I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
- Past performance of the Sponsor and their associates /AMC/Mutual Fund does not guarantee future performance of the scheme.
- The name of the Scheme is ICICI Prudential Global Advantage Fund (FOF) and do not in any manner indicate either the quality of the Scheme or their future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 22.2 lakhs made by them towards setting up the Fund and such other accretions and additions to the corpus set up by Sponsors.
- The present scheme is not a guaranteed or assured return scheme.
- All Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting market in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures. As with any securities investment, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the markets.
- In the event of receipt of inordinately large number of redemption requests or of a restructuring of any of the Scheme’s portfolio, there may be delays in the redemption of Units.
- Investors in the Scheme are not being offered any guaranteed/indicated returns.
- Mutual Funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the underlying instruments, settlements periods, trading volumes etc.
- As the liquidity of the Scheme’s investments could at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme’s portfolio. In view of this, the Trustee has the right, at their sole discretion to limit redemptions (including suspending redemption) under certain circumstances, as described under the section titled “Right to limit Repurchases/Redemptions”.
- Two-Factor Authentication and Third – Party Payments will be carried out in line with SEBI Circulars dated October 4, 2021, March 15, 2022 and any further clarifications received by AMFI and SEBI in this regard. In case of unsuccessful Two-Factor Authentication the redemption request might get rejected.
- Infectious Illness Risk: An outbreak of an infectious respiratory illness, COVID 19, caused by a novel coronavirus has resulted in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions,
lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets have experienced temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs. Such events can have an impact on the underlying Schemes and could impact their ability to purchase or sell securities or cause elevated tracking error and increased premiums or discounts to the NAV. Other infectious illness outbreaks in the future may result in similar impacts.

**Scheme Specific Risk Factors**

Investors may please note that they will be bearing the recurring expenses of the relevant Fund of Funds Scheme in addition to the expenses of the underlying schemes in which the Fund of Funds Scheme makes investment.

1. **Risks associated with investing in Fund of Funds schemes**
   - As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.
   - Again as the Fund of Funds scheme may shift the weightage of investments between schemes into which it invests, the expenses charged being dependent on the structure of the underlying schemes (being different) may lead to a non-uniform charging of expenses over a period of time.
   - As the Fund of Funds (FOF) factsheets and disclosures of portfolio will be limited to providing the particulars of the schemes invested at FOF level, investors may not be able to obtain specific details of the investments of the underlying schemes. While it would be the endeavour of the Fund Manager of the Fund of Funds scheme to invest in the underlying scheme in a manner, which will seek to maximize returns, the performance of the underlying Scheme may vary which may lead to the returns of the Fund of Funds Scheme being adversely impacted.
   - The scheme specific risk factors of the underlying scheme becomes applicable where a Fund of Funds invests in any underlying scheme. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme relevant to the Fund of Funds scheme that they invest in. Copy of the Scheme Information Document pertaining to the underlying scheme of ICICI Prudential Mutual Fund, which disclose the relevant risk factors, are available at the Customer Service Centers or may be accessed at [www.icicipruamc.com](http://www.icicipruamc.com)
   - A Fund Manager managing any one of the Fund of Funds scheme may also be the Fund Manager for the underlying scheme.

2. **Risk associated with Investing in money market instruments**
   - **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
   - **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest
   - **Liquidity risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio

3. **Risks associated with investing in Tri Party Repo through CCIL (TREPS)**
The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.

CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”.

As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

**Risks associated with Short Selling and Securities Lending**
The scheme does not intend to short sell the securities and will not engage in Securities lending.

**Risks associated with ADR / GDR / Foreign Securities**
The scheme will not have any exposure to ADR / GDR / Foreign Securities.

**Risks associated with Securitized Debt**
The scheme will not have any exposure to Securitized debt.

**Risks associated with Derivatives**
The scheme will not have any exposure to Derivatives.
The underlying schemes having exposure to the fixed income securities and/or equity and equity related securities will be subject to the following risks and in turn the Scheme’s/Plan’s performance will be affected accordingly.

1. Investing in Equities

- Investors may note that AMC/Fund Manager’s investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Schemes to make intended securities purchases due to settlement problems could cause the Schemes to miss certain investment opportunities.

- The value of the Schemes’ investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Schemes may fluctuate and can go up or down.

- The Mutual Fund may not be able to sell/lend out securities, which can lead to temporary illiquidity. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

- Investors may note that IDCW is due only when declared and there is no assurance that a company (even though it may have a track record of payment of IDCW in the past) may continue paying IDCW in future. As such, the schemes are vulnerable to instances where investments in securities may not earn IDCW or where lesser IDCW is declared by a company in subsequent years in which investments are made by schemes. As the profitability of companies are likely to vary and have a material bearing on their ability to declare and pay IDCW, the performance of the schemes may be adversely affected due to such factors.

- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk. Within the Regulatory limits, the AMC may choose to invest in unlisted securities. This may however increase the risk of the portfolio.

- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Schemes’ investments is inherently restricted by trading volumes in the securities in which it invests.

- Fund manager endeavors to generate returns based on certain past statistical trend. The performance of the schemes may get affected if there is a change in the said trend. There can be no assurance that such historical trends will continue.

- In case of abnormal circumstances it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. The Schemes investing in foreign securities will be exposed to settlement risk, as different countries have different settlement periods.

- The schemes are also vulnerable to movements in the prices of securities invested by the schemes which again could have a material bearing on the overall returns from the schemes.
• Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Schemes or business prospects of the Company in any particular sector.

2. Investing in Fixed Income Securities

• Market Risk/Interest Rate Risk: The Net Asset Value (NAV) of the Scheme(s), to the extent invested in fixed income securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

• Liquidity Risk: The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.

• Credit Risk: Investments in fixed income securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

• Price Risk: Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

• Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

• Settlement risk: The inability of the underlying Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the underlying Scheme’s portfolio due to the extraneous factors that may impact liquidity would result, at times, in potential losses to the Plan, in case of a subsequent decline in the value of securities held in the Scheme’s portfolio.

• Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.

• Risks associated with investment in unlisted securities: Except for any security of an associate or group company, the scheme can invest in securities which are not listed on a stock exchange (“unlisted Securities”) which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no
assurance that the Scheme will realise their investments in unlisted securities at a fair value.

- Different types of fixed income securities in which the Scheme(s) would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme(s) risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities.

- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.

- As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.

- The Scheme(s) at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

3. Risks associated with investment in ADR/GDR/Foreign Securities:

It is AMC’s belief that the investment in ADRs/GDRs/overseas securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the schemes. Since the Schemes would invest only partially in ADRs/GDRs/overseas securities, there may not be readily available and widely accepted benchmarks to measure performance of the Schemes. To manage risks associated with foreign currency and interest rate exposure, the Scheme may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.

To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of the other restrictions on investment.

Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Scheme in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Scheme may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively

include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs, and overseas regulatory costs.

4. Risks associated with Investing in Derivatives:

The Schemes may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The Fund may use derivatives instruments like Stock /Index Futures or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Schemes to certain risks inherent to such derivatives.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place
- Basis Risk: This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying asset being hedged
- Exchanges could raise the initial margin, variation margin or other forms of margin on derivative contracts, impose one sided margins or insist that margins be placed in cash. All of these might force positions to be unwound at a loss, and might materially impact returns.

RISK FACTORS WITH RESPECT TO IMPERFECT HEDGING USING INTEREST RATE FUTURES

An Interest Rate Futures is an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today. Interest Rate Futures are Exchange traded. These future contracts are cash settled.

1. Perfect Hedging means hedging the underlying using IRF contract of same underlying.
2. Imperfect hedging means the underlying being hedged and the IRF contract has correlation of closing prices of more than 90%.

In case of imperfect hedging, the portfolio can be a mix of:

Scheme Information Document
ICICI Prudential Global Advantage Fund (FOF)
1) Corporate Bonds and Government securities or
2) Only Corporate debt securities or
3) Only government securities with different maturities

**Risk associated with imperfect hedging includes:**

**Basis Risk:** The risk arises when the price movements in derivative instrument used to hedge the underlying assets does not match the price movements of the underlying assets being hedged. Such difference may potentially amplify the gains or losses, thus adding risk to the position.

**Price Risk:** The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

**Risk of mismatch between the instruments:** The risk arises if there is a mismatch between the prices movements in derivative instrument used to hedge, compared to the price movement of the underlying assets being hedged. For example when IRF which has government security as underlying is used, to hedge a portfolio that contains corporate debt securities.

Correlation weakening and consequent risk of regulatory breach: SEBI Regulation mandates minimum correlation criterion of 0.9 (calculated on a 90 day basis) between the portfolio being hedged and the derivative instrument used for hedging. In cases where the correlation falls below 0.9, a rebalancing period of 5 working days has been permitted. Inability to satisfy this requirement to restore the correlation level to the stipulated level, within the stipulated period, due to difficulties in rebalancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value.

