B. Market Review and Outlook

Market Review FY2020

Global Economy :

The COVID-19 has impacted the demand and supply chain which may result in muted growth for the coming quarters. The virus outbreak quickly progressed to an economic shock as governments across the globe enact strict containment policies. Borders have been closed, and schools and universities shut down. Markets are panicked by uncertainty over the duration of the virus threat and the extent of further containment measures. This has been compounded by fears that monetary policy efficacy might get reduced with policy rates remaining at level zero. Going forward, expectations of more aggressive fiscal stimulus measures will offset any shortfall in monetary firepower. The main uncertainty is the duration and depth of the virus-induced recession.

US:

The government's virus containment measures mean a technical recession – negative GDP growth in Q1 and Q2 is probable. As of March 31, 2020, S&P 500 Index has declined 29% from its 2020 peak, which is on par with a moderate economic recession. A reasonable amount of economic pain is already in the price.

A risk is that the sharp plunge in cash flows causes highly indebted companies to default, triggering a credit-crunch in the broader economy. This threat should be lessened by the Fed's 150 basis points (bps) of emergency easing, asset purchases, and the resumption of an alphabet soup of crisis-era liquidity management facilities.

Eurozone:

Europe is one of the worst-affected region outside of China by COVID-19. It has high exposure to global trade, particularly China, the ECB has little monetary policy firepower and the rules around fiscal policy in the Eurozone make stimulus measures difficult to implement. Italy is in quarantine and strict containment measures have been put in place in France and Spain. Similar measures are likely to be adopted by other European countries.

The combination of these factors means that the Eurozone stock index has been the hardest hit of the major bourses, down more than 35% as of mid-March 2020.

Japan:

Japan's economy was weak at the end of 2019, weighed down by the October value-added tax (VAT) increase and a natural disaster caused by the largest typhoon in half a century. The COVID-19 disruption has almost certainly pushed the economy into recession.

Stimulus measures are underway. The Bank of Japan has limited firepower, but has increased its purchases of government bonds, corporate bonds, and equities via exchange-traded funds (ETFs). The government is likely to announce emergency fiscal measures. Japan's structural weaknesses in terms of weak monetary policy and persistent deflation mean it will likely remain an economic laggard relative to other developed economies.

China:

China was the first country to enter the COVID-19 crisis and see a downward trend in the number of new cases. High frequency trackers of daily economic activity show that economic activity is resuming. Traffic congestion in Shenzhen and Shanghai has returned to normal levels and coal consumption by power generators is trending higher.

Government stimulus is coming. Local provinces have announced infrastructure projects, and the People's Bank of China has cut interest rates and the reserve ratio requirement several times. The main uncertainty is whether the combined monetary and fiscal stimulus will be as large as in 2015/16, which created a V-shaped recovery in 2016. The chances of similar stimulus are less, as China's leadership is still worried about excessive debt levels. But it will still be substantial and may position China for a strong rebound when the threat from the virus starts to subside.

Indian economy:

India's gross domestic product (GDP) slowed to 3.1% growth in the January-March quarter (Q4) compared to revised 4.1% growth in October-December quarter (Q3). For the fiscal 2020, GDP growth came in at 4.2% compared to 6.1% in fiscal 2019.

India ended the financial year 2020 with a fiscal deficit of 4.59% of gross domestic product, against the target of 3.8%, according to data from the Controller General of Accounts. India's current account deficit (CAD) narrowed sharply to US\$ 1.4 billion (0.2% of GDP) in the third quarter of fiscal 2020 from US\$ 17.7 billion (2.7% of GDP) in the third quarter of fiscal 2019 and US\$ 6.5 billion (0.9% of GDP) in the preceding quarter, i.e., second quarter of fiscal 2020.

Both the Reserve Bank of India (RBI) and Government have decided that fiscal year 2019-20 will end on June 30, 2020 while fiscal year 2020-21 will begin on July 1, 2020 but ends on March 31, 2021. Thereafter, all fiscal years will start on April 1 every year.

