying Index (as communicated by the Index Service Provider), relevant investment decisions will be determined considering the composition of the Underlying Index.

The Investment decision of the Fund will be carried out by the designated Fund Manager.

Portfolio Turnovers

Portfolio turnover is defined as the lower of purchases and sales divided by the average assets under management of the respective Scheme during a specified period of time.

Generally, portfolio turnover of the Scheme will be confined to rebalancing of portfolio on account of change in the composition and corporate actions of the Underlying Index.

S&P BSE Liquid Rate Index

S&P BSE Liquid Rate Index seeks to measure the returns from a daily rolling deposit at the Tri-Party Repo (TREP) rate. The aforesaid Index is calculated using the TREP rate for transactions maturing on the following business day and with settlement T+0.

Tracking Error

The performance of the Scheme may not be commensurate with the performance of the underlying index on any given day or over any given period. Such variations are commonly referred to as the tracking error. Tracking errors may result from a variety of factors including but not limited to:

- Any delay experienced in the purchase or sale of securities due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred.
- The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange.
- The potential for trades to fail which may result in the Scheme not having acquired securities at a price necessary to track the index.
- Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.

Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile.

Issue of Units

1. The units being offered will have a face value of Rs. 1000/- each.
2. As the Scheme is listed on NSE/BSE, subsequent buying or selling by investors can be made from the secondary market on NSE/BSE. The minimum number of units that can be bought or sold is 1 (one) unit.
3. Investor(s) can directly buy / sell in blocks from the Fund only in Creation unit size and in multiples thereof.

The funds managed by associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, redemption of Units held by such funds, associates and Sponsors might have an adverse impact on the Units of the Scheme because the timing of such redemption may impact the ability of other Unit holders to redeem their Units.

Further, as per the Regulation, in case the AMC invests in any of the Schemes managed by it, it shall not be entitled to charge any fees on such investments.

Procedure followed for Investment Decisions Kindly refer Statement of Additional Information available on the website of AMC i.e. www.icicipruamc.com for more details.

POSITION OF DEBT MARKET IN INDIA

Indian debt markets, in the early nineties, were characterised by controls on pricing of assets, segmentation of markets and barriers to entry, low levels of liquidity, limited number of players, near lack of transparency, and high transactions cost. Financial reforms have significantly changed the Indian debt markets for the better. Most debt instruments are now priced freely on the markets; trading mechanisms have been altered to provide for higher levels of transparency, higher liquidity, and lower transactions costs; new participants have entered the markets, broad basing the types of players in the markets; methods of security issuance, and innovation in the structure of instruments have taken place; and there has been a significant improvement in the dissemination of market information. There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitized Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes upto sixty years and more (perpetual). Perpetual bonds are now issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers.

The yields and liquidity on various securities as on March 31, 2022 are as under:

Issuer	Instrument	Maturity	Yields (%)	Liquidity
GOI	Treasury Bill	91 days	3.78%	High
GOI	Treasury Bill	364 days	4.56%	High
GOI	Short Dated	1-3 Yrs	4.32%-5.67%	High
GOI	Medium Dated	3-5 Yrs	5.67%-6.09%	High
GOI	Long Dated	5-10 Yrs	6.09%-6.82%	High
Corporates	Taxable Bonds (AAA)	1-3 Yrs	5.00%-5.80%	Medium
Corporates	Taxable Bonds (AAA)	3-5 Yrs	5.80%-6.30%	Low to Medium

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme would be benchmarked against S&P BSE Liquid Rate Index.

S&P BSE Liquid Rate Index seeks to measure the returns from a daily rolling deposit at the Tri-Party Repo (TREP) rate. The aforesaid Index is calculated using the TREP rate for transactions maturing on the following business day and with settlement T+0. As the Scheme will invest predominantly in Tri-Party Repos, S&P BSE Liquid Rate Index is a suitable benchmark for the scheme.

III. UNITS AND OFFER

This section provides details you need to know for investing in the Scheme.

A. NEW FUND OFFER DETAILS

This section does not apply to the Scheme, as the ongoing offer of the Scheme has commenced after NFO, and the units are available for continuous subscription and redemption.