### 5. Risks associated with investing in Securitised Debt:

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, microfinance companies or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers. Generally available asset classes for securitization in India are:

- Commercial vehicles
- Auto and two wheeler pools
- Mortgage pools (residential housing loans)
- Personal loan, credit card and other retail loans
- Corporate loans/receivables
- Microfinance receivables

In pursuance to SEBI communication dated: August 25, 2010, given below are the requisite details relating to investments in Securitized debt..

- Risk profile of securitized debt vis-à-vis risk appetite of the scheme:

  Securitized debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity. Investment in these instruments will help the fund in aiming
at reasonable returns. These returns come with a certain degree of risks which are covered separately in the Scheme Information Document.

In terms of specific risks attached to securitization, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher, which helps in making their overall risks comparable to other AAA/AA rated asset classes.

The underlying schemes may invest in securitized debt assets. These assets may be in the nature of Asset Backed securities (ABS) and Mortgage Backed securities (MBS) with underlying pool of assets and receivables like housing loans, auto loans and single corporate loan originators.

While entering into any securitization transaction, the risk may be assessed based on the information generated from the following sources:

1. Rating provided by the rating agency
2. Assessment by the AMC

(1) Assessment by a Rating Agency

In its endeavor to assess the fundamental uncertainties in any securitization transaction, a credit rating agency normally takes into consideration following factors:

Credit Risk:

Credit risk forms a vital element in the analysis of securitization transaction. Adequate credit enhancements to cover defaults, even under stress scenarios, mitigate this risk. This is done by evaluating following risks:

- Asset risk
- Originator risk
- Portfolio risk
- Pool risks

The quality of the pool is a crucial element in assessing credit risk. In the Indian context, generally, pools are ‘cherry-picked’ using positive selection criteria. To protect the investor from adverse selection of pool contracts, the rating agencies normally take into consideration pool characteristics such as pool seasoning (seasoning represents the number of installments paid by borrower till date: higher seasoning represents better quality), over dues at the time of selection and Loan to Value (LTV). To assess its risk profile vis-à-vis the overall portfolio, the pool is analyzed with regard to geographical location, borrower profile, LTV, and tenure.

Counterparty Risk:

There are several counterparties in a securitization transaction, and their performance is crucial. Unlike in the case of credit risks, where the risks emanate from a diversified pool of retail assets, counterparty risks result in either performance or non-performance. The rating agencies generally mitigate such risks through the usage of stringent counterparty selection and replacement criteria to reduce the risk of failure. The risks assessed under
this category include:
  - Servicer risk
  - Commingling risk
  - Miscellaneous other counterparty risks

Legal Risks:

The rating agency normally conducts a detailed study of the legal documents to ensure that the investors’ interest is not compromised and relevant protection and safeguards are built into the transaction.

Market Risks:

Market risks represent risks not directly related to the transaction, but other market related factors, stated below, which could have an impact on transaction performance, or the value of the investments to the investors.
  - Macro-economic risks
  - Prepayment risks
  - Interest rate risks

Other Risks associated with investment in securitized debt and mitigation measures

Limited Liquidity and Price Risk:

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

Securitized debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity.

Limited Recourse, Delinquency and Credit Risk:

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However many factors may affect, delay or prevent the repossessing of such Asset or the length of time required to realise the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

Risks due to possible prepayments: Weighted Tenor / Yield

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments Full prepayment of underlying loan contract may arise under any of the following circumstances;
  - Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
  - Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
  - The Servicer recognizing a contract as a defaulted contract and hence repossessing
the underlying Asset and selling the same
  - In the event of prepayments, investors may be exposed to changes in tenor and yield.

**Bankruptcy of the Originator or Seller:**

If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to Trust was not a sale then an Investor could experience losses or delays in the payments due. All possible care may generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a “True Sale”. Legal opinion may be normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

**Bankruptcy of the Investor’s Agent:**

If Investor’s agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor’s Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement. All possible care may normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor’s Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor’s Agent. Legal opinion may be normally obtained to the effect that the Investors Agent’s recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

**Credit Rating of the Transaction / Certificate:**

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

**Risk of Co-mingling:**

With respect to the Certificates, the Servicer will deposit all payments received from the Obligors into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

(2) **Assessment by the AMC**

**Mapping of structures based on underlying assets and perceived risk profile**

The underlying scheme may invest in securitized debt originated by Banks, NBFCs and other issuers of investment grade credit quality and established track record. The AMC may evaluate following factors, while investing in securitized debt:

**Originator:**

Acceptance Evaluation Parameters (For Pool Loan and Single Loan Securitization Transactions)
Track record:

The AMC may check for adequate past track record of the Originator before selection of the pool including the number of issuances in past, track record of issuances, experience of issuance team, etc.