Indian equity market:

Indian Equity markets ended fiscal year 2020 with a drop of 13% from the previous year. In March alone, Indian equity indices S&P BSE Sensex and Nifty 50 tanked 23% each due to worries about rapid spread of Covid-19 in the country and the government's lockdown decision. The domestic indices corrected sharply post the announcement of restriction of economic activity to contain the spread of the epidemic in the country. Several agencies, including CRISIL, Moody's Investors Service and Fitch, have slashed India's growth forecast after the announcement of the lockdown. The lockdown announcement came even as crisis at a large domestic private sector bank had already dented the market sentiment. Selling by foreign portfolio investors (FPIs) also contributed to the market decline.

Indian debt market:

The central bank cut repo rates by 150 bps from April 2019 to March 2020. The RBI changed its stance from neutral to accommodative in its June meet and has maintained its accommodative stance through FY 2020 and has also adopted "whatever it takes" approach since the outbreak of the Covid Pandemic. The RBI unleashed its bazooka – a comprehensive package of measures which can be broadly classified under: 1. Enhancing banking liquidity, 2. Supporting Financial Market, 3. Reducing Debt servicing burden to support the economy. RBI introduced Targeted Long Term Repo Operations (TLTROs) to nudge banks to participate in the corporate bond market which may further help in the normalization of the credit spread. While the measures announced by the RBI may go a long way in easing financial conditions, safeguarding financial stability, and ensuring that the initial shock to the economy is not amplified through the financial sector, more will likely be needed. Fiscal and Monetary policy would have to work hand in hand to shield the economy from the disruptions caused by COVID-19. Moody's downgrade of India's Sovereign Debt to Baa3, just one notch above junk bond status may exacerbate the economic turmoil as cost of financing increases and further lead to flight of foreign investments from India.

Gold Review:

Indian gold prices registered a 29.6% increase, ending FY2020 at ₹ 40,989 per 10 grams on March 31, 2020 as against ₹ 31,601 per 10 grams on March 31, 2019 on the MCX (Multi-Commodity Exchange).

So how is FY2021 shaping up?

Economic outlook

As per The International Monetary Fund, India's Gross Domestic Product may contract by 4.5% in the 2020-21 financial year due to the lockdown imposed to fight the coronavirus pandemic. The coronavirus pandemic came at a time when India's economy was already slowing, due to persistent financial sector weaknesses. Even after the spread of the virus has slowed down, the recovery might remain weak due to a host of reasons like business confidence failing to improve, establishment closures and structural shifts in firm and household behavior which may cause supply chain disruptions and weakness in aggregate demand. The trajectory for FY 2021 hence largely depends on how the Covid-19 curve shapes up in India along with the probability of a successful discovery of a vaccine.

Equity market outlook:

Global Markets ended on a sombre note in March as the world grappled with the widening spread of COVID-19. Indian Markets (Nifty 50 Index) witnessed a sharp decline of 23.2% - a large monthly decline since the Global Financial Crisis. In a bid to contain the spread of COVID-19, many countries announced lockdowns bringing economies to a grinding halt and raising concerns of severe slowdown. This led to further negative sentiments and risk aversion across asset classes.

India too saw a steep rise in the number of COVID-19 cases. As a measure to further prevent the spread of COVID-19, the Government of India too ordered a complete nationwide lockdown for 21 days starting March 25 leading to a sharp sell-off in Indian markets. The decision of a complete lockdown spooked FPIs and resulted in an outflow of ₹ 61,972 Crs.

In what can be called as an integrated effort to support growth, Global Central Banks announced a series of fiscal and monetary stimulus measures. The US Federal Reserve cut interest rates twice and announced US \$ 2 trillion stimulus package, the Bank of England (BoE) too cut rates and announced a new round of QE (Quantitative Easing) worth GBP 200 billion. On the domestic front, the RBI too came up with measures ranging from policy rate cut, Cash Reserve Ratio (CRR) cut to regulatory forbearance to mitigate the impact of lockdown on economy. The Monetary Policy Committee (MPC) cut policy rates by 75 bps to 4.4%. The RBI also cut CRR ratio from 4% to 3% for a year. The Finance Minister too announced several measures like cash transfers, free food grain, gas cylinders and interest free loans.

