Proposed Portfolio for December 2017 Series

Scheme Recommendation	About The Scheme
<p>ICICI Prudential Focused Bluechip Equity Fund – (29.5% Exposure)</p>	<ul style="list-style-type: none"> • ICICI Prudential Focused Bluechip Equity Fund seeks to invest in large cap companies with a proven track record, quality management and good growth potential. • These large caps are relatively safer compared with other stocks by way of lower volatility and may turn out to be a good bet in turbulent economic conditions. • The scheme is currently overweight in the Pharmaceuticals sector against the benchmark due to reasonably attractive valuations of some quality pharmaceutical companies. • The scheme is currently overweight in the Power sector and has increased its position in the sector since the previous month. The sector is currently at its lowest capacity utilisation. Increase in capacity utilisation with no additional capex and a potential decline in interest rates can benefit the sector in terms of higher operating and financial leverage and higher earnings. • The scheme is slightly underweight to the banking sector. Among the banks, the scheme has higher exposure to private banks as they are better placed in terms of valuation, growth prospect, and asset quality.

<p>ICICI Prudential Infrastructure Fund – (10% Exposure)</p>	<ul style="list-style-type: none"> • Allocation in ICICI Prudential Infrastructure Fund as it follows the infrastructure theme and the sectors that directly benefit from growth of infrastructure. • This sector is currently a relatively attractive investment prospect largely because of overall macro environment. With Government expected to increase spending in this space we believe this sector
<p>ICICI Prudential Exports & Other Services Fund – (19.5% Exposure)</p>	<ul style="list-style-type: none"> • ICICI Prudential Exports & Other Services Fund invests in stocks across the universe of listed companies available in the Services and Exports sector including Pharmaceuticals, Software, Media & Entertainment, Power, Auto Ancillaries, Gas, Industrial Capital Goods and other companies. • While the Scheme’s performance is benchmarked against Nifty Services Sector Index, the Scheme may opportunistically invest in companies outside the same, but which form part of the Services Sector. • The Scheme seeks to invest in stocks across market capitalization and use growth style investment approach. The Scheme follows combination of top down approach and bottom up stock selection approach.
<p>ICICI Prudential Balanced Fund – (29.5% Exposure)</p>	<ul style="list-style-type: none"> • ICICI Prudential Balanced Fund invests in a blend of large- and mid-cap stocks. While the large cap stocks represent established enterprises with track record, the mid- and small-caps represent businesses with long-term growth potential. • ICICI Prudential Balanced Fund aims to take long-term exposure to stocks, which offer reasonable return over the long term. It concentrates on business and economic fundamentals driven by in-depth fundamental research.
<p>ICICI Prudential Balanced Advantage Fund – (9.5% Exposure)</p>	<ul style="list-style-type: none"> • ICICI Prudential Balanced Advantage Fund is an open ended equity oriented fund that aims at generating risk-controlled equity linked returns. • The Scheme uses an in-house asset allocation model to maintain an effective equity investment level, endeavored to be above 65%. However, the actual equity level may go below 65% after considering the derivative exposure. • Blend of large and mid-cap stocks – While the large cap stocks represent established enterprises selected from the Top 100 stocks by market capitalization, the midcaps are smaller business entities with long-term growth potential. The allocation is decided on a tactical basis rather than any predefined ratio. • Asset allocation – The Scheme uses P/BV model, Price to Book Value (P/BV), with a view to limit the downside during a falling market, while aiming to capture the upside in a rising market.

The above exposure for scheme recommendation is Indicative Weightage. Data as on 31st Oct 2017