Willingness to pay:

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank, guarantee etc. may be obtained, as a risk mitigation measure.

Ability to pay:

Management analysis may be used for identifying company specific financial risks. One of the factors for assessment may be the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer’s financial statements may be undertaken to review its ability to undergo stress on cash flows and asset quality. Business risk assessment, wherein following factors may be considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition a detailed review and assessment of rating rationale may be done including interactions with the company as well as agency

Evaluation Parameters (For Pool Loan and Single Loan Securitization Transactions)

The AMC may avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if there are concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of reschedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

Advantages of Investments in Single Loan Securitized Debt

- Wider Coverage: A Single Loan Securitized Debt market offers a more diverse range of issues / exposures as the Banks / NBFCs lend to larger base of borrowers.
- Credit Assessment: Better credit assessment of the underlying exposure as the Banks / NBFCs ideally co-invest in the same structure or take some other exposure on the same borrower in some other form.
- Better Structuring : Single Loan Securitized Debt investments facilitates better structuring than investments in plain vanilla debt instruments as it is governed by Securitization guidelines issued by RBI.
- Better Legal documentation: Single Loan Securitized Debt structures involve better legal documentation than Non-Convertible Debenture (NCD) investments.
- End use of funds: Securitized debt has better standards of disclosures as well as limitation on end use of funds as compared to NCD investments wherein the end use is general corporate purpose.
- Yield enhancer: Single Loan Securitized Debt investments give higher returns as compared to NCD investments in same corporate exposure.
- Regulator supervision: Macro level supervision from RBI in Securitization Investments as compared to NCD investments.
- Tighter covenants: Single Loan Securitized Debt structures involve tighter financial covenants than NCD investments.

Disadvantages of Investments in Single Loan Securitized Debt

- Liquidity risk: Investments in Single Loan Securitized Debts have relatively less liquidity as compared to investments in NCDs.
- Co-mingling risk: Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

6. Risks associated with Securities Lending (SL)

Securities lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

The risks in security lending consist of the failure of intermediary / counterparty, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the intermediary / counterparty. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

7. Risk Factors associated with Thematic Schemes:

Investing in thematic schemes is based on the premise that the Scheme will seek to invest in companies belonging to a specific sector / theme. This will limit the capability of the Scheme to invest in other sectors/theme.

The Scheme would invest in equity and equity related securities of companies engaged in the particular sector / theme and hence concentration risk is expected to be high.

Also, as with all equity investing, there is a risk that companies in that specific sector / theme will not achieve its expected earnings results, or that an unexpected change in the market or within the company will occur, both of which may adversely affect investment results. Thus investing in a sector /theme specific scheme could involve potentially greater volatility and risk.

8. Risk Factors associated with schemes investing in Gilt Securities

Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to government securities but is true for all fixed income securities. The default risk however, in respect of Government securities is zero. Therefore, their prices are influenced only by movement in interest rates in the financial
system. On the other hand, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced by credit standing of the issuer as well as the general level of interest rates.

Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

9. Risk Factors Associated with Investments in REITs and InvITs:

Market Risk:

REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager’s investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, Real Estate and Infrastructure sectors, settlement periods and transfer procedures. The scheme will undertake active portfolio management as per the investment objective to reduce the market risk.

Liquidity Risk:

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying units.

Reinvestment Risk:

Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or IDCW pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns. However, the reinvestment risk will be limited as the proceeds are expected to be a small portion of the portfolio value.

Interest Rate Risk: Securities / Instruments of REITs and InvITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

The various factors which impact the value of the Scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the units of the underlying Scheme, settlements periods, trading volumes etc.
For more information on the underlying Scheme and risks factors thereof, investors are requested to refer to the Scheme Information Document of the Underlying Scheme. The Scheme Information Document of the schemes of ICICI Prudential Mutual Fund are available at the Customer Service Centers and is also available on the website of the AMC i.e. www.icicipruamc.com.

**RISK MANAGEMENT STRATEGIES:**

The underlying schemes having exposure to the fixed income securities and/or equity and equity related securities will be subject to the following risks and in turn the Scheme’s/Plans’ performance will be affected accordingly.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. If the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (Mutual Fund) Regulations would become applicable automatically without any reference from SEBI and the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days’ notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Scheme shall adhere to the requirements prescribed by SEBI from time to time in this regard.