There is no book or recent historical precedent for the global growth shock which everyone is witnessing currently. Normally, crisis is the result of any economic and/or financial imbalances developed during expansion phase. However, the current crisis underlying cause remains a health crisis which is spreading in a globalized world from the start of the year. Finally, the Indian economy at this juncture is better placed in terms of fundamentals than previous crisis.

The divergence between Value and Growth stocks continues to prevail with select Megacaps still in the expensive zone. Currently, fundamentally sound value stocks are available at inexpensive valuations, providing good dividend yield and have better earnings visibility.

Unitholders may note that volatility is inherent to equities which need to be kept in mind while investing. As an investor, one must embrace volatility and be cognizant of their own asset allocation while investing.

Debt market outlook:

RBI delivered on rate cuts with the Repo rate at record low levels. The short end of the curve rates collapsed with Treasury Bills (T-bills) and even Certificate of Deposits (CD) yields trading on par with reverse repo rates given excess system liquidity.

The long end of the yield curve was elevated due to government bond supply worries; however, the flattening of the curve has begun with the comfort of high liquidity and expectation of incremental support from RBI. Liquidity may rise sharply on government spending and RBI liquidity infusion and this may prompt the markets to play for any carry available at any segment of the curve. The yield flattening is expected to continue given that the economy will take a while to recover from lockdown.

RBI may undertake more measures to aid the transmission of rates and some of the measures which could have major impact are:

1. Measures to prevent banks from deploying large amount of surplus liquidity at RBI's reverse repo window.
2. Increase in HTM (Hold to Maturity) limit of bonds for banks
3. RBI may be buying large quantity of govt. bonds either through Open Market Operation (OMO) purchases or in the primary market to help improve demand-supply.
4. Ultra Long Term Repo Operations of 5 Years & above.

Going forward, continued improvement is expected in the financial markets, due to various measures undertaken by Government and RBI. These measures resulted in the cooling down of corporate bonds, but the markets expect that there is lot of space for the spread assets (AA Corporate Bonds) to compress.

These are interesting times or special situations which throw special opportunities for investment. Hence, the near term appears to be bullish for bond markets and that the yield curve in two to five years with combination of spread assets may provide better risk adjusted returns. Having said that, one should be cognizant of managing the liquidity, concentration, credit and duration.

C. Operations of the Schemes

1. Average Assets under Management (AAUM)

The AAUM of the Mutual Fund for the quarter ended March 31, 2020 stood at ₹ 3,58,141.58 crore, while for the quarter ended March 31, 2019 the AAUM of the Mutual Fund was ₹ 3,21,281.17 crore.

As of March 31, 2020, the Fund comprised 72 open ended scheme which includes 21 Equity Oriented schemes, 16 Debt Oriented schemes, 6 Hybrid schemes, 2 Solution Oriented schemes (Retirement Fund having 4 plans there under, each having different portfolio), 3 Index Funds, 14 Exchange Traded Funds, 9 Fund of Funds investing domestically, 1 Fund of Funds scheme investing overseas and 143 close ended schemes.

During the year, the Fund has launched 3 Equity schemes, 3 Exchange Traded Funds and 2 Fund of Funds and 4 Fixed Maturity Plans. During the year, 25 Fixed Maturity Plans, 8 Capital Protection Oriented Plans, 9 Multiple Yield Plans and 8 Close Ended Equity Funds have matured.

2. Operations and Consumer Service

With a view to rendering timely and efficient customer service, the Investment Manager of the Fund, viz., ICICI Prudential Asset Management Company Ltd. ("the AMC") has been leveraging on its 208 branches including 97 functioning as official points of acceptance of transactions, as on March 31, 2020, effectively servicing the large client base. Additionally a dedicated contact center has been effective in providing investor support and redressing their grievances. The AMC's focus has always been on technological innovation for facilitating investors' convenience.

Considering the current situation due to COVID-19, investors may note that the operations of the AMC are being run uninterruptedly and the AMC continues to run its operations in a smooth manner. In these testing times, the various platforms offered through digital mode, enables the unit holder to transact in the schemes of the mutual fund.