B. ONGOING OFFER DETAILS:

Ongoing Offer Period	<p>The units of the Scheme are listed on the BSE and NSE. All investors may sell their units in the exchange(s) on which these units are listed on all the Trading Days of the exchanges. Mutual fund will repurchase units from Investors on any Business Day provided the value of units offered for repurchase is not less than Creation Unit Size and in multiples thereof.</p> <p>The AMC at its discretion may repurchase fractional units i.e. units which are not in multiple of one.</p> <p>Investors can sell units in less than Creation Unit Size of the Scheme directly to the Mutual Fund without any exit load in the certain cases. Kindly refer to the section "Load Structure" for more details.</p>
Ongoing price for subscription by investors. This is the price you need to pay for purchase.	<p>The purchase price of the Units will be based on the Applicable NAV.</p> <p>Purchase Price = Applicable NAV (for respective plan and option of the Scheme)</p> <p>Example: An investor invests ` 20,000/- and the current NAV is ` 20/- then the purchase price will be ` 20/- and the investor receives $20000/20 = 1000$ units.</p> <p>The Scheme will comply with SEBI circular No. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 regarding applicability of entry load.</p> <p>The investors can subscribe/redeem the units of the Scheme directly with the Mutual Fund only in Creation Unit Size and in multiples thereof. In case of securities bought and/or sold by AMC on behalf of the investor, the profit/loss due to buy/sell of securities and transaction handling charges/costs would be borne by investor. The units are listed on the NSE & BSE to provide liquidity through secondary market. It may also list on any other exchanges subsequently. All categories of Investors may purchase the units through secondary market on any trading day.</p>
Ongoing price for redemption by investors. This is the price you will receive for redemptions.	<p>Redemption Price = Applicable NAV (for respective plan and option of the scheme) * (1 - Exit Load as applicable to the investor)</p> <p>Applicable exit load shall be subject to the tenure of investment of the investor in the scheme vis-à-vis the exit load structure applicable when investor had invested in the scheme.</p>

Example: An investor invests on April 1, 2019 when the applicable exit load for the scheme was 2% if redeemed within 1 year, else nil.

Scenario 1) In case investor redeems before April 1, 2020, then applicable exit load would be 2%. Now suppose the same investor decides to redeem his 1000 units. The prevailing NAV is ` 25/-. Hence, the sale or redemption price per unit becomes ` 24.50/- i.e. $25 \times (1 - 2\%)$. The investor therefore gets $1000 \times 24.50 = ` 24,500/-$.

Scenario 2) In case investor redeems on or after April 1, 2020, then applicable exit load would be nil. Now suppose the same investor decides to redeem his 1000 units. The prevailing NAV is ` 30/-. Hence, the sale or redemption price per unit will be ` 30/- i.e. $30 \times (1 - 0)$. The investor therefore gets $1000 \times 30 = ` 30,000/-$.

Investors can subscribe/redeem the units of the Scheme directly with the Mutual Fund only in Creation Unit Size and in multiples thereof. In case of securities bought and/or sold by AMC on behalf of the investor, the profit/loss due to buy/sell of securities and transaction handling charges/costs would be borne by investor.

There is no exit load currently. However transaction charges payable to Custodian/ Depository Participants, and other incidental charges relating to conversion of units into basket of securities may be deducted from redemption proceeds. Investors may redeem units at the listed price plus transaction handling charges on exchange.

The AMC at its discretion may repurchase fractional units i.e. units which are not in multiple of one.

Investors can sell units in less than Creation Unit Size of the Scheme directly to the Mutual Fund without any exit load in the certain cases. Kindly refer to the section "Load Structure" for more details.

1. As per the SEBI (Mutual Funds) Regulations, 1996, mutual fund schemes are permitted to invest in securitised debt. Accordingly, few schemes of ICICI Prudential Mutual Fund ("the Fund") had made investment in Pass Through Certificates (PTCs) of certain special purpose vehicles / securitisation trusts ("the Trusts"). The returns filed by few of these securitisation Trusts whose PTCs were held by the Fund were taken up for scrutiny by the Income Tax Authorities for Assessment Years 2007-08, 2008-09, 2009-10 and 2010-11. Arising out of this, the Income Tax Authorities had raised a demand on such Trusts. On failure to recover the same from the Trusts, Income Tax Authorities sent demand notices to the Fund along with other Mutual Funds as beneficiaries / contributors to such Trusts. The Fund in consultation with its tax & legal advisors has contested the applicability of such demand and got the attachment order vacated by Hon'ble High Court of Bombay. The Trusts on their part had contested the matter and the Income Tax Appellate Tribunal upheld their appeal and dismissed the contentions and all the cross-appeals filed by the Tax Authorities. The Tax Authorities have now filed an appeal with Hon'ble High Court on the matter.

5) Any deficiency in the systems and operations of the Sponsor(s) and/ or the AMC and/ or the Board of Trustees/Trustee Company which SEBI has specifically advised to be disclosed in the SID, or which has been notified by any other regulatory agency, shall be disclosed. –