POSITION OF EQUITY MARKET IN INDIA

The Indian stock market is one of the world’s largest stock market. There are two leading stock exchanges in India, i.e. BSE Limited (BSE) and National Stock Exchange of India Limited (NSE). BSE was established in 1875 and is the oldest stock exchange in Asia. NSE, a more recent establishment which came into existence in 1992, is the largest and most advanced stock market in India and is also one of the biggest stock exchanges in Asia in terms of transactions. NSE's flagship index, NIFTY 50, is used extensively by investors in India and around the world to take exposure to the Indian equities market.
BSE has a large number of scrips which are listed. The Indian stock market scene really picked up after the opening up of the economy in the early nineties. NSE changed the way the Indian markets function, in the early nineties, by replacing floor based trading with nationwide screen based electronic trading, which took trading to the doorstep of the investor. NSE was mainly set up to bring in transparency in the markets. Instead of trading membership being confined to a group of brokers, NSE ensured that anyone who was qualified, experienced and met minimum financial requirements was allowed to trade. The price information which could earlier be accessed only by a handful of people could now be seen by a client in a remote location with the same ease. The paper based settlement was replaced by electronic depository based accounts and settlement of trades was always done on time. One of the most critical changes was that a robust risk management system was set in place, so that settlement guarantees could protect investors against broker defaults. The corporate governance rules were gradually put in place which initiated the process of bringing the listed companies at a uniform level.

**POSITION OF DEBT MARKET IN INDIA**

Indian debt markets, in the early nineties, were characterised by controls on pricing of assets, segmentation of markets and barriers to entry, low levels of liquidity, limited number of players, near lack of transparency, and high transactions cost. Financial reforms have significantly changed the Indian debt markets for the better. Most debt instruments are now priced freely on the markets; trading mechanisms have been altered to provide for higher levels of transparency, higher liquidity, and lower transactions costs; new participants have entered the markets, broad basing the types of players in the markets; methods of security issuance, and innovation in the structure of instruments have taken place; and there has been a significant improvement in the dissemination of market information. There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds
issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitized Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes up to sixty years and more (perpetual). Perpetual bonds are now issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers.

III. UNITS AND OFFER

This section provides details you need to know for investing in the scheme.

A. NEW FUND OFFER DETAILS

This section does not apply to the schemes covered in this SID, as the ongoing offer of the Schemes has commenced after the NFO period, and the units are available for continuous subscription and redemption.

B. ONGOING OFFER DETAILS

<table>
<thead>
<tr>
<th>Ongoing Offer Period</th>
<th>The scheme is an open ended scheme and hence is available for ongoing subscription and redemption on an ongoing basis.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ongoing Price for subscription (purchase) / switch-in (from other schemes / plans of the mutual fund) by investors</td>
<td>The purchase price of the Units will be based on the Applicable NAV. Purchase Price = Applicable NAV (for respective plan and option of the Scheme)</td>
</tr>
<tr>
<td><strong>Example:</strong> An investor invests <code>20,000/- and the current NAV is </code>20/- then the purchase price will be `20/- and the investor receives 20000/20 = 1000 units.</td>
<td></td>
</tr>
<tr>
<td>Ongoing price for redemption (sale) /switch outs (to other schemes/plans of the Mutual Fund) by investors</td>
<td>The Redemption Price of the Units will be based on the Applicable NAV (for respective plan and option of the Scheme) subject to the prevalent exit load provisions. The Redemption Price of the Units will be computed as follows:</td>
</tr>
<tr>
<td><strong>Example:</strong> An investor invests on April 1, 2019 when the applicable exit load for the scheme was 2% if redeemed within 1 year, else nil.</td>
<td></td>
</tr>
</tbody>
</table>
Scenario 1) In case investor redeems before April 1, 2020, then applicable exit load would be 2%. Now suppose the same investor decides to redeem his 1000 units. The prevailing NAV is Rs 25/-. Hence, the sale or redemption price per unit becomes Rs. 24.50/- i.e. 25*(1-2%). The investor therefore gets 1000 x 24.50 = Rs. 24,500/-. 

Scenario 2) In case investor redeems on or after April 1, 2020, then applicable exit load would be nil. Now suppose the same investor decides to redeem his 1000 units. The prevailing NAV is Rs 30/-. Hence, the sale or redemption price per unit will be Rs. 30/- i.e. 30*(1-0). The investor therefore gets 1000 x 30 = Rs. 30,000/-. 