3. Scheme-wise commentary

Unitholders are requested to note that considering the impact of COVID-19 pandemic on the economies, the domestic and global markets witnessed sharp decline towards the end of FY2020 which impacted the returns of equity oriented schemes. Subsequently, due to coordinated measures undertaken by global and domestic central banks and other fiscal measures, the markets recovered in the first quarter of the FY2021.

• ICICI Prudential Equity & Debt Fund

ICICI Prudential Equity & Debt Fund is an open -ended Hybrid Scheme that seeks to generate long term capital appreciation and current income from a portfolio that is invested in equity and equity related securities as well as in fixed income securities.

The Growth Option of the scheme posted a return of -21.03% in FY2020. The Benchmark, CRISIL Hybrid 35+65 - Aggressive Index posted -12.84% for the period. The Scheme has underperformed the benchmark index mainly owing to overweight position in metal and power & oil & gas sector stocks.

The AAUM of the scheme during the last quarter of FY2020 was ₹ 20,891.03 crore.

• ICICI Prudential Equity Savings Fund

ICICI Prudential Equity Savings Fund is an open -ended Hybrid Scheme that seeks to generate regular income through investments in fixed income securities and using arbitrage and other derivative strategies. The Scheme also intends to generate long-term capital appreciation by investing a portion of the Scheme's assets in equity and equity related instruments.

The Growth Option of the scheme posted a return of -7.64% in FY2020. The Benchmark, Nifty Equity Savings TRI posted -4.43% for the period. The Scheme has underperformed the benchmark index mainly owing to overweight in utilities sector stocks.

The AAUM of the scheme during the last quarter of FY2020 was ₹1,459.94 crore.

• ICICI Prudential Regular Savings Fund

ICICI Prudential Regular Savings Fund is an open -ended Hybrid Scheme that seeks to generate regular income through investments predominantly in debt and money market instruments. The Scheme also seeks to generate long term capital appreciation from the portion of equity investments under the Scheme.

The Growth Option of the scheme posted a return of 2.17% in FY2020. The Benchmark, NIFTY 50 Hybrid Composite Debt 15:85 Index posted 5.85% for the period. Debt portfolio of the Scheme was largely credit oriented, aimed at generating accrual. Over a period of past one year, credit spreads have expanded while government bonds have rallied, leading to an underperformance over a period of 1 year.

The AAUM of the scheme during the last quarter of FY2020 was ₹1,713.90 crore.

• ICICI Prudential Retirement Fund

ICICI Prudential Retirement Fund is an open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier).

The investment objective of the Retirement Fund is to provide capital appreciation and income to the investors which will help to achieve retirement goals by investing in a mix of securities comprising of equity, equity related instruments, fixed income securities and other securities.

Hybrid Aggressive Plan: An open-ended hybrid scheme predominantly investing in equity and equity related securities to generate capital appreciation. The scheme may also invest in Debt, Gold/Gold ETF/units of REITs & InvITs and such other asset classes as may be permitted from time to time for income generation / wealth creation. However, there is no assurance or guarantee that the investment objective of the Scheme would be achieved.

The Growth option of the scheme posted a return of -19.16% in FY2020. The benchmark, CRISIL Hybrid 35+65 - Aggressive Index, posted -12.84% for the same period. The Scheme increased the equity allocation compared to the index which has resulted in the negative alpha. The Scheme has underperformed the benchmark index mainly owing to underweight position in one of the large cap stock and an underweight position in the consumer and leveraged financial stocks.

The AAUM of the scheme during the last quarter of FY2020 was ₹ 79.32 crore.

II. BRIEF BACKGROUND OF SPONSORS, TRUST, TRUSTEE AND THE AMC

A. Sponsors

1. ICICI Bank Limited

ICICI Bank is India's largest private sector bank with total assets of ₹ 10,983.65 billion at March 31, 2020 and profit after tax ₹ 79.31 billion for the year ended March 31, 2020. ICICI Bank as at March 31, 2020 had a network of 5,324 Branches and 15,688 ATM's across India. ICICI Bank and their subsidiaries offers a wide range of banking and financial services including commercial banking, retail banking, project and corporate finance, working capital finance, insurance, venture capital and private equity, investment banking, broking and treasury products and services.

ICICI Bank's international footprint consists of subsidiaries in the United Kingdom and Canada, branches in the United States, Singapore, Bahrain, Hong Kong, Sri Lanka, Dubai International Finance Centre, South Africa and China and representative offices in the United Arab Emirates, Bangladesh, Malaysia and Indonesia. The UK subsidiary of the Bank has seven branches in UK and one branch in Germany.

ICICI Bank Limited is a publicly held banking company incorporated under the Companies Act of 1956, India. The equity shares of the Bank are listed on Bombay Stock Exchange and National Stock Exchange; while the American depository receipts are listed on New York stock exchange.

2. Prudential plc

Prudential plc is an Asia-led portfolio of businesses focused on structural growth markets. The business helps individuals to de-risk their lives and deal with their biggest financial concerns through life and health insurance, and retirement and asset management solutions. Prudential plc has 20 million customers and is listed on stock exchanges in London, Hong Kong, Singapore and New York. Prudential plc is not affiliated in any manner with Prudential Financial, Inc. a company whose principal place of business is in the United States of America, nor with the Prudential Assurance Company, a subsidiary of M&G plc, a company incorporated in the United Kingdom.

A brief Group overview is stated below:

Prudential Corporation Asia

Asia's long-term structural trends are powerful drivers of sustainable growth. These trends underpin a strong and growing demand for savings and protection across the region, as markets are challenged by low life insurance penetration and a large pension funding gap. Prudential Corporation Asia are well placed to capture this opportunity, providing products that meet our customers' needs and gaining political and regulatory support in our markets.

Africa

They have also continued to expand their presence in Africa, one of the world's most under penetrated markets where the population is forecast to grow by a billion by 2045. In July, they completed our acquisition of a 51 per cent stake in a leading life insurer, Group Beneficial, operating in West and Central Africa. They now operate in eight markets with a population of almost 400 million.

US

In the US, an extra 22 million individuals will need retirement solutions by 2035¹, and pension provision has been declining². They see a growing demand for retirement products and an ongoing shift to fee-based solutions. Jackson is evolving its product range to address these needs.

Additionally, pursuant to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2016/37 dated February 25, 2016 and an addendum issued by the AMC in this regard (dated May 18, 2016), the AMC had introduced separate plans under ICICI Prudential Liquid Fund for deployment of unclaimed amounts. Consequently, unclaimed amounts are deployed in respective investor's folios under the aforesaid plans, in accordance with the said addendum and hence disclosed separately on AMC's website.

- 9 The outbreak of COVID-19 virus continues to spread across the globe including India, resulting in significant volatility in financial markets and a significant decrease in global and India's economic activities. On March 11, 2020, this outbreak was declared a global pandemic by the World Health Organisation. On March 24, 2020, the Indian Government announced a lockdown across the nation to contain the spread of the virus.

In preparing the accompanying financial statements, the Fund's management is required to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets (including investments in debt securities) and income of the Scheme. These estimates and associated assumptions, especially for determining fair value of the Scheme's investments in debt securities, are based on historical experience and various other factors including the possible effects that may result from the pandemic, that are believed to be reasonable under the current circumstances. The valuation of such debt securities is carried out for each debt security separately by independent agencies as required by SEBI (Mutual Funds) Regulations 1996, as amended. Further, as required by the SEBI Regulations, the AMC is responsible for adjustments to the above-mentioned price to make it reflective of fair value as detailed in the valuation policy approved by the Board of Directors of the AMC and Trustees.

Given the dynamic nature of the pandemic situation, the valuation of the Scheme's investments in securities as at March 31, 2020, are subject to evolving uncertainties on account of severity of the outbreak and duration of the lockdown.

- 10 These Abridged Financial Statements have been derived from the Audited Financial Statements referred to in the Audit Report.

- 11 Previous year figures are regrouped wherever necessary.