Cut-off time for subscriptions / redemptions

<tr>
<td></td>
<td>• In respect of valid applications received after 3.00 p.m. and where the funds for the entire amount are available for utilization on the same day or before the cut-off time of the next business day - the closing NAV of the next Business Day shall be applicable.</td>
</tr>
<tr>
<td></td>
<td>• Irrespective of the time of receipt of application, where the funds for the entire amount are available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable.</td>

</tr>
<tr>
<td></td>
<td>To clarify, for investments through systematic investment routes such as Systematic Investment Plans (SIP), Systematic Transfer Plans (STP), Flex STP, Capital Appreciation STP, IDCW Transfer, Trigger etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme</td>

irrespective of the installment date of the SIP, STP or record date of IDCW etc.

- “Switch Out” shall be treated as redemption application and accordingly, closing NAV of the day will be applicable based on the cut-off time for redemption followed for various type of schemes.

- “Switch In” shall be treated as purchase application and accordingly for unit allotment, closing NAV of the day will be applicable on which the funds are available for utilization.

The Mutual Fund reserves right to change/modify any of the terms with respect to processing of transaction in line with guidelines issued by SEBI or AMFI from time to time.

<table>
<thead>
<tr>
<th>Redemption of Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Units can be redeemed (i.e. sold back to the Fund) on every Business Day at the Redemption Price (hereinafter defined). The redemption request can be made for a minimum amount as mentioned under section “Highlights / Summary of the Scheme”.</td>
</tr>
</tbody>
</table>

In case, a unit holder specifies the redemption amount as well as number of Units for redemption, (subject to the minimum redemption amount as mentioned above) the number of Units specified will be considered for deciding the redemption amount. If only the redemption amount is specified by the Unit holder, the Fund will divide the redemption amount so specified by the Applicable NAV based price to arrive at the number of Units.

Where Units under a Scheme are held under both the Plans, the investor must clearly state the Plan in which the redemption/switch request has to be processed, failing which the request will be processed under the ICICI Prudential Global Advantage Fund (FOF). However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan.

In case an investor has purchased Units on more than one Business Day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time) will be deemed to have been redeemed first i.e. on a First-in-First-Out basis.

The redemption will be at Applicable NAV based prices, subject to applicable exit load.

The Fund reserves the right to modify exit loads, at any time in future, on prospective basis. In such an event, the Redemption Price of the Units will be adjusted by using the following formula. The maximum load (exit) under the Scheme will not exceed the limits as prescribed under the
Regulations.

The Fund shall ensure that the repurchase price of an open ended scheme is not lower than 95 per cent of the Net Asset Value.

Notice of the changes in the load structure (exit load) shall be made by a suitable display in the Customer Service Centers of the AMC and will be published on the AMC website.

Payment of proceeds

All redemption requests received prior to the cut-off time on any Business Day at the Official Points of Acceptance of Transactions will be considered accepted on that Business Day, subject to the redemption requests being complete in all respects, and will be priced on the basis of Redemption Price for that day. Requests received after the cut-off time will be treated as though they were accepted on the next Business Day.

As per the Regulations, the Fund shall dispatch redemption proceeds within 10 Business Days (working days) of receiving the redemption request.

Trustees reserve the right to alter or modify the number of days taken for redemption of Units under the Fund after taking into consideration the actual settlement cycle, when announced, as also the changes in the settlement cycles that may be announced by the Principal Stock Exchanges from time to time.

As per the guidelines issued by SEBI, in the event of failure to dispatch the redemption or repurchase proceeds within 10 working days, the AMC is liable to pay interest to the Unit holders @ 15% p.a. SEBI has further advised the mutual funds that in the event of payment of interest to the Unit holders, such Unit holders should be informed about the rate and the amount of interest paid to them.

If the Unit holder fails to provide the Bank mandate, the request for redemption would be considered as not valid and the Fund retains the right to reject/withhold the redemption until a proper bank mandate is furnished by the Unitholder and the provision with respect of penal interest in such cases will not be applicable/entertained.

The mode of payment may be direct credit/ECS/cheque or any other mode as may be decided by AMC in the interest of investors.

If the investor(s)/unitholder(s) submit(s) redemption request accompanied with request for change of Bank mandate or
submits a redemption request within 7 days from the date submission of a request for change of Bank mandate details, the Asset Management Company will process the redemption but the release of redemption proceeds shall be deferred on account of additional verification, but will be within the regulatory limits as specified by Securities and Exchange Board of India time to time.

Suspension of Sale and Redemption of Units

Suspension or restriction of repurchase/ redemption facility under any scheme of the mutual fund shall be made applicable only after obtaining the approval from the Boards of Directors of the AMC and the Trustees. After obtaining the approval from the AMC Board and the Trustees.

Additionally, the following requirements shall need to be observed before imposing restriction on redemptions:

a) Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:
   i. Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security.
   ii. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
   iii. Operational issues – when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.

b) Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

c) Any imposition of restriction would require specific approval of Board of AMC and Trustees and the same should be informed to SEBI immediately.

d) When restriction on redemption is imposed, the following procedure shall be applied:

1. No redemption requests up to INR 2 lakh shall be subject to such restriction.
2. Where redemption requests are above INR 2 lakh, AMCs shall redeem the first INR 2 lakh without such
restriction and remaining part over and above INR 2 lakh shall be subject to such restriction.

**Right to Limit Redemptions**

Any Units, which by virtue of these limitations are not redeemed on a particular Business Day, will be carried forward for Redemption to the next Business Day, in order of receipt. Redemptions so carried forward will be priced on the basis of the Applicable NAV (subject to the prevailing load) of the Business Day on which Redemption is made. Under such circumstances, to the extent multiple Redemption requests are received at the same time on a single Business Day, Redemptions will be made on pro-rata basis, based on the size of each Redemption request, the balance amount being carried forward for Redemption to the next Business Day(s).

Suspension or restriction of repurchase/ redemption facility under any scheme of the mutual fund shall be made applicable only after obtaining the approval from the Boards of Directors of the AMC and the Trustees. After obtaining the approval from the AMC Board and the Trustees, intimation would be sent to SEBI in advance providing details of circumstances and justification for the proposed action shall also be informed.

5. In the case of joint holding in a folio, the first named Unit holder shall receive the CAS/account statement. The holding pattern has to be same in all folios across Mutual Funds for CAS.

Further, in case if no transaction has taken place in a folio during the period of six months ended September 30 and March 31, the CAS detailing the holdings across all Schemes of all mutual funds, shall be emailed at the registered email address of the unitholders on half yearly basis, on or before twenty first day of succeeding month, unless a specific request is made to receive the same in physical form.

a. The amount of actual commission paid by AMCs/Mutual Funds (MFs) to distributors (in absolute terms) during the half-year period against the concerned investor’s total investments in each MF scheme. The term ‘commission’ here refers to all direct monetary payments and other payments made in the form of gifts / rewards, trips, event sponsorships etc. by AMCs/MFs to distributors. Further, a mention may be made in such CAS indicating that the commission disclosed is gross commission and does not exclude costs incurred by distributors such as Goods and Services Tax (wherever applicable, as per existing rates), operating expenses, etc.

b. The scheme’s average Total Expense Ratio (in percentage terms) along with the break up between Investment and Advisory fees, Commission paid to the distributor and Other expenses for the period for each scheme’s applicable plan where the concerned investor has actually invested in.

Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period.
In case of the units are held in dematerialized (demat) form, the statement of holding of the beneficiary account holder will be sent by the respective Depository Participant periodically.

**CAS for investors having Demat account:**
6. Investors having MF investments and holding securities in Demat account shall receive a single Consolidated Account Statement (CAS) from the Depository.
7. Consolidation of account statement shall be done on the basis of Permanent Account Number (PAN). In case of multiple holding, it shall be PAN of the first holder and pattern of holding. The CAS shall be generated on a monthly basis.
8. If there is any transaction in any of the Demat accounts of the investor or in any of his mutual fund folios, depositories shall send the CAS within fifteen days from the month end. In case, there is no transaction in any of the mutual fund folios and demat accounts then CAS with holding details shall be sent to the investor on half yearly basis.
9. In case an investor has multiple accounts across two depositories, the depository with whom the account has been opened earlier will be the default depository.

The dispatch of CAS by the depositories would constitute compliance by the AMC/ the Mutual Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations.

However, the AMC reserves the right to furnish the account statement in addition to the CAS, if deemed fit in the interest of investor(s).

**Policy for declaration of Income Distribution cum capital withdrawal (IDCW Policy)**

**(i) Growth Option**
The Scheme will not declare any IDCW under this option. The income earned by the Scheme will remain reinvested in the Scheme and will be reflected in the Net Asset Value. This option is suitable for investors who are not looking for regular income but who have invested with the intention of capital appreciation.

**(ii) IDCW Option**
This option is suitable for investors seeking income through IDCW declared by the Scheme. The Trustee may approve the distribution of IDCW by AMC out of the net surplus under this Option. The remaining net surplus after considering the IDCW and tax, if any, payable there on will be ploughed back in the Scheme and be reflected in the NAV.
(iii) **IDCW Payout:**

As per the SEBI (MF) Regulations, the Mutual Fund shall despatch to the Unit Holders, IDCW warrants within 15 days from the record date. IDCW will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). IDCW will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the Registered address of the sole/first holder as indicated in the original application form. To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investors should provide the name of their bank, branch and account number in the application form. IDCW cheques will be sent to the Unit Holder after incorporating such information. The minimum amount for IDCW payout shall be Rs.100, else IDCW would be mandatorily reinvested.

(iv) **IDCW Reinvestment:**

The investors opting for IDCW Option may choose to reinvest the IDCW to be received by them in additional Units of the Scheme. Under this provision, the IDCW due and payable to the Unit holders will be compulsorily and without any further act by the Unit holders reinvested in the Scheme (under the IDCW Option, at the first ex-IDCW NAV). The IDCW so reinvested shall be constructive payment of IDCW to the Unit holders and constructive receipt of the same amount from each Unit holder for reinvestment in Units. On reinvestment of IDCW, the number of Units to the credit of Unit holder will increase to the extent of the IDCW reinvested IDCW by the NAV applicable on the day of reinvestment, as explained above.

(v) **IDCW Transfer:**

IDCW Transfer facility will be available under the scheme. The designated schemes (source and target schemes) for this facility are as given below:

Note: Investors are requested to note that any change in IDCW sub-option, due to additional investment or on the basis of a request received from the investor, will be applicable to all existing units in the IDCW option of the Scheme under the respective folio.

The Trustee reserves the right to declare IDCW under the IDCW option of the Scheme depending on the net distributable surplus available under the Scheme. It should, however, be noted that actual distribution of IDCW and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustee.

The IDCW will be distributed in accordance with applicable SEBI Regulations and SEBI Circular no. SEBI/ IMD/ Cir No. 1/ 64057/06 dated April 4, 2006 on the procedure for IDCW Distribution.

Equalization Reserve

When units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Investors are requested to note that holding of units through Demat Option is also available under all open ended equity and Debt schemes wherein SIP facility is available. The units will be allotted based on the applicable NAV as per the SID and will be credited to investors’ Demat account on weekly basis upon realization of funds. For e.g. Units will be credited to investors’ Demat account every Monday for realization status received in last week from Monday to Friday.

In case an investor has purchased Units on more than one Business Day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time) will be deemed to have been redeemed first i.e. on a First-in-First-Out basis. Unitholders may also request for redemption of their entire holding and close the account by indicating the same at the appropriate place in the Redemption Request Form.

It is hereby notified that for the purpose of optimizing operational efficiency and in the interest of investors, the AMC reserves the right to choose the mode of payment i.e. NEFT/NACH/RTGS etc. for crediting redemption/IDCW proceeds, unless a written intimation is received from the investor to the contrary. The AMC may send a communication to investors whose mode of payment has been changed to a new mode from the existing mode.

The Bank has taken steps to align the charge levied for non-maintenance of MAB with the above direction of RBI.

3) Details of all enforcement actions taken by SEBI in the last three years and/or pending with SEBI for the violation of SEBI Act, 1992 and Rules and Regulations framed there under including debarment and/or suspension and/or cancellation and/or imposition of monetary penalty/adjudication/enquiry proceedings, if any, to which the Sponsor(s) and/or the AMC and/or the Board of Trustees /Trustee Company and/or any of the directors and/or key personnel (especially the fund managers) of the AMC and Trustee Company were/ are a party. 1. As per the SEBI (Mutual Funds) Regulations, 1996, mutual fund schemes are permitted to invest in securitised debt. Accordingly, few schemes of ICICI Prudential Mutual Fund (“the Fund”) had made investment in Pass Through Certificates (PTCs) of certain special purpose vehicles / securitisation trusts (“the Trusts”). The returns filed by few of these securitisation Trusts whose PTCs were held by the Fund were taken up for scrutiny by the Income Tax Authorities for Assessment Years 2007-08, 2008-09, 2009-10 and 2010-11. Arising out of this, the Income Tax Authorities had raised a demand on such Trusts. On failure to recover the same from the Trusts, Income Tax Authorities sent demand notices to the Fund along with other Mutual Funds as beneficiaries / contributors to such Trusts. The Fund in consultation with its tax & legal advisors has contested the applicability of such demand and got the attachment order vacated by Hon’ble High Court of Bombay. The Trusts on their part had contested the matter and the Income Tax Appellate Tribunal upheld their appeal and dismissed the contentions and all the cross-appeals filed by the Tax Authorities. The Tax Authorities have now filed an appeal with Hon’ble High Court on the matter.
5) Any deficiency in the systems and operations of the Sponsor(s) and/or the AMC and/or the Board of Trustees/Trustee Company which SEBI has specifically advised to be disclosed in the SID, or which has been notified by any other regulatory agency, shall be disclosed. –
